# Paragraph 1 - General

## Article 1 - Applicability of the regulations

1. These regulations including the programme-specific Annexes to this TER, apply to the teaching and the examinations of:
  - » the Master degree programme in Civil Engineering (CIE)
  - » the Master degree programme in Environmental Engineering (ENV)
  - » the Master degree programme in Applied Earth Sciences (AES)
  - » the Interfaculty 4TU Master degree programme Construction Management and Engineering (CME)
  - » the Interfaculty Master Degree programme Transport, Infrastructure and Logistics (TIL)

hereinafter referred to as 'the programme' or 'programmes'.

These regulations also apply to the bridging programmes of the aforementioned programme(s).

2. For AES, CIE and ENV, the programme is provided under the responsibility of the faculty of Civil Engineering and Geosciences of Delft University of Technology, hereinafter referred to as the 'faculty'.  
For CME, the programme is provided under the responsibility of the faculty of Civil Engineering and Geosciences, the faculty of Architecture & the Built Environment, and the faculty of Technology, Policy & Management.  
For TIL, The programme is provided under the responsibility of the faculty of Civil Engineering and Geosciences, the faculty of Mechanical, Maritime and Materials Engineering, and the faculty of Technology, Policy & Management.

## Article 2 - Concepts

1. The following concepts apply in this Regulation:
  - a. act: the Higher Education and Scientific Research Act (abbreviated to WHW), Bulletin of Acts and Decrees 593 and any amendments since its introduction.
  - b. assessment: the process of testing, and making a judgment of the student's knowledge, insight and skills with regard to a course;
  - c. bridging programme: a deficiency programme aimed at moving up to a Master's degree programme, as stipulated in Article 7.30e or Article 7.57i of the Act;
  - d. course/module: a unit of study within the programme, as stipulated in Article 7.3, Sections 2 and 3 of the Act, with which an examination is associated;
  - e. credit: credit in accordance with the European Credit Transfer System (ECTS); one credit equals a study load of 28 hours;
  - f. degree audit: An assessment by the Board of Examiners whereby it is determined, in accordance with Section 7.10 of the Act, whether all examinations in the subjects of the degree programme have been successfully completed;
  - g. examiner: the individual who, in line with Article 7.12, Subsection 3 of the Act, has been appointed by the Board of Examiners. Examiners are responsible for administering exams and determining the results.
  - h. examination: investigation of the student's knowledge, insight and skills with regard to a course, along with the assessment of that investigation. An examination can also consist of partial examinations;
  - i. first academic year: the first period in the programme with a study load of 60 credits, as specified in Article 7.8b Section 8 of the Act;
  - j. Osiris: the education information system;
  - k. practical exercise: course or component of a course aimed at the acquisition of particular skills. The following can be understood as practical exercises:
    - writing a thesis,
    - conducting a project or experimental design,
    - carrying out a project or a design/research assignment,
    - completing an internship,
    - participating in field work or an excursion,
    - conducting tests and experiments, or
    - participating in other educational activities that are considered essential and that are aimed at acquiring particular skills;
  - l. programme: the Master's degree programme, as stipulated in Article 7.3a, Section 1 in the Act;
  - m. student: a person enrolled at Delft University of Technology in order to receive education and take the examinations and the degree audit in the degree programme;
  - n. study guide: the digital guide for the degree programme containing specific information on the courses included in the degree programme ([www.studiegids.tudelft.nl](http://www.studiegids.tudelft.nl));
  - o. track: major, as stipulated in Article 7.13, Section 2, Subsection b of the Act;
  - p. working day: Monday through Friday, with the exception of recognised holidays and the collective closure days;
2. The other concepts in these regulations are used in the sense in which they appear in the Act.

3. In these regulations, the term 'examination' also refers to 'partial examination', with the exception of Article 19, Section 1, first two complete sentences and Article 22 paragraph 1.
4. A written or oral examination may also be taken digitally and/or online. In these regulations the term examination is also taken to mean a digital and/or online examination, unless stated otherwise in these regulations.

## Paragraph 2 - Admission and prior education

### Article 3 - Admission to the Master's degree programme

1. Individuals holding one of the following degrees have access to the education of the Master's degree programme in Applied Earth Sciences (under a) or Civil Engineering (under b) or Environmental Engineering (under c) or Construction Management and Engineering (under d) or Transport, Infrastructure and Logistics (under e) on the condition that all of the stated requirements have been met.

#### **a. Specific University Bachelor's degree**

##### a - Applied Earth Sciences:

- » Bachelor degree Applied Earth Sciences / "Technische Aardwetenschappen" from Delft University of Technology;
- » Bachelor degree Aerospace Engineering from Delft University of Technology;
- » Bachelor degree Civil Engineering from Delft University of Technology;
- » Bachelor degree Electrical Engineering from Delft University of Technology;
- » Bachelor degree "Maritieme Techniek" from Delft University of Technology;
- » Bachelor degree "Technische Natuurkunde" from Delft University of Technology;
- » Bachelor degree "Werktuigbouwkunde" from Delft University of Technology.

##### b - Civil Engineering:

- » Bachelor degree Civil Engineering from Delft University of Technology or Bachelor degree Civil Engineering from University of Twente.

##### c - Environmental Engineering:

- » Bachelor degree Civil Engineering from Delft University of Technology or University of Twente;
- » Bachelor degree Applied Physics from Delft University of Technology;
- » Bachelor degree Aerospace Engineering from Delft University of Technology;
- » Bachelor degree "Maritieme Techniek" from Delft University of Technology;
- » Bachelor degree "Werktuigbouwkunde" from Delft University of Technology;
- » Bachelor degree Nanobiology from Delft University of Technology.

##### d - Construction Management and Engineering:

- » Bachelor degree Architecture, Urbanism and Building Sciences / "Bouwkunde" from Delft University of Technology or from Eindhoven University of Technology;
- » Bachelor degree Civil Engineering / "Civiele Techniek" from Delft University of Technology or University of Twente;
- » Bachelor degree Systems Engineering, Policy Analysis and Management / "Technische Bestuurskunde" from Delft University of Technology;
- » Bachelor degree Industrial Engineering & Management from University of Twente;
- » Bachelor degree Industrial Engineering from Eindhoven University of Technology;
- » Bachelor degree in Sustainable Innovation from Eindhoven University of Technology.

##### e - Transport, Infrastructure and Logistics:

- » Bachelor degree "Civiele Techniek" from Delft University of Technology or University of Twente
- » Bachelor degree Electrical Engineering from Delft University of Technology, Eindhoven University of Technology or University of Twente;
- » Bachelor degree "Luchtvaart- en Ruimtevaarttechniek" from Delft University of Technology;
- » Bachelor degree "Maritieme Techniek" from Delft University of Technology;
- » Bachelor degree "Technische Bestuurskunde" from Delft University of Technology;
- » Bachelor degree "Technische Informatica" from Delft University of Technology, Eindhoven University of Technology or University of Twente;
- » Bachelor degree "Technische Natuurkunde" from Delft University of Technology, Eindhoven University of Technology, University of Twente or University of Groningen;
- » Bachelor degree "Technische Wiskunde" from Delft University of Technology, Eindhoven University of Technology, University of Twente or University of Groningen;

- » Bachelor degree “Werktuigbouwkunde” from Delft University of Technology, Eindhoven University of Technology or University of Twente;
- » Bachelor degree “Econometrie en Operationele Research” at Erasmus University Rotterdam, University of Amsterdam, VU Amsterdam, University of Groningen, Tilburg University or Maastricht University;
- » Bachelor degree “Technische Bedrijfskunde” at Eindhoven University of Technology, University of Twente or University of Groningen.

