

# 11<sup>th</sup> Conference on Traffic and Granular Flow 28-30 October 2015

## Scope

The traffic and granular flow conference brings together scientists with different backgrounds to discuss flows from the perspective of the individual particle/agent and from the aggregate flow perspective. Besides the classical topics of granular flow and highway traffic, its scope includes but is not limited to data transport (Internet traffic), pedestrian and evacuation dynamics, intelligent transport systems, intercellular transport, swarm behaviour and collective dynamics of other biological systems.

All papers accepted for a poster or oral presentation will appear in the book of proceedings. A selection of these will be invited to publish an extended version of their paper in a special (journal) issue. The conference is set up for easy exchange of scientific ideas between researchers, experienced and starting PhD Students. This allows to explore and show opportunities for interdisciplinary research.

## Important dates

1 April 2015	Submission of abstracts
1 July 2015	Notification of acceptance
27 October 2015 (evening)	Welcome reception
28-30 October 2015	Conference
15 November 2015	Submission of full papers

## Location and programme

The conference will take place in the Delft area (the Netherlands). More details on the exact venue will be available on the conference website.

The conference will start on Tuesday October 27, 2015 with welcome drinks in the city centre of Delft. Then, three days of conference will follow, with participant presentations, poster sessions and keynote speeches.

## Organisation

The conference is organised by the Transport & Planning team of the Delft University of Technology. The organisation committee is led by Victor Knoop and Winnie Daamen.
