Paragraph 1 - General

Article 1 - Applicability of the regulations

1. These regulations apply to the teaching and examinations of the Master's programmes
 - Complex Systems Engineering and Management (CoSEM),
 - Engineering and Policy Analysis (EPA)
 - Management of Technology (MOT)hereinafter referred to as 'the programme'. These regulations also apply to the MSc Electives offered by the faculty of TPM and the bridging programmes of the aforementioned programme(s), with the exception of courses from Centre for Languages and Academic Skills (also known as ITAV).
2. The programme is provided under the responsibility of the faculty Technology, Policy & Management of Delft University of Technology, hereinafter referred to as the faculty.

Article 2 - Concepts

1. The following concepts apply in this Regulation:
 - a. act: the Higher Education and Scientific Research Act (abbreviated to WHW), Bulletin of Acts and Decrees 593 and any amendments since its introduction.
 - b. degree audit: An assessment by the Board of Examiners whereby it is determined, in accordance with Section 7.10 of the Act, whether all examinations in the subjects of the degree programme have been successfully completed;
 - d. programme: the degree programme, as stipulated in Article 7.3a, Section 1, in the Act;
 - e. Osiris: the education information system;
 - f. practical exercise: course or component of a course aimed at the acquisition of particular skills. The following can be understood as practical exercises:
 - writing a thesis,
 - carrying out a project such as an experimental design or a design/research assignment,
 - completing an internship,
 - participating in field work or an excursion,
 - conducting tests and experiments, or
 - participating in other educational activities that are considered essential and that are aimed at acquiring particular skills;
 - g. bridging programme: a deficiency programme aimed at moving up to a Master's degree programme, as stipulated in Article 7.30e or Article 7.57i of the Act;
 - h. student: a person enrolled at Delft University of Technology in order to receive education and take the examinations and the degree audit in the degree programme;
 - i. credit: credit in accordance with the European Credit Transfer System (ECTS); one credit equals a study load of 28 hours;
 - j. study guide: the digital guide for the degree programme containing specific information on the courses included in the degree programme (www.studiegids.tudelft.nl);
 - k. examination: investigation of the student's knowledge, insight and skills with regard to a course, along with the assessment of that investigation. An examination can also consist of interim examinations;
 - l. track: major, as stipulated in Article 7.13, Section 2, Subsection b of the Act;
 - m. course: a unit of study within the programme, as stipulated in Article 7.3, Sections 2 and 3 of the Act, with which an examination is associated;
 - n. working day: Monday through Friday, with the exception of recognised holidays and the collective closure days;
 - o. brightspace: electronic learning environment.
 - p. electives: elective courses are optional courses that students can choose to take based on their personal interests, academic curiosity, or career aspirations. These courses provide students with the opportunity to explore diverse subject outside the core curriculum (mandatory courses) of their study programme. In sum, elective courses allow students to customize their own education need: broaden and deepen their knowledge with future careers in mind.
2. The other concepts in these regulations are used in the sense in which they appear in the Act.
3. In these regulations, the term 'examination' also refers to 'interim examination', with the exception of Articles 19, section 1, first two sentences and Article 22 paragraph 1.
4. A written or oral examination can also be taken digitally and/or online. In these regulations the term examination is also taken to mean a digital and/or online examination, unless stated otherwise in these regulations.

Paragraph 2 - Admission and prior education

Article 3 - Admission to the Master's degree programmes

(Art. 7.30b WHW)

BoS advisory powers

Details of the general TU Delft application procedures and deadlines are published on the website [Admission and application](#)

MSc Complex Systems Engineering and Management (CoSEM)

Degrees from Dutch higher education institutions

A. Individuals holding one of the following degrees are directly admitted to the programme :

- BSc degree in *Technische Bestuurskunde* (TU Delft);
- BSc degree in *Technische Bedrijfskunde (Industrial Engineering (and Management))* (RUG, TU/e, UT);
- BSc degree in *Science, Business and Innovation* (VU Amsterdam);
- BSc degree in *Natuurwetenschap en Innovatiemanagement* (U Utrecht);
- Another socio-technical engineering BSc degree, to be assessed by the admission committee.

B. Other university's Bachelor's degree (not listed under section A)

Individuals holding a monodisciplinary engineering BSc degree or a BSc degree in the area of Science, Technology, Engineering and Mathematics as listed on the following website: [Doorstromen naar CoSEM](#), may have access to the programme under the following conditions (exemptions may be granted by the admission committee):

- having done 30 EC in at least two of the three subjects: economics, law and policy;
- submission of a CV and a motivation statement.

C. Bachelor's degree from an University of Applied Sciences ('HBO')

Individuals holding a socio-technical engineering bachelor degree, as listed on the website: [Doorstromen naar CoSEM](#), may have access to the programme under the following conditions (exemptions may be granted by the admission committee):

- successful completion of the bridging programme for CoSEM.

Please note:

Individuals who have received foreign education prior to the earned bachelor's degree from an University of Applied Science ('HBO'), must meet the requirements of satisfactory linguistic mastery of Dutch, as stated in the appendix, before one can participate in a mainly Dutch-language bridging programme.

The foregoing requirement does not apply to pre-switchers who were registered in the academic year 2021-2022, with uninterrupted enrolment for the academic years 2022-2023, 2023-2024 and 2024-2025.

Degrees from foreign higher education institutions

Individuals holding one of the following foreign bachelor degrees will be assessed on an individual basis by the admission committee:

- a [good](#) university's socio-technical engineering BSc degree, with good grades on the key courses;
- a good university's BSc degree in the area of Science, Technology, Engineering and Mathematics with good grades on the key courses and 30 EC in at least two of the three subjects: economics, law and policy.

under the following conditions (exemptions may be granted by the admission committee):

- submission of a CV, and a motivation statement;
- fulfilment of the general selection requirements of Delft University of Technology with regard to prior foreign education, based on a Cumulative Grade Point Average of at least 75% of the maximum number of points that could be earned, included in the table of countries (see website: [admission and application](#)) and meeting the requirements for satisfactory linguistic mastery of English, as stated in the appendix.

MSc Engineering and Policy Analysis (EPA)

Degrees from Dutch higher education institutions

A. Specific university Bachelor's degree

Individuals holding one of the following degrees are directly admitted to the programme :

- BSc degree in *Technische Bestuurskunde* (TU Delft);
- BSc degree in *Technische Bedrijfskunde, Industrial Engineering and Management* (RUG)

B. Other university Bachelor's degree (not listed under section A)

Individuals holding another BSc degree in the area of Science, Technology, Engineering and Mathematics to be assessed by the admission committee, as listed on website: [Doorstromen naar EPA](#), may have access to the programme under the following conditions (exemptions may be granted by the admission committee):

- proof of experience with modelling, simulation or programming (5 EC),
- submission of a CV and a motivation statement.