Depending on the Bachelor degree, certain bridging courses are mandatory, according to the programme-specific Annexes to this TER.

2. Students who do not possess the degree mentioned in Section 1 are required to obtain proof of admission to the programme from the Dean, who will seek the advice of the admission committee on this matter.

**a. Other university Bachelor degree (not including those listed in Section 1)**

The following applies to this category: successful completion of the stated bridging programme for admission to the Master degree programme:

Civil Engineering and Applied Earth Sciences and Environmental Engineering:

- » University Bachelor degree. Bridging programme to be followed: to be specified by the Director of Studies upon application

Construction Management and Engineering:

- » University Bachelor degree: students who do not possess any of the degrees mentioned in Section 1 may be eligible for, and should therefore seek advice on, a Bridging minor or custom bridging programme, as stipulated in the programme-specific Annex to this TER.

Transport, Infrastructure and Logistics:

A university Bachelor degree at Delft University of Technology or equivalent in:

- » “Bouwkunde” (also at Eindhoven University of Technology);
- » “Industrieel Ontwerpen” (also at University of Twente);

or a university Bachelor degree in:

- » “Landschapsarchitectuur en Ruimtelijke Planning” at Wageningen University,
- » “Technische Planologie” at University of Groningen,
- » “Sociale Geografie en Planologie” at University of Amsterdam, Utrecht University or University of Groningen gives admission to the Master’s degree programme, in which a convergence programme has to be completed.

This convergence programme will be part of the Master’s degree programme in Transport, Infrastructure and Logistics and consists of convergence courses stated in the programme-specific Annex to this TER.

Bridging programme to be followed:

Individuals who have received foreign education prior to the earned bachelor’s degree at a Dutch institution, must meet the requirements of satisfactory linguistic mastery of Dutch, as stated in the appendix, before one can participate in a Dutch-language bridging programme. The foregoing requirement does not apply to pre-switchers who were registered in the academic year 2021-2022, with uninterrupted enrolment for the academic years 2022-2023, 2024-2025 and 2024-2025.

**b. Higher professional education degree**

The following applies to this category: Successful completion of the stated bridging programme for admission to the Master’s degree programme and, if applicable, the language requirement.

Civil Engineering and Applied Earth Sciences and Environmental Engineering:

Bridging programme to be followed: Transitional programme for students with a Dutch higher vocational institute Bachelor degree (“HBO”) as stipulated in the programme-specific Annex to this TER.

Construction Management Engineering:

Bridging programme to be followed: Transitional programme for students with a Dutch higher vocational institute Bachelor degree (“HBO”) as stipulated in the programme-specific Annex to this TER.

Transport, Infrastructure and Logistics:

A relevant higher professional education degree gives admission to the programme only after successful completion of the bridging programme stated in the programme-specific Annex to this TER and, if applicable, the language requirement.

Bridging programme to be followed:

Individuals who have received foreign education prior to the earned higher professional education degree, must meet the requirements of satisfactory linguistic mastery of Dutch, as stated in the appendix, before one can participate in a Dutch-language bridging programme. The foregoing requirement does not apply to pre-switchers who were registered in the academic year 2021-2022, with uninterrupted enrolment for the academic years 2022-2023, 2024-2025 and 2024-2025.

### **c. Foreign degree**

This category is subject to the general selection requirements of Delft University of Technology with regard to prior foreign education, based on a Cumulative Grade Point Average of at least 75% of the maximum number of points that could be earned, included in the table of countries (see website) and meeting the requirements for satisfactory linguistic mastery of English, as stated in the appendix to article 3.

3. The following qualitative admission requirements also apply:  
Access to the education of the Master's degree programme in Applied Earth Sciences, Civil Engineering, Environmental Engineering, Construction Management and Engineering or Transport, Infrastructure and Logistics is open to individuals who have demonstrated to the admissions committee that they possess knowledge, insight and skills at the level of the Bachelor's degree mentioned Subsections 1a, or of a university Bachelor's degree, in addition to the further requirements mentioned in Subsections 2a and 2b.

### **Article 4 - University entrance examination**

Not applicable.

# Paragraph 3 - Content and composition of the programme

### **Article 5 - Goal of the programme**

1. The programme is intended to educate students to earn a Master of Science degree in Applied Earth Sciences (AES), Civil Engineering (CE), Environmental Engineering (ENV), Construction Management and Engineering (CME) or Transport, Infrastructure and Logistics (TIL), providing them with such a level of knowledge, insight and skills in the area of the above mentioned programmes, that graduates can fulfil positions on the labour market at the Master's level.
2. The Intended Learning Outcomes of the different programmes are outlined in the programme-specific Annexes to this TER.

### **Article 6 - Track**

1. The Master degree programme in Civil Engineering has the following tracks, with the stated content in the programme-specific Annex to this TER:
  - » Construction Materials (CM)
  - » Structural Engineering (SE)
  - » Hydraulic Engineering (HE)
  - » Hydraulic and Offshore Structures (HOS)
  - » Geotechnical Engineering (GE)
  - » Traffic and Transport Engineering (TTE)
2. The Master degree programme in Applied Earth Sciences has no tracks.
3. The Master Degree Programme Environmental Engineering has the following tracks, with the stated content in the annex to this TER:
  - » Water Resources Engineering (WRE)
  - » Atmospheric Environmental Engineering (AEE)
  - » Resource and Waste Engineering (R&WE)
4. The Master Degree Programme Construction Management and Engineering has no tracks.
5. The Master Degree Programme Transport, Infrastructure and Logistics has no tracks.

### **Article 7 - Composition of the programme and degree audits**

1. The degree programme consists of at least 120 credits. The degree audit is a final assessment by the Board of Examiners whereby it is determined, in accordance with Section 7.10 of the Act, whether all examinations in the subjects of the degree programme have been successfully completed.

2. Following approval from the two Boards of Examiners concerned, a student may take an individual double degree programme in which two Master's programmes are combined simultaneously to create a programme of at least 180 credits. Upon completion the student is awarded two Master's diplomas. The student must earn at least 60 unique credits for each Master's degree programme.
3. A course that was part of the Bachelor's degree programme that qualified a student for admission to the Master's degree programme may not be included in the Master's degree programme. If a compulsory component has already been completed in the aforementioned Bachelor's degree programme, the Board of Examiners will designate an alternative course. If an elective course of the degree programme has already been completed in the aforementioned Bachelor's degree programme, the student will select an alternative elective course.
4. The degree programme and its courses are described in the programme-specific Annexes to this TER, including the study load, number of contact hours and form of examination of each course, as well as the programming of the examination and the language.
5. The actual design of the educational programme is elaborated in greater detail in the [study guide](#).

## Article 8 - Form of the programme

The programme is offered exclusively as full-time.

## Article 9 - Language

The education is in English, and the examinations are administered in English.

