Instructions for the assessment committee:

Complete all yellow cells (will turn light blue)
 Complete the grades for all 21 subcriteria (integers between 1 and 10), based on the description in the grading guide (see tab 2, or tab 3 for a brief version).
 In case of subgrades <5, choose grade 1–4 based upon the severity of the deficiencies and add a justification.

 Students can only graduate if the grades for assessment criteria A–E are all 5.0 or higher, and if their weighted average is 5.75 or higher.
 For criteria A–E, add relevant background information on the process (A–D) and presentation (E) that influenced the grading. The justification of the grading should be clear for outsiders who only read this grading sheet and the thesis.

4) Print or save this grading sheet as a pdf file and send it to the student and os-citg@tudelft.nl (ESA CEG). ESA CEG will archive this grading sheet and enter the grade in Osiris.

Plagiarism manual and all graduation related forms: https://www.tudelft.nl/en/student/ceg-student-portal/education/master/forms-master

Please send this form (pdf) to the secretariat of Education and Student Affairs: OS-CITG@tudelft.nl

Additional remarks

Average:

Applicable to the MSc Civil Engineering degree prog			gramme	1
Assessment Criteria	%	Sub-criteria	<5*	5
		Theoretical profundity	Insufficiently reproduced and applied some directly relevant theory at the level of MSc	Almost reproduced and applied some di
		State of the art description and literature study, identified research gap or design assignment	textbooks Insufficiently related thesis work to existing literature, research gap or design assignment fully suggested by supervisor	Related thesis work to existing literatu research gap or design assignment for bi part suggested by supervisors
A. Scientific approach	25%	assignment Research/design methodology choice & execution	Followed methodology suggested by the supervisor without providing own input, demonstrated insufficient understanding; Was insufficiently able to execute the prescribed methodology	Followed methodology suggested by supervisor without providing own inp demonstrated almost sufficient understa Almost executed the prescribed method
		Scientific argumentation	Most statements have <u>no</u> argumentation	Most statements have minimal argumen
		Critical attitude and judgement, (societal) impact	Showed far too limited critical attitude and judgement towards own results and their (societal) impact	Showed too limited critical attitude an judgement towards own results and th (societal) impact
		Creativity: new ideas	Made too little contribution to the project, and it is not original	Made almost sufficient contribution to project, but it is not really original
		Experimental/modelling/ design skills	Presented insufficient experimental/modelling/design skills	Presented almost sufficient experimental/modelling/design skill
B. Quality of	20%	Use/verification/validation of	Insufficiently verified, validated, and used provided methods/data/knowledge,	Verified, validated, and used provide methods/data/knowledge,
result/product	20 /0	methods/data/knowledge	or did <u>not</u> consider their limitations	but did <u>not</u> describe some important limi
	Utilisation (answering research/design question	• •	Research/design question insufficiently answered by results/products, project owner can hardly utilise	Research/design question partially answer results/products,
		research/design question)	results/products, even after large improvements	project owner can almost utilise half o results/products after large improvem
		Project management & efficiency	Insufficient initial project planning; Did not meet deadlines; Could insufficiently adjust scope upon request, even with ample help; Insufficient work done within the available time	Almost sufficient initial project planni Almost met main deadlines; If necessary, adjusted scope of project request with help; Almost did what was needed within t available time
C. Behavioural	20%	Communication Independence	Communicated insufficiently about the project or required resources	Communicated almost adequately about updates and required resources wit supervisors
competencies			Needed too much guidance and supervision; If needed, did not ask for help	Needed a little too much regular guidan supervision; If needed, frequently asked for help late/early
		Feedback processing	Processed feedback insufficiently after being instructed to do so, did not extrapolate the feedback to other areas of thesis work	Processed feedback after being instructe so, <u>but did not</u> extrapolate the feedbac other areas of thesis work
		Quality of abstract	Essence of work insufficiently captured	Essence of work almost captured
		Structure and consistency	Structure, text flow and presentation insufficiently logical, inconsistent, and implicit; Division of main & side issues over appendices and main text illogical	Structure, text flow and presentation pa logical but inconsistent or implicit; Division of main & side issues over appe and main text unbalanced
D. Quality of written report	20%	Writing style and language	Insufficiently concise, clear, and unprofessional; Too many language errors that get in the way of understanding	
		Quality of layout, (technical) drawings, and figures	Layout, (technical) drawings, and figures are insufficiently supporting the written text	Layout, (technical) drawings, and figure almost adequately supporting the writte
		Referencing	Sources are insufficiently acknowledged and are incomplete	e Sources are acknowledged but are not complete
		Speaker quality	Difficult to follow, no enthusiasm, insecure	Usually possible to follow with a little en lacks enthusiasm, quite insecure
E. Quality of oral presentation and	15%	Clarity and structure of presentation	Insufficiently clear presentation	Presentation made the subject, project main results almost clear
defence		Quality of presentation material	Presentation material insufficiently supporting the story	Presentation material almost adequat supporting the story
		Answering of questions	Insufficiently answered basic questions	Had difficulties answering basic questior reasonable way

* In case of sub-criteria <5, choose a grade of 1–4 based upon the severity of deficiencies, and add a justification in the grading sheet.