C. Bachelor's degree from an University of Applied Sciences ('HBO')

Individuals holding a bachelor degree in degree in science, technology, engineering or mathematics, as listed on website: [Doorstromen naar EPA](#), may have access to the programme under the following conditions (exemptions may be granted by the admission committee):

- successful completion of the bridging programme for EPA.

Please note:

Individuals who have received foreign education prior to the earned bachelor's degree from an University of Applied Science ('HBO'), must meet the requirements of satisfactory linguistic mastery of Dutch, as stated in the appendix, before one can participate in a mainly Dutch-language bridging programme.

The foregoing requirement does not apply to pre-switchers who were registered in the academic year 2021-2022, with uninterrupted enrolment for the academic years 2022-2023, 2023-2024 and 2024-2025.

Degrees from foreign higher education institutions

Individuals holding one of the following foreign bachelor degrees will be assessed on an individual basis by the admission committee:

- a [good](#) university's bachelor degree in the area of Science, Technology, Engineering and Mathematics with good grades on the key courses and proof of experience with modelling, simulation or programming, to be assessed by the admission committee

under the following conditions:

- submission of a CV and a motivation statement.
- Fulfilment of the general selection requirements of Delft University of Technology with regard to prior foreign education, based on a Cumulative Grade Point Average of at least 75% of the maximum number of points that could be earned, included in the table of countries (see website: [admission and application](#)) and meeting the requirements for satisfactory linguistic mastery of English, as stated in the appendix.

MSc Management of Technology (MOT)

Degrees from Dutch higher education institutions

A. Specific university's Bachelor's degree

Individuals holding a monodisciplinary engineering BSc degree or BSc degree in a natural science, as listed on the following website: [Doorstromen naar MOT](#), are eligible for admission to the programme under the condition they submit a CV and a motivation statement.

B. Bachelor's degree from an University of Applied Sciences ('HBO')

Individuals holding a bachelor degree in a technical field or in natural sciences, as listed on the following website: [Doorstromen naar MOT](#), may have access to the programme under the following conditions (exemptions may be granted by the admission committee):

- successful completion of the bridging programme for MOT.

Please note:

Individuals who have received foreign education prior to the earned bachelor's degree from an University of Applied Science ('HBO'), must meet the requirements of satisfactory linguistic mastery of Dutch, as stated in the appendix, before one can participate in a mainly Dutch-language bridging programme.

The foregoing requirement does not apply to pre-switchers who were registered in the academic year 2021-2022, with uninterrupted enrolment for the academic years 2022-2023, 2023-2024 and 2024-2025,

Degrees from foreign higher education institutions

Individuals holding one of the following foreign bachelor degrees will be assessed on an individual basis by the admission committee:

- a [good](#) university's bachelor degree in monodisciplinary engineering or natural sciences, with good grades on the key courses, to be assessed by the admission committee

under the following conditions:

- submission of a CV and a motivation statement.

- Fulfilment of the general selection requirements of Delft University of Technology with regard to prior foreign education, based on a Cumulative Grade Point Average of at least 75% of the maximum number of points that could be earned, included in the table of countries (see website: [admission and application](#)) and meeting the requirements for satisfactory linguistic mastery of English, as stated in the appendix.

Admission to the MOT programme 2023-2024.

Article 3 *Degrees from foreign higher education institutions* applies, but additionally:

1. For EER students with an international BSc degree, a rolling admission applies with an application deadline of April 1st. Enrolment is only possible per September 1st.
 2. For non-EER students with an international BSc degree the application deadline is January 15th. There will be a selective admission on the basis of the application documents. Enrolment is only possible per September 1st.
 3. The MSc Management of Technology programme strives for a diverse and balanced student population.
- Details of the application procedure and deadlines are published on the website [Admission and application](#)

Article 4 - University entrance examination

(Art. 7.29 Section 2 WHW)

Article remains empty -> not applicable for Master programmes

Paragraph 3 - Content and composition of the programme

Article 5a - Objective of the Master programme in CoSEM

(Art. 7.13 Section 2, Subsection c WHW)

BoS right of approval

1. The Master's programme in Complex Systems Engineering and Management intends to educate students as designers in socio-technical systems who master complex problems in a highly interconnected world. The programme has been designed to enable students to acquire multidisciplinary knowledge and practical skills needed for solving many contemporary, large-scale problems requiring intelligent combinations of technological, economic, legal and social interventions.

The students specialize in a specific technological track, i.e. Energy (Energy), Information & Communication (I&C) and Transport & Logistics (T&L). At the same time they are challenged to look beyond technical designs and address the social processes and the (emerging) institutional context that are crucial to understanding, creating and realizing designs.

After finishing this master, a CoSEM-engineer:

- is an expert in a specific technical domain, with regard to the engineering and management of large-scale systems and the related policy frameworks,
- is able to deeply understand the multi-actor complexity and anticipate the dynamics of socio-technical systems,
- is able to manage and to process big data, heterogeneous data and contested data,
- knows how to intervene in real-world decision-making processes to establish a coherent combination of institutional arrangements and technical system design
- is able to analyse and discuss the ethical aspects of complex problems and to integrate them in scientific work
- is able to conduct research on the engineering and governance of socio-technical systems.

2. Graduates must meet the final attainment levels for degree programme, as defined in Appendix 2.

Article 5b - Objective of the Master programme in EPA

(Art. 7.13 Section 2, Subsection c WHW)

BoS right of approval

1. The Master's programme in Engineering and Policy Analysis (EPA) educates talented students with a background in science, technology, engineering and mathematics as policy advisors for a wide range of technology and policy sectors, with the ultimate objective to improve the quality of long-term strategic policy-making. The study has an international character and an international orientation, which comes to expression in the choice of cases and projects.

Thematically the focus of the program is on understanding the character and intricacies of wicked problems: the Global Challenges; climate change, water security, cyber security, energy provision, international cooperation and development, world health, safety and security, etc.

EPA alumni should contribute to better informed (political) decision-making both in the public and the private sector. EPA graduates are competent in doing research and designing adaptive policies; in executing (big) data analytics, actor- and systems modelling and state of the art modeling and simulation of complex dynamic and adaptive systems.

EPA graduates are aware of the contemporary societal context in which they are operating and can operate

effectively and responsibly in the political and policy-making context in which their work is embedded. EPA students therefore contribute to scientific work in the area of analytics, modelling and simulation and have the opportunity to apply their knowledge and skills in complex real-world settings, both in course work and thesis research projects with external commissioners.

