German Aerospace
Center (DLR), Germany

Second announcement

11 October 2024

Dear colleagues,

Following the [first announcement](#) that the 7th International Symposium on Space Sailing (ISSS 2025) will take place at Delft University of Technology, the Netherlands, from 30 June to 4 July 2025, I am happy to now share some more details on the symposium content and abstract submission process.

ISSS 2025 will focus on recent advances in any form of space sailing with areas of interest including hardware and enabling technologies, dynamics and control, modelling and testing, mission applications, and past, current, and future programs.

The organising committee aims to deliver a diverse and high-quality program through a combination of technical presentations, a poster session, and special sessions with invited talks on “**Sailing for space and terrestrial sustainability**”.

We invite you to contribute to the technical program and prepare an abstract for an oral and/or poster contribution. **Abstract submission will open on the [ISSS 2025 website](#) on 25 November 2024.** Note that, though papers are welcomed, submission of a paper is **not** mandatory to present at ISSS 2025.

Important dates

25 Nov 2024	Abstract submission open
07 Feb 2025	Abstract deadline
28 Feb 2025	Author notification & Registration open

I sincerely hope you will join us at the symposium. If you have any questions regarding the symposium, feel free to contact me at ISSS2025@tudelft.nl. I look forward to welcoming you in Delft in the summer of 2025!

Yours sincerely,

Jeannette Heiligers
