

## Internship Art Installation Design at VOUW studio Slowtech in Amsterdam

### Introduction

VOUW, an Amsterdam-based design studio, pioneers slowtech—designs that foster real-world connections through technology. Our projects, like City Gazing, Bloomlight, and Chairwave, encourage meaningful interactions in public spaces. Find out more: [www.vouw.com](http://www.vouw.com).

### Internship Role

As an intern at VOUW, you will work at the intersection of design and technology, contributing to innovative projects and collaborating closely with the founders and the creative team. Your responsibilities will include supporting research, design, and implementation phases, contributing ideas during brainstorming sessions, assisting in constructing and maintaining prototypes, and helping plan and execute exhibitions and public installations.

### Learning Opportunities

- **Hands-on Experience:** Work with wood, metal, electronics, and modern production techniques.
- **Product Development:** Create products from design to production and installation in small batches with a small team.
- **Practical Work:** Engage in meaningful work by creating things that are actually used.
- **Material Sensibility:** Develop a keen sense for different materials through hands-on experience.

### What We Offer

The internship offers a monthly compensation of €400. It requires a commitment of 5 days a week for a minimum duration of 4 months. You will be working daily at our studio located at Gedempt Hamerkanaal 111 in Amsterdam.

### What we expect of you

- You are a doer who thrives on physically building and experimenting rather than sitting behind a computer.
- You dream in mechanisms and are fascinated by new techniques and designs.
- You are a generalist with a broad interest in various fields and a passion for understanding the whole rather than just parts.
- You value the physical over the digital, understanding that real-world interaction creates more memorable and impactful experiences.

### Interested?

We are looking forward to hearing from you and meeting you. Send us an email to to [jobs@vouw.com](mailto:jobs@vouw.com). The email should contain a CV and a portfolio containing physical things you've made and detailed explanations how you built them. When selected, we'll invite you for a preliminary meeting.
