

## About 2-B Energy

2-B Energy is developing an innovative 6MW turbine for the offshore wind industry. 2-B Energy was founded in 2007 and is active in the field of offshore wind energy. The company is well advanced with the design for a new concept for offshore wind power plants. The concept has been developed together with a reputable network of key partners in the industry and the first unit is to be assembled and installed in the first quarter of 2015.

The 2-B concept includes differentiating designs for the rotor, nacelle, support structure and electrical system. This holistic approach, covering the full life cycle of all components, will result in significant cost savings compared to current technologies.

## Information application

We look forward to receiving your application documents per e-mail or feel free to contact us by phone for further information.

+31 74 256 63 30 and ask for Jan Beerens