2. Graduates must also meet the specific final attainment levels for each degree programme, as defined in Appendix 2

Article 5c - Objective of the Master programme in MOT

(Art. 7.13 Section 2, Subsection c WHW)

BoS right of approval

1. The Master programme in Management of Technology (MOT) educates students with a bachelor degree in engineering or natural sciences and/or proven knowledge of a technical domain (as listed on TU Delft website) as technology managers, innovation managers, and analysts of technological markets. MOT graduates either work as scientists or consultants but also as entrepreneurs in technology-based, internationally-oriented competitive business environments

The ultimate objective of the programme is to improve the quality of technology and innovation management in businesses and organizations through the development of responsible decision makers, professionals and leaders. Students contribute to scientific work in the area of MOT and have the opportunity to apply their knowledge and skills in complex real-world settings, such as advanced technology organizations, laboratories, and high-tech business ventures.

The programme deliberately aims at an international and diverse group of students. Students of MOT are all rooted in at least one of the engineering mono-disciplines as offered at universities of technology or schools of engineering. MOT students work together in order to combine scientific insights from the different engineering disciplines and to apply the diverse aspects of technology and innovation management. The programme focuses on the following core themes: (1) technology, innovation and organization, (2) technology, innovation and commercialization, (3) technology, innovation and engineering economics, (4) research and reflection.

2. Graduates must also meet the specific final attainment levels for each degree programme, as defined in Appendix 2

Article 6 - Track (MSc CoSEM)

(Art. 7.13 Section 2, Subsection b WHW)

BoStudies right of approval

The Master's degree programme CoSEM has the following tracks, the content of which can be found in Appendix 3.

- Energy
- Information & Communication
- Transport & Logistics

Article 7 - Composition of the programme and degree audits

(Art. 7.13 Section 2, Subsections a, e and g of the WHW)

BoS advisory powers (a); right of approval (e and g)

(Art. 7.13 Section 2, Subsection x of the WHW)

FSC right of approval, BoS advisory powers

1. The programme includes the Master's degree audit, with a study load of 120 credits. *Subsection e and g*
2. *Following approval from the two Boards of Examiners concerned, a student may take an individual double degree programme in which two Master's programmes are combined simultaneously to create a programme of at least 180 credits. Upon completion the student is awarded two Master's diplomas. The student must earn at least 60 unique credits for each Master's degree programme excluding the MSc Thesis.*
3. *A course that was part of the Bachelor's degree programme that qualified a student for admission to the Master's degree programme may not be included in the Master's degree programme. If a compulsory component has already been completed in the aforementioned Bachelor's degree programme, the Board of Examiners will designate an alternative course. If an elective course of the degree programme has already been completed in the aforementioned Bachelor's degree programme, the student will select an alternative elective course. Subsection a*
4. The Master's degree audit is concluded with a final test or assignment. This test or assignment demonstrates that the student possesses and is able to apply the knowledge, insight and skills acquired in the degree programme. *Subsection a*
5. The degree programme is described in Appendix 3. *Subsection e and x*
6. The actual design of the educational programme is elaborated in detail in the study guide. *Subsection x*

Article 8 - Form of the programme

(Art. 7.13 Section 2, Subsection i WHW)

FSC right of approval, BoS advisory powers

The programme is offered exclusively as full-time.

Teaching and Examination Regulations 2023-2024

MSc CoSEM-EPA-MOT version 03

Article 9 - Language

FSC right of approval, BoS advisory powers

Teaching is in English, and the examinations are administered in English.

Article 10 - Honours Programme

(Art. 7.9b WHW)

FSC right of approval, BoS advisory powers

1. Based on the criteria stated in Section 6 and in the description of the Master's Honours Programme, students will be selected and admitted to the Master's Honours Programme by an Honours Coordinator nominated by the Director of Studies.
2. The Master's Honours Programme comprises at least 20 credits.
 - At least five credits must be completed in the institution-wide component of the Master's Honours Programme-and
 - At least 15 credits must be completed in the faculty component of the Master's Honours Programme, the composition of which (including its content and options) is described in the Honours Programme.
3. All students selected for participation in the Honours Programme must submit their options for approval to the Honours Coordinator.

The Board of Examiners is responsible for assessing whether all the requirements of the Honours Programme have been met. Next to completion of the courses these requirements include that the programme is completed within the normal time set for the master's programmes (within 24 months) measured from first enrolment allowing for any delays officially recognised in accordance with the Graduation Support Scheme (RAS) or TU Delft Profiling Fund Regulations (RPF).

If a student follows a double degree programme as approved by the Board of Examiners the normal time set for this double degree programme constitutes the norm (within 36 months).
4. Any student who has successfully completed the Honours Programme will be awarded a certificate signed by the chair of the Board of Examiners and the Rector Magnificus.
5. To be admitted to the Master's Honours Programme, all three of the following must be satisfied:
 - a. Student's grade point average for the completed (TU Delft) Bachelor's degree is **7.5 or higher than 7.5**
 - b. Student is able to finish the Master's Honours Programme within the normal time set for the MSc programme (within 24 months;
 - c. Student has **exceptional motivation** to participate in the Programme

For more information about application please check the [studentportal](https://www.tudelft.nl/studenten/faculteiten/tbm-studentenportal/onderwijs/honours-programme/honours-programme-master/)
(<https://www.tudelft.nl/studenten/faculteiten/tbm-studentenportal/onderwijs/honours-programme/honours-programme-master/>)

Article 11 - (Compulsory) participation in the programme

(Art. 7.13 Section 2, Subsection t WHW)

FSC right of approval, BoS advisory powers

1. All students are expected to participate actively in the programme for which they are registered.
2. If necessary, there will be an obligation to participate in practical exercises, with a view to admission to the related examination, without prejudice to the authority of the Board of Examiners to grant an exemption from this obligation, with or without imposing a substitute requirement.
3. Any supplementary obligations are described by component in the course description in the study guide.

Article 12 - Programme quality assessment

(Art. 7.13 Section 2, Subsection a1 WHW)

BoS right of approval

1. The Director of Studies is responsible for the assessment of the quality of the degree programmes.
2. The manner in which the quality of the programmes is assessed is documented in the faculty's Quality Assurance Manual, which is submitted to the Faculty Student Council and the Board of Studies.
3. The Director of Studies informs the Board of Studies concerning the outcomes of the assessment, the intended adjustments based on these outcomes and the effects of the actual adjustments.

