Nursing and care homes allow visitors

Hospitality and entertainment sector open again

All restrictions are lifted for people who are immune

All restrictions lifted in northern provinces Friesland, Groningen and Drenthe

"By making a distinction between people who are immune and people who may still be infected or who are already infected, you create a very strange divide between two groups in the population. The same with all restrictions lifted in Friesland, Groningen and Drenthe. It's either the whole of the Netherlands without restrictions, or not."

How much weight has to be given on advice of citizens and of scientists in decisions to relax corona measures?

The study was conducted in collaboration with researchers from other universities and the National Institute for Public Health and the Environment (RIVM). Policy staff from the Ministry of Health, Welfare and Sport and the Ministry of Finance were also closely involved.

The data collection was financed by the TU Delft COVID-19 Response Fund.
