Reports

Similarity Reports provide an overall similarity index for each submission. This index determines the percentage of similarity between a submission and information existing in the iThenticate databases selected as search targets.

Name Promovendum		Documents		page 1 of 1
Title	Report	Author	Processed	
Plagiarism test file 1 part - 127 words	98%	Name Promovendum	April 22, 2015 1:19:44 PM CEST	page 1 of 1

Clicking on the similarity index icon opens up the Similarity Report. The Similarity Report is separated into three main areas in the default view. These three areas are:

- **paper information** - the top of the report page shows information about the submitted paper. This includes the paper title, the date the report was processed, the word count, the folder the document was submitted from and the number of matching documents found in the selected databases
- **paper text** - the text of the submitted paper. Matching text is highlighted in a color that corresponds to the matching source listed on the right side of the Similarity Report
- **matching sources** - the list of matching sources for the highlighted areas within the paper text

The Document Viewer (DV) provides a document's original format, including images, tables and graphs, within the Similarity Report.

The screenshot shows the iThenticate interface with three main sections circled in red: 'Paper information' (top), 'Paper text' (middle), and 'Matching sources' (right).