Paragraph 4 – Registration for courses and examinations

Article 12a – (not relevant for TPM)

Mandatory registration of courses does not apply to students following TPM programs. For additional information check study guide. See [here](#) for TU-wide agreements on registering for courses and exams.

Article 12b – withdrawal from a course (not relevant for TPM)

--

Article 13 - Registration for written examinations

FSC right of approval; BoS advisory powers

1. Registration to participate in a written examination, including a written examination that is taken online, remotely from the university, is compulsory and is done by entering the requested data into Osiris no later than 14 calendar days before the examination. Students receive examination tickets by email as confirmation of their registration. Contrary to this, a registration period of 6 calendar days applies to resits in the summer resit period. The student will receive an exam ticket by email as confirmation.
2. Students may submit a request to register for an examination after the deadline mentioned in subsection 1 has passed but no later than 6 calendar days before the examination in question, in Osiris by being placed on a waiting list. The request will be honoured providing that places are available in the room or rooms where the examination is scheduled to take place. The student will receive an exam ticket by email as confirmation.
3. In the event of circumstances beyond a student's control resulting in the student being unable to register for an examination, the Board of Examiners may nevertheless permit the student to participate in the examination.
4. Students who have not registered for the examination and are therefore not included on the list of examinees can report on the day of the examination to the invigilator beginning 15 minutes before the start of the examination until the actual start. They will be admitted to the examination room, in the order that they reported to the invigilator, 30 minutes after the start of the examination, if sufficient places are available. The loss of 30 minutes of examination time cannot be compensated. Students who have been granted late access to the examination will be added to the list of examinees. The student participates in the examination subject to the validation of entitlement to participate in the examination.
5. In the situation described in the previous section, if it is found that a student was not entitled to participate in the examination, the examination work will be deemed invalid, it will not be marked. The student may subsequently submit an appeal to the Board of Examiners, accompanied by reasons, requesting that the examination work that has been deemed invalid be declared valid and to have it assessed. The Board of Examiners will approve the request only in case of exceptional circumstances.
6. Sections 2 and 4 of this article does not apply to a written examination administered online remotely from the University.
7. If unforeseen circumstances or measures make it necessary to change the form or manner of taking the examination, the Board of Examiners may determine a different registration period in favour of the student.

Article 14 - Registration for other examinations

FSC right of approval; BoS advisory powers

1. If registration for participation in an examination other than a written examination is compulsory, it is stated in the study guide and Brightspace.
If unforeseen circumstances or measures make it necessary to change the form or manner of taking the examination, the provisions stated in the study guide apply in full unless the Dean decides to deviate from the manner or term of registration prescribed in the study guide.
2. In special cases, the Board of Examiners make exceptions to the registration term stated in Section 1, but only in favour of the student.
3. Students who have not registered on time will not be allowed to participate in the examination. The Board of Examiners can nevertheless admit a student to the examination, but only in case of exceptional circumstances.
4. In the event of unauthorised participation in an examination, the Board of Examiners may declare the result invalid.

Article 15 - Withdrawal from examinations

FSC right of approval; BoS advisory powers

1. Students can withdraw from an examination through Osiris up to three calendar days before the examination (Additional: see Article 16.3)
2. Any student who has withdrawn from an examination should re-register on a subsequent occasion, in accordance with the provisions of Articles 13 and 14.

Paragraph 5 – Examinations

Article 16 - Form of the examinations and the manner of testing in general

(Art. 7.13 Section 2, Subsections h and i WHW)

FSC right of approval, BoS advisory powers

Teaching and Examination Regulations 2023-2024
MSc CoSEM-EPA-MOT version 03

1. Examinations (oral, written or otherwise) are taken in the manner described in the study guide.
In the event of unforeseen circumstances or measures, the Board of Examiners may determine that the manner prescribed may be deviated from. In case of a force majeure an examination is taken using online proctoring, this takes place in accordance with the TU Delft Online Proctored Examination Regulation.
2. The study guide contains a description of the moments at which and the numbers of times that examinations can be taken, along with their frequency, without prejudice to the provisions of these regulations concerning written and oral examinations.
3. A student may participate in an examination for a course no more than twice in one academic year, with the understanding that registration for an examination without timely withdrawal counts as participation.
4. In special cases, the Board of Examiners will deviate from the provisions of this Article in favour of the student.
5. At least 5 Working days before a written examination, the examiner will give the students the opportunity to familiarise themselves with representative sample questions and the criteria by which they will be assessed. The teacher or examiner will provide accompanying guidelines for the way in which the sample questions are answered.

Article 17 - Times and number of examinations

(Art. 7.13 Section 2, Subsection j WHW)

FSC right of approval, BoS advisory powers

1. Two opportunities to take written examinations will be offered each academic year.
The previous provision applies equally to assessments other than written examinations, unless this cannot be reasonably demanded of the programme. In those cases a different option will be provided, if at all possible. Participation in this may, within the limits of proportionality, be subject to additional requirements. The times in which the examinations can be taken are:
 - at the end of the teaching period in which the course is taught (Q1, Q2, Q3, Q4), and
 - in the fifth week or at the end of the next teaching period or during the summer resit period according to the TU Delft academic calendar (only for courses taught in Q4).
2. A timetable per semester is issued detailing when examinations may be taken, and it is published before the start of the relevant teaching period.
3. Contrary to the provisions in Section 1, the opportunity to take the examination for a course that is not taught in a certain academic year must be given at least once in that year.

Article 18 - Oral examinations

(Art. 7.13 Section 2, Subsection n WHW)

FSC right of approval, BoS advisory powers

1. For oral examinations, no more than one student shall be tested at a time, unless determined otherwise by the Board of Examiners
2. Oral examinations shall not be public, unless the Board of Examiners has decided otherwise. In deviation from this first clause, a final presentation is given publicly except in special cases in which the Board of Examiners has decided otherwise, whether or not at the request of the student.
3. The oral examination is administered by at least two examiners. In the event of unforeseen circumstances or measures, the Board of Examiners may determine that the oral examination can be administered by a single examiner, in which case an audio and/or video recording of the oral examination will be made.