## Article 10 - Honours Programme

1. Based on the criteria referred to in the Honours Programme, students will be selected and admitted to the Master's [Honours Programme](#) by the Honours Committee established by the Director of Studies.
2. The Master's Honours Programme comprises at least [20 credits](#).
  - a. At least five credits must be completed in the institution-wide component of the Master's Honours Programme and
  - b. At least 15 credits must be completed in the faculty component of the Master's Honours Programme, the composition of which (including its content and options) is described in the Honours Programme.
3. All students selected for participation in the [Honours Programme](#) must submit their options for approval to the Honours Coordinator.
4. The Board of Examiners will be responsible for assessing whether all the requirements of the Honours Programme have been met.
5. Any student who has successfully completed the Honours Programme will be awarded a certificate signed by the chair of the Board of Examiners and the Rector Magnificus.

## Article 11 - (Compulsory) participation in the programme

1. All students are expected to participate actively in the programme for which they are registered.
2. If necessary, there will be an obligation to participate in practical exercises, with a view to admission to the related examination. The [Board of Examiners](#) may grant an exemption from this obligation, with or without imposing a substitute requirement.
3. Any supplementary obligations are described by component in the course description in the [study guide](#).

## Article 12 - Programme evaluation

1. The Director of Studies is responsible for the evaluation of the education.
2. The manner in which the education in the programme is evaluated is documented in the faculty's Quality Assurance Manual, which is submitted to the [Faculty Student Council](#) and the [Board of Studies](#).
3. The Director of Studies informs the Board of Studies concerning the outcomes of the evaluation, the intended adjustments based on these outcomes and the effects of the actual adjustments.

# Paragraph 4 - Registration for courses and examinations

## Article 12a - Compulsory registration for courses

Not applicable

## Article 12b - Withdrawal from a course

Not applicable

## Article 13 - Registration for written examinations

1. Registration to participate in a written examination, including a written examination that is taken online, remotely from the university, is compulsory and is done by entering the requested data into the education information system Osiris no later than 14 calendar days before the examination. Students receive examination tickets by email as confirmation of their registration. Contrary to this, a registration period of six calendar days applies to resits in the summer resit period. The student will receive an exam ticket by email as confirmation.
2. Students may submit a request to register for an examination after the deadline mentioned in subsection 1 has passed but no later than 6 calendar days before the examination in question, in the education information system Osiris by being placed on a waiting list. The request will be honoured providing that places are available in the room or rooms where the examination is scheduled to take place. The student will receive an exam ticket by email as confirmation.
3. In the event of circumstances beyond a student's control resulting in the student being unable to register for an examination, the Board of Examiners may nevertheless permit the student to participate in the examination.
4. Students who have not registered for the examination and are therefore not included on the list of examinees can report on the day of the examination to the invigilator beginning 15 minutes before the start of the examination until the actual start. They will be admitted to the examination room, in the order that they reported to the invigilator, 30 minutes after the start of the examination, if sufficient places are available. The loss of 30 minutes of examination time cannot be compensated. Students who have been granted late access to the examination will be added to the list of examinees. The student participates in the examination subject to the validation of entitlement to participate in the examination.
5. In the situation described in the previous section, if it is found that a student was not entitled to participate in the examination, the examination work will be deemed invalid, it will not be marked and it will not count towards a result. The student may subsequently submit an appeal to the Board of Examiners, accompanied by reasons, requesting that the examination work that has been deemed invalid be declared valid and to have it assessed. The Board of Examiners will approve the request only in case of extenuating circumstances.
6. Sections 2 and 4 of this article do not apply to a written examination that is taken online, remotely from the university.
7. If unforeseen circumstances or measures make it necessary to change the form or manner of taking the examination, the Board of Examiners may determine a different registration period in favour of the student.

## Article 14 - Registration for other examinations

1. Registration for participation in an examination other than a written examination, for which registration is open, is compulsory. This is possible up to 14 calendar days before the examination takes place in the manner that is stated in the study guide for the relevant examination.  
If unforeseen circumstances or measures make it necessary to change the form or manner of taking the examination, the provisions stated in the study guide apply in full unless the Dean decides to deviate from the manner or term of registration prescribed in the study guide.
2. In special cases, the Board of Examiners may deviate from the registration term stated in Section 1, but only in favour of the student.
3. Students who have not registered on time will not be allowed to participate in the examination. The Board of Examiners can nevertheless admit a student to the examination, but only in case of special circumstances.
4. In the event of unauthorised participation in an examination, the Board of Examiners may declare the result invalid.

### Article 15 - Withdrawal from examinations

1. Students can withdraw from an examination through the education information system Osiris up to three calendar days before the examination.
2. Any student who has withdrawn from an examination should re-register on a subsequent occasion, in accordance with the provisions of Articles 13 and 14.

## Paragraph 5 - Examinations

### Article 16 - Form of the examinations and the manner of testing in general

1. Examinations (oral, written or otherwise) are taken in the manner described in the appendix. In the event of unforeseen circumstances or measures, the Board of Examiners may determine that the manner prescribed may be deviated from. If an examination is taken using online proctoring, this takes place in accordance with the TU Delft Online Proctored Examination Regulation.
2. The study guide contains a description of the moments at which and the numbers of times that examinations can be taken, along with their frequency, without prejudice to the provisions of these regulations concerning written and oral examinations, as described in Article 17.
3. A student may participate in an examination for a course no more than twice in one academic year, with the understanding that registration for an examination without timely withdrawal counts as participation.
4. In special cases, the Board of Examiners may deviate from the provisions of the above sections 1 to 3 in favour of the student.
5. At least 15 working days before a written examination, the examiner will give the students the opportunity to familiarise themselves with representative sample questions and the criteria by which they will be assessed. The teacher or examiner will provide accompanying guidelines for the way in which the sample questions are answered.

### Article 17 - Times and number of examinations

1. Two opportunities to take written examinations will be offered each academic year. The previous provision applies equally to assessments other than written examinations, unless this cannot be reasonably demanded of the programme. In those cases a different option will be provided, if at all possible. Participation in this may -within the limits of proportionality- be subject to additional requirements. The times in which the examinations can be taken are:
  - » at the end of the teaching period in which the course is taught, and
  - » in the fifth week or at the end of the next teaching period or during the summer resit period according to the TU Delft academic calendar.
2. An annual timetable is issued detailing when examinations may be taken, and it is published before the start of the relevant teaching period.
3. Contrary to the provisions in Section 1, the opportunity to take the examination for a course that is not taught in a certain academic year must be given at least once in that year.
4. Contrary to the provisions of Section 1, two opportunities to sit an examination will be offered for discontinued courses in the academic year following the year in which the course was last taught. Both opportunities are in the academic year following the one in which the course was last taught.
5. In exceptional cases, the Board of Examiners may permit more than two opportunities in a year for certain examinations.

### Article 18 - Oral examinations

1. For oral examinations, no more than one student shall be tested at a time, unless determined otherwise by the Board of Examiners.
2. Oral examinations shall not be public, unless the Board of Examiners has decided otherwise. In deviation from this, a final presentation is given publicly except in special cases in which the Board of Examiners has decided otherwise, whether or not at the request of the student.

3. The oral examination is administered by at least two examiners. In the event of unforeseen circumstances or measures, the Board of Examiners may determine that the oral examination be administered by a single examiner, in which case - provided the student consents - an audio and/or video recording of the oral examination will be made.

