1 Configure TU email on the Outlook app (iOs)

Before you begin

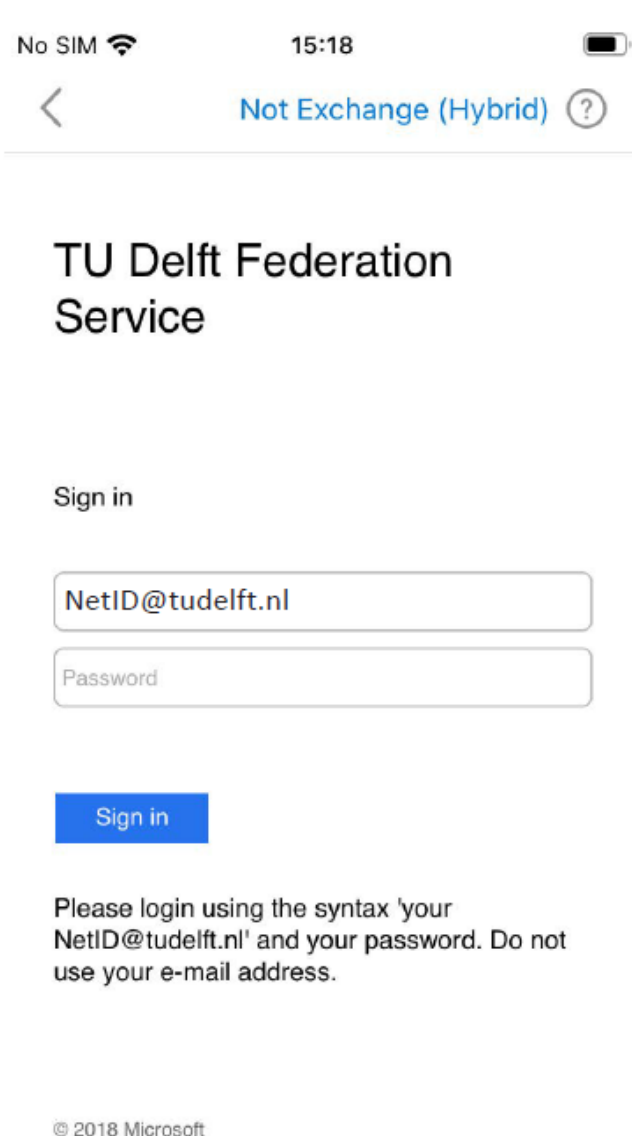

The following instruction is supported by the TU Delft and has been tested to be working. However, we offer this manual to you as an extra service. In case you have a configuration or version of IOS other than the one described here and you have problems setting up the Outlook app, neither ICT nor a Servicepoint will be able to help you to set up the Outlook app.

1.1 Instructions

Step 1. Install the Outlook app. Open the app, enter your TU Delft email address and tap Add account.

Step 2. Sign in with NetID@tudelft.nl.

Step 3. Approve sign-in with Authenticator.

NetID@tudelft.nl

Approve sign-in request

Open your Microsoft Authenticator app and approve the request to sign in.

I can't use my Microsoft Authenticator app right now

Please login using the syntax <your NetID@tudelft.nl> and your password. Do not use your e-mail address.

Step 4. Tap Maybe Later for now. Choose your preferences on the Notification pop-ups. Your account will now sync, this may take some time.
