

# User Experience Design intern wanted!

## THE CHALLENGE

Your challenge is to design a user-friendly and innovative app that integrates our upcoming products into a intuitive interface. Lead your project from user research and creating wireframes to building interactive prototypes and testing them with users. Your focus will be on ensuring designs are user-friendly, functional, and aligned with customer needs. And all with a lot of energy. ☀️

## supersola

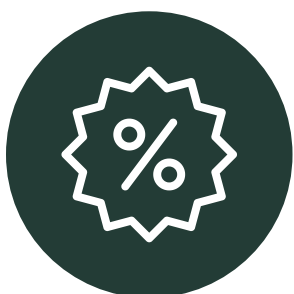

Supersola is a fast growing startup that makes solar energy easy for everyone with our Plug & Play solar panels. With a highly successful 2023, we are poised to make 2024 even bigger! Our panels are easy to install, bringing simple solar energy to thousands of homes. Join us as we expand our product range and create the next simple sustainable energy solution!

## YOUR PROFILE

- Studying in the direction of communication and design.
- You enjoy doing user research.
- You are interested in translating complex technologies into simple and user-friendly language for consumers.
- You can bring your ideas to life.
- **You have a hands-on approach with skills in:**
- Designing digital products and services (UX/UI design)
- Prototyping tools (e.g. Figma, Sketch, Adobe XD)
- User research and usability testing
- Effective project planning
- Fluent in Dutch or English
- Curious and proactive

## OUR OFFER

- A great international team, where we work hard and enjoy lunches and drinks together.
- A great work environment at our office in Bink36.
- Experience the vibe of a startup and have impact!
- A monthly internship fee.
- Connect with experts to boost your network and knowledge.
- A creative project developing an app that effectively manages our energy solutions and meets the needs of our target group.

**PERIOD: 4 TO 6 MONTHS**