## Article 19 - Determination and announcement of results

1. The examiner determines the result of a written examination as quickly as possible but by no later than 15 working days after the examination. The results of written partial examinations shall be announced no later than five working days before the next written partial examination.
2. The examiner determines the result of an oral examination as quickly as possible but no later than 15 working days after it is administered. The student will be notified with a written statement (e.g. e-mail) of this result.
3. The examiner records the results of the assessment of a practical exercise as quickly as possible, but no later than 15 working days after the completion of the practical exercise at the designated time (deadline). In the education information system Osiris, the result will be dated on the date of completion of the practical exercise. With regard to a series of practical exercises in which the knowledge acquired in a previous practical exercise is important to the subsequent practical exercise, the result of the previous practical exercise shall be announced before the subsequent practical exercise. If this is not possible, the examiner shall schedule a timely discussion of the previous practical exercise.
4. The examiner is responsible for the registration and publication of the results in the education information system Osiris, with observance of the student's privacy. When the result of an examination is announced, the student is informed about the right of perusal as stipulated in Article 20 as well as about the possibility of appealing to the Examinations Appeals Board.
5. Contrary to the previous provisions, results for examinations administered in the last regular examination period, as well as for resits from the BSc taken during the resit period, shall be determined, registered and published by no later than the Friday following the final week of this examination period.

If special circumstances prevent the examiner from registering the results on time, the examiner will report this to the Board of Examiners, accompanied by reasons, and notify the director of studies, the students and student administration as quickly as possible and at least before the passing of the 15 working days deadline.

## Article 20 - Right to inspect results

1. Upon request, students will have the right to inspect their assessed work during a period of at least 20 working days after the registration of the results of a written examination or the assessment of a practical exercise in the education information system Osiris. During the inspection of the assessed work, it is not permitted to copy the underlying examination questions in any way. Students intending to appeal against the assessment of their work will be issued with a copy of the assessed work.
2. During the period mentioned in Section 1, all students who have participated in the examination can become acquainted with the questions and assignments of the relevant examination, as well as with the standards that form the basis of the assessment.
3. The examiner can determine that the inspection or cognizance intended in Sections 1 and 2 will take place at a pre-established place and at a pre-established time.
4. Students proving that they were unable to appear at such an established place and time because of circumstances outside of their control will be offered another possibility, if possible within the period mentioned in Section 1. The place and times mentioned in the first sentence will be made known in good time.

## Article 21 - Discussion of the results of examinations

1. Students who have taken a written examination or who have received the assessment of a practical exercise can ask the relevant examiner for a discussion of the results during a period of 20 working days after the announcement of the results. The discussion will take place within a reasonable period, at a place and time to be determined by the examiner.
2. At the request of the student or at the initiative of the examiner, a discussion justifying the assessment will take place between the examiner and the student as soon as possible after the announcement of the result of an oral examination. During the discussion of the assessed work it is not permitted to copy the underlying examination questions in any way.
3. If a collective discussion is organised by the examiner, students may submit requests as referred to in section 1 only if they have been present at the collective discussion and have motivated their requests, or if they were unable to be present at the collective discussion because of circumstances outside their control.
4. The Board of Examiners may allow deviation from the provisions in Sections 2 and 3.

## Article 22 - Period of validity for examinations

1. The period of validity of the results of an examination is indefinite. The Dean can restrict the period of validity of a successfully completed examination only if the knowledge or insight that was examined has become outdated or if the skills that were examined have become outdated.
2. In cases involving a limited period of validity based on the first section, the period of validity shall be extended at least by the duration of the acknowledged delay in studies, based on the TU Delft Profiling Fund Scheme.
3. In individual cases involving special circumstances, the Board of Examiners can extend periods of validity that have been limited based on the first section or further extend periods of validity that have been extended based on the second section.
4. If a course consists of partial examinations, the period of validity of the partial examination for which no credits are assigned shall be restricted to a time period stated in the study guide.

## Article 23 - Exemption from an examination or obligation to participate in a practical exercise

1. After having obtained recommendations from the relevant examiner, the Board of Examiners may grant exemptions to students:
  - a. who have successfully completed an examination or degree audit in a system of higher education within or outside the Netherlands that corresponds to the examination for which the exemption has been requested in terms of content and level, or
  - b. who demonstrate that they possess sufficient knowledge and skills that have been acquired outside the system of higher education.
2. After having obtained recommendations from the relevant examiner, the Board of Examiners may grant exemption from the requirement to participate in a practical exercise with a view to admission to the related examination, possibly subject to alternative requirements.

## Article 24 - Periods and frequency of degree audits

In principle, the Master's degree audit will be carried out once each month by the Board of Examiners. The dates for the meetings of the Board of Examiners shall be published before the beginning of the academic year.

## Article 24a - Invalidation of examination

The **Board of Examiners** is authorised to declare an examination or part thereof invalid if a proper assessment of the knowledge, insight and skills of the student has not proved reasonably possible based on the examination or the part thereof. The Board of Examiners may draw up further rules for this.

# Paragraph 6 - Studying with a support need

## Article 25 - Adjustments to the benefit of students with a support need

1. Students with a support need means students who are held back due to a functional limitation, disability, chronic illness, psychological problems, pregnancy, young parenthood, gender transition, or special family circumstances, for example in relation to informal care. Upon a written and substantiated request to that effect, students with a support need may be eligible for adjustments in teaching and examinations. These adjustments are coordinated to the situations of the students as much as possible, but they may not alter the quality or level of difficulty of a course or the study programme. Facilities to be provided may include modifications to the form or duration of examinations and/or practical exercises to suit individual situations or the provision of practical aids.
2. Requests as mentioned in Section 1 must be accompanied by a recent statement from a physician or psychologist or, in cases involving dyslexia, from a testing office registered with BIG, NIP or NVO. If possible, this statement should include an estimate of the extent to which the condition is impeding the student's academic progress.
3. Decisions concerning requests for adjustments relating to educational facilities are taken by the Dean or by the Director of Studies on the Dean's behalf. Decisions concerning adjustments relating to examinations are taken by the Board of Examiners or by the academic counsellor on behalf of the Board of Examiners.

4. Adjustments to examinations can involve the following or other matters:
  - » form (e.g. replacing a written test with an oral test or vice versa, testing the required material in the form of partial examinations or granting exemptions to the attendance requirement);
  - » timing (e.g. additional time for an examination, wider spreading of examinations across the examination period, granting exemptions to admission requirements or extending the period within which a component must be completed);
  - » aids permitted during testing (e.g. English-Dutch dictionaries for students with dyslexia);
  - » location (taking the examination in a separate, low-stimulus space).
5. Adjustments in educational facilities could include:
  - » providing modified furniture in teaching and examination spaces;
  - » providing special equipment (e.g. magnification or Braille equipment for students with visual impairments and blindness or loop systems and individual equipment for students with hearing impairments and deafness);
  - » providing more accessible course material;
  - » providing special computer facilities (e.g. speech-recognition or speech-synthesising software);
  - » providing a rest area.

## Paragraph 7 - Study support and (binding) recommendation on the continuation of studies

### Article 26 - Study support and Monitoring of student progress

1. The Dean is responsible for providing individual study supervision to students registered for the degree programme, partly for their orientation towards potential study options within and outside the degree programme. The Dean will also ensure that effective support and supervision is provided to students in making choices related to their studies.
2. The examination and study programme applying to each student is documented in the education information system Osiris.
3. The Student Administration is responsible for ensuring that all students are able to review and check their results in the education information system Osiris student-information system.