Article 19 - Determination and announcement of results

(Art. 7.13 Section 2, Subsection o WHW)

FSC right of approval, BoS advisory powers

1. The examiner determines and registers the result of a written examination in Osiris as quickly as possible but no later than 15 working days after the examination. The results of written interim examinations shall be announced no later than five working days before the next written interim examination.
This period applies to interim examinations that are consistent in terms of content.
2. The examiner determines the result of an oral examination as quickly as possible but no later than 15 working days after it is administered. The student is issued with a written statement of this result.
3. The examiner records the results of the assessment of a practical exercise as quickly as possible, but no later than 15 working days after the completion of the practical exercise at the designated time. In Osiris, the result will be dated on the date of completion of the practical exercise. With regard to a series of practical exercises in which the knowledge acquired in a previous practical exercise is important to the subsequent practical exercise, the result of the previous practical exercise shall be announced at least 5 working days before the subsequent practical exercise. If this is not possible, the examiner shall schedule a timely discussion of the previous practical exercise.
4. The examiner is responsible for the registration and publication of the results in Osiris, with observance of the student's privacy. When the result of an examination is announced, the student is informed about the right of perusal as stipulated in Article 20 as well as about the possibility of appealing to the Examinations Appeals Board.

5. Contrary to the previous provisions, results for examinations administered in the last regular examination period, as well as for resits from the first year of the BSc taken during the resit period, shall be determined, registered and published by no later than the Friday following the final week of this examination period.
6. If special circumstances prevent the examiner from registering the results on time, the examiner will report this to the Board of Examiners, accompanied by reasons, and notify the students and student administration as quickly as possible, also regarding the follow-up with relation to the resit.

Article 20 - Right to inspect results

(Art. 7.13 Section 2, Subsection p WHW)

FSC right of approval, BoS advisory powers

1. Upon request, students will have the right to inspect their assessed work during a period of at least 20 working days after the announcement of the results of a written examination or the assessment of a practical exercise. During the inspection of the assessed work, it is not permitted to copy the underlying examination questions. Students intending to appeal against the assessment of their work will be issued with a copy of the assessed work by the examiner on request.
2. During the period mentioned in Section 1, all students who have participated in the examination can become acquainted with the questions and assignments of the relevant examination, as well as with the standards that form the basis of the assessment.
3. The examiner can determine that the inspection or cognizance intended in Sections 1 and 2 will take place at a pre-established place and at a pre-established time.
4. Students proving that they were unable to appear at such an established place and time because of circumstances outside of their control will be offered another possibility, if possible within the period mentioned in Section 1. The place and times mentioned in the first sentence will be made known in good time.

Article 21 - Discussion of the results of examinations

(Art. 7.13 Section 2, Subsection q WHW)

FSC right of approval, BoS advisory powers

1. Students who have taken a written examination or who have received the assessment of a practical exercise can ask the relevant examiner for an explanation of the results during a period of 20 working days after the announcement of the results. The explanation will be given within a reasonable period of time.
2. At the request of the student or at the initiative of the examiner, an explanation justifying the assessment will be given by the examiner and the student as soon as possible after the announcement of the result of an oral examination. During the discussion of the assessed work it is not permitted to copy the underlying examination questions.
3. If a collective explanation is organised by the examiner, students may submit requests as referred to in section 1 only if they have been present at the collective explanation and have motivated their requests, or if they were unable to be present at the collective explanation because of circumstances outside their control.
4. The Board of Examiners may allow deviation from the provisions in Sections 2 and 3

Article 22 - Period of validity for examinations (additionally see RGBoE article 16 Retain work and results)

(Art. 7.13 Section 2, Subsection k, Art. 7.10, Section 4 WHW).

FSC right of approval, BoS advisory powers

1. The period of validity of the results of an examination is indefinite. The dean can restrict the period of validity of a successfully completed examination only if the knowledge or insight that was examined has become outdated or if the skills that were examined have become outdated.
2. In cases involving a limited period of validity based on the first section, the period of validity shall be extended at least by the duration of the acknowledged delay in studies, based on the TU Delft Profiling Fund Scheme (see: [link](#)).
3. In individual cases involving special circumstances, the Board of Examiners can extend periods of validity that have been limited based on the first section or further extend periods of validity that have been extended based on the second section.
4. If a final mark is calculated from partial exams, the period of validity of a partial exam is indefinite if this partial exam is registered in Osiris. The validity of partial exams not registered in Osiris are restricted to the current academic year, unless otherwise stipulated in the study guide.

Article 23 - Exemption from an examination or obligation to participate in a practical exercise

(Art. 7.13 Section 2, Subsection r WHW)

FSC right of approval, BoS advisory powers

1. After having obtained recommendations from the relevant examiner, the Board of Examiners may grant exemptions to students:
 - a. who have successfully completed an examination or degree audit in a system of higher education within or outside the Netherlands that corresponds to the examination for which the exemption has been requested in terms of content and level, or

- b. who demonstrate that they possess sufficient knowledge and skills that have been acquired outside the system of higher education.
2. After having obtained recommendations from the relevant examiner, the Board of Examiners may grant exemption from the requirement to participate in a practical exercise with a view to admission to the related examination, possibly subject to alternative requirements.

Article 24 - Periods and frequency of degree audits

(Art. 7.13 Section 2 WHW)

FSC right of approval, BoS advisory powers

In principle, the opportunity to take the Master's degree audit will be offered once each month. The dates for the meetings of the Board of Examiners are published before the beginning of the academic year.

Article 24a – invalidation of examination

(Art. 7.12 and 7.12b WHW)

FSC right of approval, BoS advisory powers

The Board of Examiners is authorised to declare invalid an examination or part thereof if a proper assessment of the knowledge, insight and skills of the student has not proved reasonably possible based on the examination or the part thereof. The Board of Examiners may draw up further rules for this.

Paragraph 6 - Studying with a support need

Article 25 - Adjustments to the benefit of students with a support need

(Art. 7.13 Section 2, Subsection m WHW)

FSC right of approval, BoS advisory powers

1. Students with the support need means students who are held back due to a functional limitation, disability, chronic illness, psychological problems, pregnancy, young parenthood, gender transition, or special family circumstances, for example in relation to informal care. Upon a written and substantiated request to that effect, students with a support need may be eligible for adjustments in teaching and examinations and practical exercises. These adjustments are coordinated to the situations of the students as much as possible, but they may not alter the quality or level of difficulty of a course or the study programme. Facilities to be provided may include modifications to the form or duration of examinations and/or practical exercises to suit individual situations or the provision of practical aids.
2. Requests as mentioned in Section 1 must be accompanied by a recent statement from a physician or psychologist or, in cases involving dyslexia, from a testing office registered with BIG, NIP or NVO. If possible, this statement should include an estimate of the extent to which the condition is impeding the student's academic progress.
3. Decisions concerning requests for adjustments relating to educational facilities are taken by the Dean or by the Director of Studies or the Programme Director on the Dean's behalf. Decisions concerning adjustments relating to examinations are taken by the Board of Examiners or by the academic counsellor on behalf of the Board of Examiners.
4. Adjustments to examinations can involve the following or other matters:
 - form (e.g. enlarged version, replacing a written test with an oral test or vice versa, testing the required material in the form of interim examinations or granting exemptions to the attendance requirement);
 - timing (e.g. additional time for an examination, wider spreading of examinations across the examination period, granting exemptions to admission requirements or extending the period within which a component must be completed);
 - aids permitted during testing (e.g. English-Dutch dictionaries for students with dyslexia);
 - location (e.g. taking the examination in a separate, low-stimulus space).
5. Adjustments in educational facilities could include:
 - providing modified furniture in teaching and examination spaces;
 - providing special equipment (e.g. magnification or Braille equipment for students with visual impairments or loop systems and individual equipment for students with hearing impairments);
 - providing more accessible course material;
 - providing special computer facilities (e.g. speech-recognition or speech-synthesising software);
 - providing a rest area.