Description of criteria and sub-criteria of the Guide for determining Master Thesis grading (2024)

%	Sub-criteria	Description	
	A. Scientific approach	Profundity of your research	
	Theoretical profundity	To what extent you reproduced and applied all directly and indirectly relevant theory at the level of MSc textbooks, and most directly relevant scientific literature.	
	State of the art description and literature study, identified research gap or design assignment	To what extent you clearly positioned the thesis work to the current state of the art, and performed a thorough literature study.	
25%	Research/design methodology choice & execution	To what extent you yourself selected and defined the problem formulation, research/design plan, followed method, and approach; and to what extent you excellently executed the research/design plan.	
	Scientific argumentation	To what extent all of your statements have good argumentation, using state-of-the art literature.	
	Critical attitude and judgement, (societal) impact	To what extent you have showed a critical attitude and judgement towards your own results, literature, and specialists.	

	B. Quality of result/product	Quality of your results (research or design)
	Creativity: new ideas	To what extent you have made several significant and original contributions to the project (not initiated or thought of by your supervisor).
20%	Experimental/modelling/ design skills	To what extent you presented experimental/modelling skills that are at master level.
2070	Use/verification/validation of methods/data/knowledge	To what extent you have verified, validated and used existing or newly generated methods/data/knowledge, and took all limitations into account.
	Utilisation (answering research/design question)	To what extent your research or design question is fully answered by the results or products, and if these results or products can be utilised by the project owner as is.

	C. Behavioural competencies	Project management and communication skills, and independence
	Project management & efficiency	The quality of your initial project planning; To what extent you have met all deadlines; If necessary, to what extent you have adjusted the scope of your project on your own initiative, in time, and to what extent you needed help with that; How much work you got done within the available time (28 hours per EC).
20%	Communication	To what extent you communicated effectively about project updates and resources that you required, with supervisors and other experts
20%	Independence	To what extent you needed guidance and steering; To what extent you asked for help in time, if needed
	Feedback processing	To what extent you processed feedback in a critical manner, and extrapolated feedback to other areas of thesis work

D. (Quality of written presentation	Quality of your final report

	Quality of abstract	To what extent you have captured the essence of your work in a concise and clear abstract.
	Structure and consistency	To what extent your structure, text flow and presentation are logical, explicit and consistent; To what extent the division of main & side issues over your appendices and main text is balanced and of publishable quality.
20%	Writing style and language	To what extent your writing style and language is concise, clear and professional; and to what extent there are language errors or typos that are noticeable and get in the way of understanding.
	Quality of layout, (technical) drawings, and figures	To what extent your layout, (technical) drawings and figures are supporting the written tekst.
	Referencing	To what extent your sources are acknowledged in a clear, consistent and conscientious manner.

E. Quality of oral presentation and defence Quality of your final presentation

	Speaker quality	To what extent your presentation is easy to follow, enthusiastic, and persuasive.
150/	Clarity and structure of presentation	To what extent your presentation made the subject, project and main results of your project clear in a structured way.
15%	15% Quality of presentation material To what extent your presentation material is attractive, supporting the story and its intelligibility.	To what extent your presentation material is attractive, supporting the story and its intelligibility.
	Answering of questions	How well you answer questions of on your final presentation in depth and to the point, and provide your audience with new insight.

EXAMPLE

Master Thesis grading sheet Civil Engineering (February 2024 v2.0)

fUDelft

Student name:	Test Student	Assessment committee (chair):
Student number:	1234567	Me The Chair
Date:	09 February 2024	Assessment committee (other members):
MSc programme:	CIE	Myself The Committee Member
Track:	Water Management	I The Committee Member
	Title Master thesis:	Just Me, Myself and I
Did the assess	ment committee check the plagiarism scan of the final report for fraud?	Yes. The committee does not have any suspicions for fraud.

Please send this form (pdf) to the secretariat of Education and Student Affairs: OS-CITG@tudelft.nl

25%	A. Scientific approach	6.4	Justification / background information
	Theoretical profundity	7	The judgement was only focussed on own work, and not related to what othe authors wrote on the topic.
Scientific approach	State of the art description and literature study, identified research gap or design assignment	6	
	Research/design methodology choice & execution	8	
	Scientific argumentation	7	
A. S	Critical attitude and judgement, (societal) impact	4	

20%	B. Quality of result/product	5.0	Justification / background information
	Creativity: new ideas	7	
ty of oduct	Experimental/modelling/ design skills	5	
Quality of ult/product	Use/verification/validation of methods/data/knowledge	3	The product was useable up to some extent, but since the quality of the work was low, we basically need a student to redo the project.
B. resi	Utilisation (answering research/design question)	5	

20%	C. Behavioural competencies	5.8	Justification / background information
	Project management & efficiency	2	
vioural encies	Communication	10	The student took too much time to finish the project. The student
ehav	Independence		communicated about this very well and in a timely manner, and worked independently. The student did not process feedback on their own initiative.
C. Be com	Feedback processing	3	

20%	D. Quality of written presentation	5.6	Justification / background information
	Quality of abstract	6	Many references were only added after explicit comments from the superviso The writing style is quite informal, in spite of this having been pointed out a couple of times to the student. The student needed help to create the
written tion	Structure and consistency	6	
of v Itati	Writing style and language	5	
Quality preser	Quality of layout, (technical) drawings, and figures	5	structure.
ġ	Referencing	6	

15%	E. Quality of oral presentation and defence	8.5	Justification / background information
는 고	Speaker quality	8	
of ora ion an	Clarity and structure of presentation	9	Student presented very enthusiastically and managed to convey the message
E. Quality of oral presentation and defence	Quality of presentation material	8	both to the lay audience as well as the expert audience. Answered the questions - even ones outside the scope of the project - very proficiently.
E. Q pres	Answering of questions	9	

Additional remarks

Student could have achieved a lot more, if they had spent more time on the project. The presentation was very high quality and demonstrated the potential of the student.

Thesis grade	6.0