### Article 27 - (Negative) binding recommendation on the continuation of studies

Not applicable.

## Paragraph 8- Final provisions

### Article 28 - Conflicts with the regulations

In the case of conflict between provisions in the study guide or other document concerning the relevant teaching and examination education and study programme and these regulations, the provisions of these regulations shall take precedence.

### Article 29 - Amendments to the regulations

1. Amendments to these regulations are adopted separately by the Dean.
2. Amendments that are applicable to the current academic year will be made only if they would not reasonably damage the interests of students.

3. Amendments to these regulations may not lead to disadvantageous changes to any decisions that have been made with regard to individual students.
4. In the event of unforeseen circumstances or measures, the Dean may decide to deviate from these regulations, including the actual form of the education and any compulsory attendance requirements. This also means that the provisions in the study guide may be deviated from.

### Article 30 - Transitional measures

1. If the composition of the degree programme undergoes substantive changes, transitional measures will be established and published through the Dean. Transitional measures can be found in the programme-specific Annexes to this TER.
2. These transitional measures shall include at least the following:
  - a. an arrangement regarding exemptions that may be obtained based on examinations that have already been passed;
  - b. the period during which the transitional arrangement shall be valid.
3. Students shall follow the degree programme as it applied or applies during the first academic year of their enrolment, unless components of the programme are no longer offered. In such cases, students must transfer according to the applicable transitional measures. Deviations require the approval of the Board of Examiners. Before submitting a request to this end, the student must have first obtained recommendations from an academic counsellor.
4. If a course within a degree programme is cancelled, four additional opportunities for taking the examination in this course shall be offered after it has been taught for the last time: the examination at the end of the teaching of the course, a resit in the same academic year and two resits in the following academic year.

### Article 31 - Announcement

1. The Dean is responsible for ensuring a suitable announcement of these regulations and any amendments to them.
2. In any case, the Teaching and Examination Regulations are to be posted on the programme's website.

### Article 32 - Entry into force

These regulations shall enter into force on [1 September 2024](#).

Adopted by the Dean of the faculty on [July 15th 2024](#).

# Appendix to Article 3 of the TER - for Master's degree programmes

## Admission to English language master's degree programme

*This annex contains details relating to admission for all students who do not yet meet the entry requirements for an English language Master's degree programme.*

### Admission via a bridging programme (categories 2a and 2b as mentioned in Article 3, paragraph 1)

Holders of a university Bachelor's degree which does not provide direct access to a Master's programme (category b as mentioned in Article 3, paragraph 1) and holders of a higher vocational education diploma (category c as mentioned in Article 3, paragraph 1) can access a bridging programme if they meet the requirements for proficiency in Dutch and English.

#### Dutch language requirements for candidates for the English language Master's programme

An adequate command of the Dutch language is demonstrated by passing the Dutch language examination at the following levels:

- General Secondary Education (Algemeen Secundair Onderwijs, ASO).
- European Baccalaureate (EB) with Dutch as language 1.
- Pre-university education in Surinam.

or by passing:

- the full course in Dutch at the TU Delft Centre for Languages and Academic Skills; or
- the NT2-II certificate and the specialist language course/Construction Language at TU Delft's Centre for Languages and Academic Skills.

The following candidates are exempt from passing a Dutch language test:

- Holders of a Bachelor's degree from a Dutch university or university of applied sciences.
- Holders of a pre-university (VWO) diploma or certificate in Dutch.

#### English language requirements for candidates for the English language Master's degree programme

An adequate command of spoken and written English can be demonstrated by successfully passing one of the following tests:

- A Test of English as a Foreign Language internet-Based Test (TOEFL iBT) with an overall band score of at least 100 and a minimum score of 22 for each section.
- An International English Language Testing System (IELTS) (academic version) with an overall band score of at least 7.0 and a minimum score of 6.5 for each section.
- Cambridge Assessment English:
  - C1 Advanced (Certificate of Advanced English) with an overall score of at least 185.
  - C2 Proficiency (Certificate of Proficiency in English) with a total score of 185.

If a bridging programme has to be followed before admission is possible to the Master's degree programme, the certificate must be obtained before the start of the bridging programme. Certificates older than two years will not be accepted.

The following candidates are exempt from passing an English language test:

- Holders of a Bachelor's degree from a Dutch university.
- Holders of a pre-university (VWO) diploma or certificate in English.
- Holders of a degree obtained after completing a programme taught entirely in English at a Dutch university of applied sciences.
- Students who are nationals of the United States, Great Britain, Ireland, Australia, New Zealand and Canada.
- An applicant who has passed a Bachelor's degree programme in the Netherlands which was taught entirely in English.

**Direct admission to the Master's degree programme for holders of foreign diplomas**  
(category d as mentioned in Article 3, paragraph 1)

Holders of a foreign diploma that grants admission to the Master's degree programme must demonstrate an adequate command of the English language. An adequate command of spoken and written English can be demonstrated by successfully passing one of the following tests:

- A Test of English as a Foreign Language internet-Based Test (TOEFL iBT) with an overall band score of at least 100 and a minimum score of 22 for each section.
- An International English Language Testing System (IELTS) (academic version) with an overall band score of at least 7.0 and a minimum score of 6.5 for each section.
- Cambridge Assessment English:
  - C1 Advanced (Certificate of Advanced English) with an overall score of at least 185.
  - C2 Proficiency (Certificate of Proficiency in English) with a total score of 185.

Certificates older than two years will not be accepted.

The following candidates are exempt from passing an English language test:

- Students who are nationals of one of the following countries: USA, United Kingdom, Ireland, Australia, New Zealand or Canada.
- Holders of a Bachelor's degree obtained in one of the above countries.

# ANNEX

## **INTERFACULTY MASTER DEGREE PROGRAMME** TRANSPORT, INFRASTRUCTURE & LOGISTICS

2024  
2025

THESE TEACHING AND EXAMINATION REGULATIONS  
APPLY TO ALL STUDENTS OF THE COHORT 2024-2025

# Paragraph 1 - Study programme

## Article 1 - Study load

The study load for the Master's degree programme is 120 credits.

## Article 2 - Intended learning outcomes

1. The student is able to model, comprehend and analyse the interconnectedness of TIL systems.
2. The student is able to relate perspectives to one another, synthesise knowledge from different domains and perspectives, and is able to apply such knowledge and engineering skills to challenges in the TIL domain.
3. The student is able to understand and analyse TIL problems, design a potential solution and evaluate a proposed design solution. The student will also be able to provide practical guidance for the implementation of the design in practice.
4. The student is able to value and challenge existing knowledge with a critical attitude and apply the relevant knowledge together with analytical and engineering skills and design creativity.
5. The student is able to understand the possible ethical, social, environmental, aesthetic and economic implications of their work and have the insight to act and make judgements accordingly.
6. The student is able to collaborate effectively in multidisciplinary teams in the TIL field on interdisciplinary problems, and work in a team of diverse talents, skills and characters, language, and cooperation styles.
7. The student is able to function in developing and emerging professional environments and to maintain, evaluate and update their competence through lifelong learning.
8. The student is able to use written and oral communication skills that effectively reflect scientific findings, analytical thinking and evidence-based reasoning with researchers, engineers, and specialists from adjacent disciplines.
9. The student is able to develop scientific knowledge and insight to formulate a research/design question, perform a literature and research study, and develop models to evaluate and apply innovative TIL systems.