Paragraph 7 - Study support

Article 26 - Study support and Monitoring of student progress

(Art. 7.13 Section 2, Subsection u WHW)

FSC right of approval, BoS advisory powers

1. The Dean is responsible for providing study supervision and monitoring individual student progress to students registered for the degree programme, partly for their orientation towards potential study options within and outside the degree programme. The Dean will also ensure that effective support and supervision is provided to students in making choices related to their studies.
2. The examination and study programme applying to each student is documented in Osiris.
3. The Student Administration is responsible for ensuring that all students are able to review and check their results in the Osiris student information system.

Article 27 - (Negative) binding recommendation on the continuation of studies

Articles remains empty -> not applicable for Master programmes

Paragraph 8 - Final provisions

Article 28 - Conflicts with the regulations

In the case of conflict between provisions in the study guide or other document concerning the relevant teaching and examination education and study programme and these regulations, the provisions of these regulations take precedence.

Article 29 - Amendments to the regulations

1. Amendments to these regulations are adopted separately by the Dean.
2. Amendments that are applicable to the current academic year will be made only if they do not harm students beyond what is reasonable.
3. Amendments to these regulations may not affect decisions that have been made prior to the amendment with regard to individual students in a way that harms these students.
4. In the event of unforeseen circumstances or measures, the Dean may decide to deviate from these regulations, including the actual form of the education and any compulsory attendance requirements. This also means that the provisions in the study guide may be deviated from.

Article 30 - Transitional measures

1. If the composition of the degree programme undergoes substantive changes, transitional measures will be established and published by the Dean.
2. These transitional measures shall include at least the following:
 - a. an arrangement regarding exemptions that may be obtained based on examinations that have already been passed;
 - b. the period during which the transitional arrangement shall be valid.
3. Students follow the degree programme as it applied or applies during the first academic year of their enrolment, unless components of the programme are no longer offered. In such cases, students must transfer according to the applicable transitional measures. Deviations require the approval of the Board of Examiners. Before submitting a request to this end, the student must have first obtained recommendations from an academic counsellor.
4. If a course within a degree programme is cancelled, four more written examinations in this course will be offered after the last lesson in this course, namely two examinations in the same academic year and two examinations in the following academic year.

Article 31 - Announcement

The Dean is responsible for ensuring a suitable announcement of these regulations and any amendments to them.

Article 32 - Entry into force

These regulations enter into force on 4 September 2023.

Adopted by the Dean of the faculty on 31-08-2023

APPENDIX 1 - to Article 3 of the TER (Admission)

Language level Dutch-language bridging programmes for individuals holding an other Bachelor's degree university education (b) or a higher professional education degree (c)

The Dutch language:

By successfully passing a Dutch examination at the following level:

- GCE A Level
- Algemeen Secundair Onderwijs (ASO)
- European Baccalaureate (EB)
- Suriname VWO
- International baccalaureate (IB)
- Baccalaureate Series S

By successfully completing:

- The complete Dutch course from the TU Delft Centre for Languages and Academic Skills; or
- The NT2-II certificate and the professional language course of the TU Delft Centre for Languages and Academic Skills.

Language level for individuals holding a higher professional education degree (c)

The following candidates are exempted from the English language test requirement:

- Students with a Bachelor's degree from a Dutch university
- Students with a VWO diploma or VWO English certificate
- Students with an HBO (University of Applied Sciences) degree from a degree programme taught entirely in English
- Students who hold the nationality of one of the following countries: USA, UK, Ireland, Australia, New Zealand or Canada

Sufficient competence in the English language can be demonstrated by passing one of the following tests:

- TOEFL iBT (Test of English as a Foreign Language internet-Based Test) with an overall band score of at least 90
- IELTS (academic version) with an overall band score of at least 6.5
- Cambridge Assessment English:
 - C1 Advanced (Certificate of Advanced English) with an overall score of at least 176.
 - C2 Proficiency (Certificate of Proficiency in English) with an overall score of at least 180.

If a bridging programme needs to be completed before a candidate can be admitted to a Master's programme, the certificate should be obtained before the start of the bridging programme.

Language level for holders of a non-Dutch diploma (d)

As from the academic year 2023-2024, the English language requirement will be increased.

Competence in the English language as demonstrated by passing one of the following tests:

- TOEFL iBT (Test of English as a Foreign Language internet-Based Test) with an overall band score of at least 90 and a minimum score of 21 for each section
- IELTS (academic version) with an overall band score of at least 6.5 and a minimum score of 6,0 for each section
- Cambridge Assessment English:
 - C1 Advanced (Certificate of Advanced English) with an overall score of 176 and a minimum score of 169 for each section.
 - C2 Proficiency (Certificate of Proficiency in English) with an overall score of 180 and a minimum score of 169 for each section

Certificates more than two years old will not be accepted.

The following candidates are exempted from the English language test requirement:

- Students who hold the nationality of one of the following countries: USA, UK, Ireland, Australia, New Zealand or Canada;
- Students who hold a Bachelor's degree from one of the above countries;

APPENDIX 2 - to Article 5 of the TER (Final attainment levels)

References:

TPM, 2015, *CoSEM redesigned*, internal report, 18 November 2015.

