

(Generative) AI internship opportunity: Help build AI and LLM products

About the Role: Are you passionate about AI and looking for an opportunity to make a real impact with real-life companies? Are you technical and have AI experience? Then we are looking for you! During your internship, you have the opportunity to contribute to, for example, tasks involving AI classification, fine-tuning of open-source Large Language Models (LLMs), and vision Machine Learning (ML) projects.

Your contributions will be key in achieving our ambitious goal of providing "company intelligence at scale" through our evolving Minimum Viable Product (MVP).

If you're eager to challenge yourself, have technical skills, and are eager to grow in the AI landscape, this role is for you!

What We Offer:

- **Learning experience:** We will show you the latest AI technologies and methodologies, providing you with hands-on experience.
- **Write your master thesis:** Collaborate with us on your master thesis (optional), let's discuss topics you are interested in!
- **Startup culture experience:** Explore a dynamic and fast-paced startup, where every day brings new challenges and learning opportunities.
- **Internship compensation:** We have start-up budgets, but we offer a startup-level internship compensation of €600/month (+ huge learning opportunities)
- **Teamwork:** Work with our team of 5 full-timers and collaborate, working in our Amsterdam office at least 2-3 days a week
- **Start date:** Start immediately and flexibility of internship duration, let's discuss!

About You:

- **Study:** You are currently doing your MSc on a technical subject (e.g., computer science) or business related subject with technical elements (e.g., Econometrics)
- **Technical skills:** You have a strong foundation in problem-solving, proficiency in Python, and experience in data science and AI, you're ready to take on the challenge. Experience with LLMs is highly valued.
- **Passionate about AI:** Your enthusiasm for AI technology is matched by your eagerness to apply your skills in meaningful, impact-driven projects.
- **Team player:** Collaboration is in your nature, and you're excited to contribute to a team that values innovation and creativity.
- **Action-driven:** You're prepared to jump in and start contributing to our fast-evolving projects, and understand the dynamic and changing startup environment

If you're driven by curiosity and motivated by the idea of building cutting-edge AI technology, we want you on our team! This internship is not just an opportunity to learn – if there is a match, there is a potential to join the team full-time. Interested? Contact Wouter van Haften (Founder) via +31620086783 or wouter@generativeaistrategy.com. Please send your CV and motivation.