## Article 3 - Composition of the study programme

1. The examination programme of 120 credits comprises the following components:  
Courses, 75 credits
  - a. Fundamentals, 28 credits as laid down in Article 4.
  - b. Specialisations, between 26 and 28 (depending on the chosen specialization) credits as laid down in Articles 5 a to d.
  - c. Electives, between 19 & 21 (depending on the chosen specialization) credits as laid down in Article 6.Projects and thesis, 45 credits
  - d. Projects, 15 credits as laid down in Article 7.
  - e. Thesis, 30 credits as laid down in Article 10.
2. The student may be eligible for a special programme of 20 credits on top of the Master's degree programme: Honours Programme Master, an individual programme as laid down in Article 15.
3. As soon as possible, but at the latest before starting with the thesis as stipulated in Article 10, students must draw up their entire examination program and present it for approval to the Programme Coordinator on behalf of the Board of Examiners (see Article 8).

## Article 4 - Fundamentals

1. The examination programme includes a set of basic compulsory courses, the so-called fundamentals, amounting to 28 credits in total.

2. The compulsory courses mentioned in Section 1 are:

<b>code</b>	<b>course</b>
CIEQ6002	Transport Modelling and Analysis
ME44206	Quantitative Methods for Logistics
SEN1221	Statistical Analysis of Choice Behaviour
ME44312	Machine learning for Transport and Multi-Machine Systems
TIL6022	TIL Python Programming
TIL4030-20	TIL Research and Design Methods

## Article 5 - Specialisations

1. The examination programme includes one specialisation, amounting between 26 to 28 credits in total. The student chooses one out of four specialisations available in the degree programme. The specialisations are specified in Section 2.
2. The degree programme comprises four specialisations. Within a specialisation all courses are compulsory. These specialisations are:
  - » Specialisation TG – Transport Governance, as laid down in Article 5a.
  - » Specialisation TO – Traffic Operations, as laid down in Article 5b.
  - » Specialisation TN – Transport Networks, as laid down in Article 5c.
  - » Specialisation LS – Logistics Systems, as laid down in Article 5d.

### Article 5a - Specialisation Transport Governance (TG)

1. The composition of this specialisation is as given below.

<b>code</b>	<b>course</b>
WM1301TU	Ethics of Transportation
SEN1721	Travel behaviour research
CIEQ6212	Regions, transport and networks
AR0168	People, Movement and Public Space
SEN171a	Advanced Evaluation Methods for Transport Policy Decision-Making
TPM032a	Multi criteria decision analysis

### Article 5b - Specialisation Traffic Operations (TO)

1. The composition of this specialisation is as given below.

<b>code</b>	<b>course</b>
CIEQ6003	Traffic Modelling and Management
CIEQ6223	Intelligent Vehicles for Safe and Efficient Traffic: Design and Assessment
ME44305	System Analysis and Simulation
ME44200	Operations and Maintenance
SEN9110	Simulation Masterclass (see article 18 section 3)
AE4423-20	Airline Planning and Optimization

### Article 5c - Specialisation Transport Networks (TN)

1. The composition of this specialisation is as given below.

<b>code</b>	<b>course</b>
CIEQ6233	Railway Operations and Control
CIEQ6232	Public Transport Demand and Network Planning and Operations
CIEQ6212	Regions, transport and networks
CIEM6301	Railway traffic management
AE4423-20	Airline planning optimisation
SEN1721	Travel Behaviour Research

## Article 5d - Specialisation Logistics Systems (LS)

1. The composition of this specialisation is as given below.

<b>code</b>	<b>course</b>
ME44311	Advanced Operations and Production Management
ME44300	Multi-Machine Coordination for Logistics
ME44101	Dynamics and Interaction of Material and Equipment
SEN9720	Logistics and Supply Chain Innovations
TPM028b	Decision Making in Multimodal Transport Systems
CIEQ6213	Freight transport networks and systems

## Article 6 - Electives

1. To complete the 120 EC required, the examination programme also entails a selection of elective whose amount varies between 19 and 21 credits, based on the chosen specialisation. The student can choose elective courses from a list of electives available in the degree programme. The elective list is specified in Section 2. Choices outside this list (so-called free electives) require approval from the mandated programme coordinator, on behalf of the Board of Examiners.
2. Electives list  
Note that these electives will be scheduled for 24-25. The course offer for 25-26 may vary. There is no guarantee of a conflict-free schedule for all these electives. Students must always check the timetables. Choices outside this list (free electives) must be approved by the programme coordinator, on behalf of the Board of Examiners.

<b>code</b>	<b>course</b>
SEN115b	Law and institutions
SEN171a	Advanced evaluation methods for transport policy decision-making
SEN1721	Travel behaviour research
SEN1741	Innovations in transport and logistics
SEN9110	Simulation Master class (see article 18 section 3)
SEN9720	Logistics and supply chain innovations
SEN9725	Supply chain gaming
TPM004a	Transport safety
TPM023b	Cost-benefit analysis: theory and application
TPM028b	Decision making in multimodal transport systems
TPM032a	Multi-criteria decision analysis
TPM040a	Logistics System Engineering

<b>code</b>	<b>course</b>
ME44101	Dynamics and Interaction of Material and Equipment
ME44106	Structural design with FEM
ME44110	Integrated Design Project for Multi-Machine Systems
ME44115	Discrete element method (DEM) simulation
ME44125	Reliability and maintenance of transport equipment
ME44200	Intelligent Operations and Maintenance for Transport and Production
ME44210	Drive and energy systems
ME44300	Multi-machine coordination for logistics
ME44305	System analysis and simulation
ME44311	Advanced operations and production management

<b>code</b>	<b>course</b>
AE4321-15	Air traffic management
AE4423-20	Airline planning & optimisation
AE4446	Airport and cargo operations

<b>code</b>	<b>course</b>
CIEQ6003	Traffic Modelling and Management
CIEQ6211	Transport Modelling: Traffic Assignment
CIEQ6212	Regions, transport and networks
CIEQ6213	Freight transport networks and systems
CIEQ6214	Resilient Transport Systems: Analysis and Interventions
CIEM6305	Active modes: traffic and transport
CIEQ6222	Traffic safety
CIEQ6223	Intelligent Vehicles for Safe and Efficient Traffic: Design and Assessment
CIEQ6224	Urban and Motorway Traffic Flow Modelling and Control
CIEQ6231	Public Transport System and Supply Planning and Operations
CIEQ6232	Public Transport Demand and Network Planning and Operations
CIEQ6233	Railway operations and control
CIEM6301	Railway traffic management
CIEM6303	Transitions, sustainability & Innovations
CIEQ3112	Ports and Waterways 1
CIEQ3231	Ports and Waterways 2
CIEM6302	Advanced Data Science for traffic and transportation engineering

<b>code</b>	<b>course</b>
AR0168	People, movement and public space
AR0228	Infrastructure and environment method module
AR8003TU	Legal and governance
ARCS021	Seminar Cross domain city of the future (not sure if this will still be offered 25-26)

<b>code</b>	<b>course</b>
TIL6020	TIL scientific assignment
CME2300	Financial engineering
RO47016	Human Factors of Automated Driving
ME41106	Intelligent vehicles 3mE
MT44070	Shipping management
WI4062TU	Transport, routing and scheduling
WM1301TU OR WM1302TU	Ethics of transportation (3 EC) OR Ethics of transportation (5 EC)
AS3111	ATHENS programme (Advanced Technology Higher Education Network, Socrates)
CIEM0120/ TPM593A	Research Internship/ Internship TPM

- As free elective courses, the student can also choose the following courses, in consultation with and subject to approval from the programme coordinator on behalf of the Board of Examiners:
  - » all courses offered at Master level at Delft University of technology
  - » all courses offered at Master level at another Dutch university
- As elective courses the student admitted on the basis of TER Article 3, Section 2, under a must choose:
  - » convergence courses mentioned in Article 13.