Final attainment levels of the Master programme CoSEM

A master's graduate in CoSEM

1. Is competent in one or more scientific disciplines / fields:

- Is a multi-disciplinary scholar, mastering theories and methods from the fields of systems engineering, institutional economics, law and management, with the ability to combine and/or switch between them to deal with complex problems;
- Can apply this body of knowledge when creating insight in the multi-actor complexity and can anticipate the dynamics of socio-technical systems;
- Is an expert in a specific technical domain (energy; information and communications technology; transport and logistics), with regard to the engineering, management and governance of socio-technical systems and the related policy designs;
- Is able to reflect on the choice of methods and assumptions in scientific disciplines / fields, can identify knowledge gaps and decide how these need to be addressed by means of self-study or teamwork;

2. Is competent in doing research:

- Is able to formulate research questions and write a research proposal on complex issues in a highly interconnected world;
- Is able to choose appropriate quantitative and/or qualitative methods for conducting research on socio-technical systems;
- Can evaluate research and identify threats to the validity of scientific research, understand how these threats may affect the application of the research, and suggest possible remedies;
- Can contribute to the body of scientific knowledge through independent work;

3. Is competent in design:

- Is proficient in design methodologies for technical artefacts and institutional arrangements as well as able to develop innovative, integrative and effective interventions in real-world decision-making processes to establish a coherent combination of institutional arrangements and technical systems designs;
- Is able to identify dilemmas arising during the design process and can reflect on these in a systematic way and make justifiable design choices;
- Is able to structure and redefine complex problems from a multi-actor and socio-technical systems perspective;

4. has a scientific approach:

- Is able to cope with the uncertainty involved in multi-actor system behaviour, system context and futures, and can justify methods choices, while taking into account these uncertainties;
- Is able to critically reflect on existing theories and methods, and has skills to develop and validate these;
- Is able to report on the results of research and design processes in a scientifically sound way;

5. Possesses intellectual skills:

- Is competent in reasoning, reflecting and forming a judgment, and is able to recognize fallacies;
- is able to ask adequate questions and take a critical-constructive attitude when presented with complex real-life problems in the socio-technical realm;

6. Is competent in co-operating and communicating:

- Is able to work with and for others and has a sense of responsibility;
- Is able to work and take a leading role in international and interdisciplinary teams, in an academic, public or business environment;
- Is able to effectively communicate in writing or verbally and to use social media efficiently for research and communication;

7. Takes account of the temporal and the social contexts:

- Is familiar with the state-of-the-art knowledge, and with engineering, management and governance challenges in a specific technical domain;
- Is familiar with institutional factors that structure engineering and policy outcomes;
- Is able to analyse the societal and ethical consequences of scientific and technological developments, and to integrate this knowledge into their own (scientific) work;
- Takes into account the temporal context of the past and the future.

Final attainment levels of the Master programme EPA

A Master's graduate in EPA

1. Is competent in one or more scientific disciplines

- An EPA graduate has a thorough mastery of policy and politics, is skilled and experienced in intercultural management, and has a basic understanding of economic theories.
- An EPA graduate is skilled in (both quantitative and qualitative) modelling and simulation methods aimed at addressing global societal challenges following engineering principles and a multi-actor perspective.
- An EPA graduate apprehends the relationship of science and technology with governance and societal values.

2. Is competent in doing research

- An EPA graduate is able to formulate research questions on complex issues at the interface between natural and engineered systems, institutionalised values and social behaviour.
- An EPA graduate is proficient in the application of modelling and simulation methodologies in scientific research.
- An EPA graduate can design multi-methodological approaches to research that is fit for purpose.
- An EPA graduate can evaluate research within their discipline and identify threats to the validity of scientific research, suggest how these threats may confound the application of the research, and suggest possible remedies to address these threats.
- An EPA graduate can contribute to the body of scientific knowledge through independent work that has the potential for scientific publication.

3. Is competent in design

- An EPA graduate is able to develop engaging, innovative, integrative and adaptive, problem solving strategies and policies on the interface between natural and engineered systems, institutionalised values and social behaviour.
- An EPA graduate is able to structure and redefine complex societal issues from a multi-actor systems perspective.
- An EPA graduate is able to design and develop models and simulations for a wide range of engineering and societal challenges.
- An EPA graduate is able to design and develop strategic policy advices on the basis of analytical and modelling information

4. Has a scientific approach

- An EPA graduate has a systematic, multi-method approach characterised by the development and use of theories, models and domain knowledge.
- An EPA graduate knows the possibilities and limitations of a range of analysis and modelling techniques, and is able to select the appropriate methods for the problem.
- An EPA graduate has insight into the nature of science and technology, and their interrelations with governance and societal values.
- An EPA graduate is a reflective practitioner able to review and evaluate both theory and practice and able to learn and improve upon his or her own practice.

5. Possesses basic intellectual skills

- An EPA graduate is able to ask adequate questions and take a critical-constructive attitude when presented with complex real-life problems in the socio-technical realm.
- An EPA graduate can deconstruct policy arguments, thereby revealing the frames and assumptions that shape public debate.
- An EPA graduate is familiar with argumentation structuring techniques and can apply these for building convincing argumentations

6. Is competent in co-operating and communicating

- An EPA graduate is a catalyst of change and is able to work with and for others. He or she creates commitment for action, has a sense of responsibility, and demonstrates leadership.
- An EPA graduate is able to participate effectively in the scientific and public debate.
- An EPA graduate is able to work in an international, intercultural and interdisciplinary environment.
- An EPA graduate is capable in translating disciplinary and technical knowledge into actionable findings, practical policy advises and social understanding.

7. Takes account of the temporal and the social context

- An EPA graduate is familiar with the grand challenges that shape the future of our natural and built environments.
- An EPA graduate is familiar with the cultural and institutional factors that structure engineering and policy outcomes, and understands how these factors differ across the world.
- An EPA graduate is able to analyse the ethical and societal consequences of scientific and technological developments, and integrates this knowledge into their own work.

Final attainment levels of the Master programme MOT

A Master's graduate in MOT

1. Is competent in one or more scientific disciplines, in particular the management sciences, and is able to adapt and apply the concepts of these sciences in a high-tech engineering environment.

- Has a thorough mastery of parts of the relevant fields (as named in article 3) extending to the forefront of knowledge (latest theories, methods, techniques and topical questions).
- Looks actively for structure and connections in the relevant fields, and the connections between subfields.
- Has knowledge and skills in the way in which the following items take place in the relevant fields:
 - truth-finding and the development of theories and models
 - interpretations (texts, data, problems, results)
 - experiments, gathering of data and simulations
 - decision-making
- Is able to reflect on standard methods and their presuppositions; is able to question these; to propose adjustments and to estimate their implications.
- Is able to spot gaps in his/her own knowledge, and to revise and extend it through study.

2. Is competent in doing research

- Is able to reformulate ill-structured research problems. Takes account of the system boundaries in this. Is able to defend the new interpretation against involved parties.
- Is observant, and has the creativity and capacity to discover in apparently trivial matters certain connections and viewpoints and put these into practice for new applications.
- Is able to produce and execute a research plan.
- Is able to work at different levels of abstraction. Given the process stage of the research problem, chooses the appropriate level of abstraction.
- Is able, and has the willingness to draw upon other disciplines in his or her own research.
- Is flexible in dealing with changes in the research process.
- Is able to assess research within the discipline on its scientific value.
- Is able to contribute to the development of scientific knowledge.

