

Installing Microsoft Teams for Windows 10

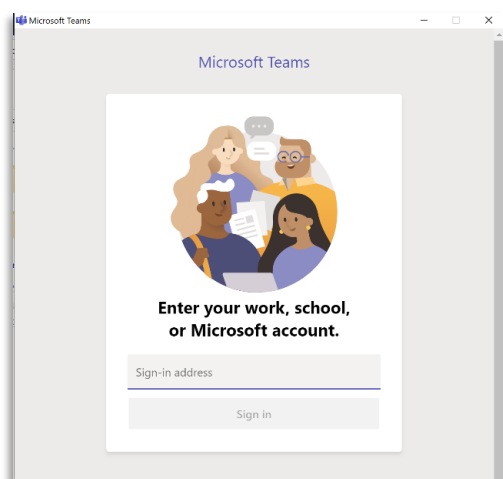

Installation Microsoft Teams in Windows 10

If you're working in Windows 7 it is not possible to install Teams on your computer. You can still use Teams online via teams.microsoft.com and log in with your tudelft.net account.

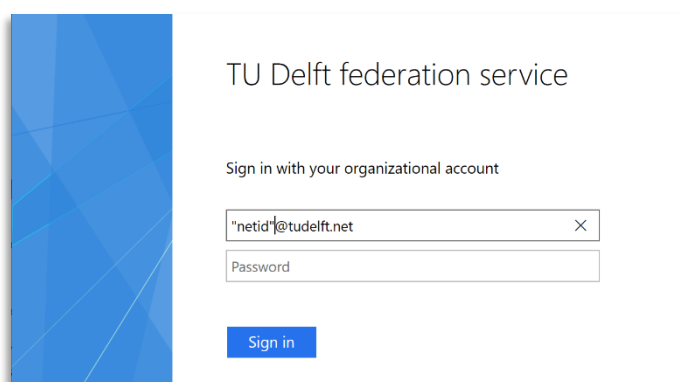

Tip: for installing Windows 10 on your computer, please contact WPS.

Note: Login is based on your tudelft.net account, so you use <netid>@tudelft.net as login.

1. Download Microsoft Teams via the following link: <https://software.tudelft.nl>.
2. Choose Download for desktop and then Download Teams.
3. Launch the Teams app.
4. You will now see the screen below. Fill in your TUDelft.net account and log in.

5. You will now get to the screen below. Enter your password and log in.

6. In order to avoid having to log in over and over again, let your organization manage your device. If you want to do this, tick the square and continue.
7. You are ready to get started with Teams!