5. As free elective courses the student may not choose:  
 » a course from the list as given below:

code	course
AE4441-16	Operations optimisation
AR0167	Architecture and urban design
AR0227	Infrastructure and environment design
AR1U131	Sustainable urban engineering of territory
CIEQ6112	Transport engineering and optimisation
CIEAESM4010	Research project
EPA2934	Preparation Master thesis
ME54015	ME-MME research assignment
MOT2004	Preparation for Master thesis
AESM6000	Thesis preparation
CIEM0400	Master Thesis preparation
ENVM4000	Master thesis preparation and Portfolio Environmental Engineering
CME5100	CME Master Thesis Preparation
SEN173a	Analysis and design of freight and logistic systems
SEN2321	Master thesis preparation
WI4051TU	Introduction to operation research
TPM423	Technology Venture Development
CEGM3000	Multidisciplinary Project (MDP)

- » all courses that have significant overlap with any other course in the examination programme  
 » courses offered by TU Delft Graduate School  
 » courses offered by TRAIL Research School  
 » courses focusing on the development of skills  
 » language courses  
 » massive open online courses (MOOCs).
6. If the student notwithstanding the forgoing mentioned under 5 chooses:  
 » courses focussing on the development of skills  
 » language courses  
 » massive open online courses (MOOCs),  
 these choices will be considered within the examination programme as extracurricular.

## Article 7 - Projects

1. The examination programme includes a set of compulsory projects, amounting to 15 credits in total.  
 2. The compulsory projects mentioned in Section 1 are:

code	course
TIL4020-20	TIL research project OR
TILPREP	TIL Thesis Preparation (if available) <sup>1</sup>
TIL5050-20	TIL design project

3. Students are allowed to start the projects mentioned in Section 2 only, once they have successfully completed the course as given below:

code	course
TIL4030-20	TIL research and design methods

4. Students are allowed to continue and thus complete TIL5050-20 TIL Design Project mentioned in Section 2 only, once they have successfully completed courses amounting to a total of at least 50 credits at the first day of the fifth week of the educational period in which the project starts.

<sup>1</sup> TIL Thesis Preparation is in development and is likely to be a new provided course from '25-'26 onwards.

## Article 8 - Composing and registering the Individual Study Plan

1. All students must submit an Individual Study Plan (ISP) before the end of their second quarter. The individual study plan provides an overview of the full MSc programme the student intends to follow and is worth a minimum total of 120 credits, including Fundamentals, Specialisation courses and electives.
2. All students of cohort 2022-2023 and later must submit their Individual Study Plan (ISP) using [My Study Planning \(MSP\)](#).
3. All submitted Individual Study Plans are assessed by the Programme coordinator on behalf of, and in consultation with, the Board of Examiners. Approval of the Individual Study Plan is granted when, in judgement of the Board of examiners or its mandate, it is plausible that the proposed programme leads to the achievement of the learning objectives of the programme as formulated in article 4 of the Teaching and Examination Regulations.
4. During the course of the study programme, students may request changing electives in their ISP through My Study Planning. Any request will be assessed for approval by the Programme coordinator.
5. If an ISP is not approved, the student must adapt the ISP based on the directions given in the evaluation and resubmit. Once approved, the individual study plan is registered in Osiris and used to monitor the students' progress, as well as to check whether the student has fulfilled all components to graduate.

# Paragraph 2 – Master thesis

## Article 9 - Master thesis preparation

A new TIL Thesis Preparation Course may be introduced. This may lead to an addendum to this appendix during the academic year '24-'25 stating that students can opt for TIL4040-20 TIL Research Project OR this new TIL Preparation Course.

## Article 10 - Master thesis project

code	course	ECs
TIL5060	TIL Thesis	30

1. Students may start the Master Thesis Project only when they have no more than 10 EC of uncompleted credits of the Master's degree programme as submitted according to Article 8.
2. If the student does not meet the criteria as indicated in Section 1, the Director of Studies may in exceptional cases give access to the project mentioned in Section 1.
3. Before the start of the Master Thesis Project, the student must define a topic, and find a chair and supervisor who support the topic. The chair and supervisor form the supervision team. In the final stage of the thesis, this supervision team will also take part in the assessment committee. The requirements on the assessment committee are stipulated in article 23 of the Rules and Guidelines Board of Examiners. More specifically, the chair is an examiner, must have supervised a minimum of 5 TIL thesis projects, and holds a UTQ (or equivalence). In addition, a third examiner (additional - is not part of the supervision team) is added to the TIL assessment committee by the chair, before the final presentation and defence, to complete the assessment committee.
4. The content of the thesis has a relationship to the fields of at least two of the faculties that offer the interfaculty programme: the faculty of Civil Engineering and Geosciences, the faculty of Technology, Policy and Management and the faculty of Mechanical Engineering.
5. The graduation work consists of a thesis project, a thesis report, a thesis presentation and a thesis defence. The thesis report includes a scientific paper and a reflection. Detailed information will be published in the digital learning environment.
6. During the Master Thesis Project there will be several meetings with the supervisor / supervision team, at least a kick-off meeting, a mid-term meeting and a green-light meeting.
7. During the kick-off meeting students present their work and will receive feedback on the content and progress of the thesis up until that point. As preparation the student must submit the thesis proposal containing topic, research questions, approach and methods, the official starting date and a time schedule containing a provisional date for the midterm, the green-light meeting and the defence date. The student takes notes of the feedback received during the kick-off meeting and sends those for approval to the supervision team.

8. During the mid-term meeting the students present their work and will receive feedback on the content and progress of the thesis up until that point. As preparation the student must submit all relevant documentation. The student takes notes of the feedback received during the mid-term meeting and sends those for approval to the supervision team.
9. Before the green-light meeting, the student must have completed all other programme obligations.
10. Before the green-light meeting, the student submits the complete draft report. During the green-light meeting the student must present the complete draft report to the supervision team. The supervision team decides whether the minimal requirements of the thesis are met and if their approval can therefore be given (the so-called green-light). If approval cannot be given, the supervision team will discuss their decision with the student and inform the student if, and in what way, approval can be obtained. The student takes notes of the feedback received during the green-light meeting and sends those for approval to the supervision team.
11. If the student has received the supervision team's approval (green-light), the student must arrange a date for the final presentation and defence.
12. The Master Thesis Project is assessed by the assessment committee. The third examiner, as described in sub 3 of this article, receives the report two weeks in advance of the final presentation and defence.
13. At the time of the final presentation and defence, the complete assessment committee must be present. In case of force majeure, a minimum of two members of the assessment committee, including the chair, have to be present at the time of the final presentation and defence. Members not present must send their assessment of the Master thesis to the chair of the committee before the final presentation and defence.
14. The examiners in the committee determine the grade for the Master Thesis Project immediately following the final presentation and defence, after close consultation with the other (possible) committee members and using the rubric for the Master Thesis Project.
15. Students must complete the registration of their Master Thesis in the TU-Delft Repository for the final grade of the Master Thesis to become officially registered. Under certain circumstances, a redacted version of the thesis can be uploaded or an embargo can be enacted. The embargo period lasts up to two years but can be extended up to a maximum of five years in total.
16. The chair of the assessment committee is furthermore responsible for ensuring that the relevant rules on the Master Thesis Project are followed, and makes sure that the independent examiner is added to the committee.

