

PhD scientific event 2021

The annual PhD scientific event of the faculty of Aerospace Engineering (AE) will take place **online** on **Friday 26th of February**. This year, guests will have access to a video playlist containing over 120 three-minute videos that concisely summarize the research being conducted by our PhD community. During the event, the top 12 most popular videos will be broadcast and a live voting will decide the winners. The authors of the winning videos will be awarded with very special prizes. Like past editions, this year's event will also feature an exciting **keynote speech** from an industry expert in the space sector!

Programme

- | | |
|-------------|--|
