

Marie Skłodowska Curie Postdoctoral Fellowship opportunities
--

The Faculty of Architecture and the Built Environment at Delft University of Technology will accept 'Expressions of Interest' to host Postdoctoral Fellows

Excellent postdocs and recent PhD graduates who would like to apply for the Marie Curie Individual Postdoctoral Fellowship 2021 are invited to join the excellent research environment at our faculty. With an EU-funded Marie Skłodowska Curie Fellowship, you could spend 1-2 years at one of [our research groups](#). We offer candidates an excellent research environment, [discipline related knowledge centres](#) and access to novel [research facilities](#). The Faculty of Architecture and the Built Environment has a strong focus on 'design-oriented research', combining a robust research profile with passion and creativity. We are working on improving the built environment with the help of a broad set of disciplines, including architectural design, urban planning, building technology, social sciences, process management, and geo-information science. Selected candidates will receive support from dedicated staff to write a successful proposal for the MSCA-PF-2021 call (*expected* deadline 15 September 2021).

[Delft University of Technology](#) is the oldest, largest and most comprehensive university of technology in the Netherlands. TU Delft ranks 57 on the 2021 QS World University Rankings and 78 on the 2021 THE World Rankings list, ranked 3rd in the QS World University Rankings by Subject 2021 (Architecture / Built Environment) and has been awarded the HR Excellence in Research logo. The **Faculty of Architecture and the Built Environment** is one of the largest architecture faculties in Europe and a leading design academy, playing a key role in design-oriented research. The faculty has a strong focus on 'design-oriented research', combining a robust research profile with passion and creativity. We are working on improving the built environment with the help of a broad set of disciplines, including architectural design, urban planning, building technology, social sciences, process management, and geo-information science.