## Paragraph 3 - Admission requirements

### Article 11 - Bridging programme for students with a Dutch HBO Bachelor's degree

1. Students with a relevant Dutch higher vocational institute Bachelor's degree have to complete a bridging pre-Master programme before they will be admitted to the Master's degree programme.
2. The bridging programme as referred to Section 1, comprises the following deficiency courses amounting to 30 credits in total:

code	course
CTB1420-17	Transport & planning
IFEEMCS010400	Lineaire algebra
IFEEMCS010500 OR CTB2200	Kansrekening en statistiek Kansrekening en statistiek
IFEEMCS012100	Calculus for engineering, deel 1
IFEEMCS012200	Calculus for engineering, deel 2
IFEEMCS012300	Calculus for engineering, deel 3
TB111c	Probleemanalyse
WI1909TH	Differentiaalvergelijkingen

### Article 12 - Convergence programme for students with a Dutch university Bachelor's degree

1. Students with a relevant Bachelor of Science degree of a Dutch university that does not give direct admission to the Master's degree programme may be eligible for a special deficiency programme of convergence courses. Degrees qualifying for the deficiency programme are mentioned in the Teaching and Examination Regulations in Article 3, Section 2, under a.

2. Students admitted to the deficiency programme mentioned in Section 1 must include convergence courses in their Master's degree programme, amounting to 9 credits in total.  
» The student needs to complete:

<b>code</b>	<b>course</b>
WI1807TH1-21	Linear Algebra
IFEEMCS012100	Calculus for engineering, deel 1
IFEEMCS010500 OR CTB2200	Kansrekening en Statistiek Kansrekening en Statistiek

3. The convergence courses as mentioned Section 2 can be obtained within the examination programme of 120 credits if the student includes them within the free elective courses, mentioned in Article 6.
4. Students admitted to the deficiency programme mentioned in Section 1 have to comply with additional admission rules. These rules are given below.
- a. Students must have successfully completed 'Calculus for engineering, deel 1' (IFEEMCS012100) and 'Lineaire algebra (WI1807TH1-21)', as mentioned in Section 2, before they get permission to take:

<b>code</b>	<b>course</b>
CIEQ6002	Transport Modelling and Analysis

- b. Students must have successfully completed 'Kansrekening en statistiek (IFEEMCS010500 OR CTB2200)', as mentioned in Section 2, before they get permission to take:

<b>code</b>	<b>course</b>
SEN1221	Statistical analysis of choice behaviour

4. Students may request the Board of Examiners to be exempted from the obligation to include in their examination programme a course mentioned in Section 4 when an equivalent course have been successfully completed in their Bachelor's degree programme.

## Paragraph 4 - Education, practicals and examinations

### Article 13 - Types of examinations

1. The examinations linked to the different courses or modules are to be completed in the manner described for that course or module in the study guide.
2. Examinations pertaining to courses or modules given by other programmes are to be completed in the manner described in the Teaching and Examination Regulations from the relevant programme.

### Article 14 - Practical exercises

1. In addition to examinations, the summative assessment for courses in the MSc TIL can be based on practical exercises and/or project work. Practical exercises and/or project work can also be part of a course in addition to another form of examination.
2. All practical exercises or project works for a course are taken in the manner prescribed for that course in the study guide.
3. Pass rates and repair options for partial grades in practical exercises are specified in the study guide.

# Paragraph 5 – Master’s Honours programme

## Article 15 - Master’s Honours programme

1. Motivated students who have completed all courses of the first quarter during the first quarter and have obtained an average grade of at least 7.5 for these courses, are invited by email to apply for participation in the Honours Programme Master CEG as described in the Teaching and Examination Regulations (TER) MSc, article 10.
2. Students who fulfil the requirements as described in the [Honours Programme Guidelines](#) and are interested in the Honours Programme can send their application to the Honours Programme Master (HPM) coordinator together with a motivation letter in English, and a proposal and planning for their personal programme. The proposal students submit should show coherence within a specific theme. The requirements for designing the programme are described in the Honours Programme Guidelines. The programme has to be approved by the Honours Programme Committee.
3. The programme proposal that the student has submitted to the Honours coordinator is considered for approval by the Honours Programme Committee, established by the Director of Education. For more information about application please check the [Honours Programme Guidelines](#).
4. The Honours Programme Master has to be completed during the student's Master's degree programme. None of the results may be lower than 6.0.
5. The assessment of the various components of the programme is carried out by the examiner concerned, who must be a TU Delft academic staff member. In special cases, a deviation from this requirement is permitted (Art. 5.3 Rules & Guidelines of the Board of Examiners).
6. Students admitted to the Honours Programme Master may also complete the 15 credits of the faculty organised component with assignments and courses offered by another faculty, with a supervisor from that faculty.

# Paragraph 6 - Deviations from the study programme

## Article 16 - Deviations from the study programme

1. The Board of Examiners may allow students to deviate from the programme rules, including transitional rules, if the achievement of the intended learning objectives of the programme is ensured.

## Article 17 - The Self-composed study programme

1. Students are free to compile examination programmes that are rounded off with a final degree audit. Such a programme needs prior approval by the Board of Examiners and must consist entirely or mainly of courses given in conjunction with the degree programme but can be complemented with other courses.
2. The preliminary approval referred to in Section 1 must be presented to the Board of Examiners by the student in the form of a justified request.

# Paragraph 7 - Transitional rules academic year 2024-2025

## Article 18 - Transitional rules academic year 2024-2025

1. Students within the TIL degree programme 2023-2024 or earlier may apply this Annex 2024-2025 while compiling their Individual Study Planning. Students need to use the specific cohort entry in MyStudyPlanner to select courses from that cohort.
2. The courses of the programme 2023-2024 as mentioned below are no longer available and are replaced by other courses.

Course available in academic year 2023-2024			Replacement course in programme 2024-2025		
code	course		code	course	
TPM028A	Decision Making in Multimodal Transport Systems	5	TPM028B	Decision Making in Multimodal Transport Systems	5
CIEQ6221	Active modes: Traffic and Transport	3	CIEM6305	Active modes: Traffic and Transport	5

3. As of academic year 2025-2026, SEN9110 Simulation Masterclass will no longer be taught in its current form. Replacement/successional course to be announced.
4. Courses that were no longer available in previous academic years can be found in the relevant years Annex.

## Article 19 - Transitional rulings related to changes in the HBO bridging programme

Not applicable.

# Paragraph 8 - Final provision

## Article 20 - When the rules do not provide

Insofar as these rules do not provide for specific circumstances, the Board of Examiners will make a decision that is in line with the annex to every extent possible.