3. Has a scientific approach

- Is able to identify and take in relevant scientific developments.
- Is able to critically examine existing theories, models or interpretations in the area of his or her graduation subject.
- Has skills in, and affinity with the use, development and validation of models; is able consciously to choose between modelling techniques.
- Has insight into the nature of and differences between management and technical sciences and is able to distinguish and combine scientific fields.
- Is able to document adequately the results of research and thereby contribute to the development of the knowledge in the field, and is able to publish these results.

4. Possesses basic intellectual skills to reflect and decide

- Is able to critically reflect on his or her own thinking, decision making, and acting and to adjust these on the basis of this reflection
- Is able to reason logically within the field and beyond; both 'why' and 'what-if'-reasoning.
- Is able to recognize modes of reasoning (induction, deduction, analogy etc.) within the field. And is able to apply these modes.
- Is able to ask adequate questions, and has a critical yet constructive attitude towards analyzing and solving real life problems in the field.
- Is able to form a well-reasoned decision (and adopt effective strategies) in the case of incomplete or irrelevant data.
- Is able to take a standpoint with regard to a scientific argument in the field, and is able to assess this critically as to its value.
- Possesses numerical skills, and has an understanding of orders of magnitude.

5. Is competent in co-operating and communicating in an intercultural and multi-disciplinary environment

- Is able to communicate in writing in English about research and solutions to problems with colleagues, non-colleagues and other involved parties.
- Is able to communicate verbally in English about research and solutions to problems with colleagues, non-colleagues and other involved parties.
- Is able to debate about both the field and the place of the field in society.
- Is characterized by professional behavior. This includes: drive, reliability, commitment, accuracy, perseverance and independence.
- Is able to perform project-based work: is pragmatic.
- and has a sense of responsibility; is able to deal with risks; is able to compromise.
- Is able to work within an interdisciplinary and intercultural team.

- Is able to assume the role of team leader.

6. Takes account of the temporal, market and the social context

- Understands relevant developments in the history of the fields. This includes the interaction between the internal developments (of ideas) and the external (social) developments, and integrates this in scientific work.
- Is able to analyse and to discuss the social consequences (economic, social, cultural) of new developments in relevant fields and integrates these consequences in scientific work.
- Is able to analyse the consequences of scientific thinking and acting on the environment and sustainable development and integrates these consequences in work.
- Is able to analyse and to discuss the ethical and the normative aspects of the consequences and assumptions of scientific thinking and acting and integrates these ethical and normative aspects in work.

APPENDIX 3 - to Articles 7 and 16 of the TER (Programme)

General

1. Prerequisites

Some of the courses and projects have prerequisites. The courses for which a prerequisite applies are listed below and are mentioned in the study guide. For more detailed information about Master Thesis project, see Appendix 4, Article 1 for the prerequisites of the Master Thesis Project.

2. Skills

Several courses and projects include skills. Skills will be graded by either pass or fail. No credits are linked to the skills, however, all skills must be passed in order to be able to graduate.

3. Optional courses may not overlap significantly in terms of content with any other unit already included in the study programme of the student concerned. In the event of doubt, the Board of Examiners decides.
4. An overview of the MSc electives offered by TPM is listed in the study guide. These regulations also apply to the MSc Electives offered by the faculty of TPM.
5. Any changes made to the examination programme should be approved by the Board of Examiners.

Master Programme CoSEM

Composition CoSEM

1. The master's programme CoSEM, 120 EC, consists of the following components:
 - a. compulsory courses and projects, 75 EC as laid down under Specifications, Sections 3 and 5
 - b. track related courses, 30 EC as laid down under Specifications, Sections 4 and 7.
Students choose one out of three tracks:
 - Energy
 - Information & Communication
 - Transport & Logistics
 - c. Free electives of 15 EC
2. The student may be eligible for a special individual programme of 20 EC on top of the master's degree programme: Honours Programme Master, as laid down in Teaching and Examination Regulations, Article 10.

Specifications CoSEM

1. Students from the BSc-TB programme choose the corresponding track (as mentioned under Composition CoSEM, section 1, under b) they completed during their BSc-TB programme.
Students from another BSc programme must choose one out of three tracks as mentioned under Composition CoSEM, section 1, under b. They do so in consultation with the academic counsellor.
In both cases the track choice stays in principle fixed for the duration of the CoSEM programme.
2. The first year master's programme CoSEM consists of compulsory courses and projects and track related courses. The second year master's programme CoSEM consists of compulsory courses and projects and track electives.
3. Students entering the programme in February (only allowed for Dutch students) do their electives, track electives and SEN131 (*CoSEM Research Challenges*) in the spring semester. They do the first-year CoSEM courses and *Master Thesis Preparation* in the next academic year, and *CoSEM Master Thesis* in the following autumn semester.
4. **First year compulsory programme (2023-2024)**

SEN111a	Introduction to Designing in Complex Systems (2 EC)
SEN1121	Complex Systems Engineering (5 EC)
SEN1131	Institutional Economics for Designing in Socio-technical Systems (3 EC)
SEN1141	Managing Multi-actor Decision Making (5 EC)
SEN115b	Law and Institutions (5 EC)
SEN1161	Design Project (5 EC) – Prerequisites: SEN112x, SEN113x, SEN114x (grade >5)
SEN1211	Agent-based Modelling (5 EC)
OR:	
SEN1221	Statistics Analysis of Choice Behaviour (5 EC)
SEN1231	Mixed Research Methods for Multi-actor Systems (5 EC)
OR:	
SEN124a	Design in Networked Systems (5EC)

SEN131b CoSEM Research Challenges (5 EC)

5. First year track programme

Students choose one out of three tracks as mentioned in Appendix 3. The tracks consist of the following courses:

Energy

- SEN1511 Engineering Optimization and Integrating Renewables in Electricity Markets (5 EC)
- SEN1522 Electricity and Gas: Market Design and Policy Issues (5 EC)
- SEN1531 Design of Integrated Energy Systems (5 EC)
- SEN1541 Sociotechnology of Future Energy Systems (5 EC)

Information & Communication

- SEN1611 I&C Architecture Design (5 EC)
- SEN1622 I&C Services Design (5 EC)
- SEN163b Responsible Data Analytics (5 EC)
- SEN1641 Digital Platform Design (5 EC)

Transport & Logistics

- SEN171a Advanced Evaluation Methods for Transport Policy Decision-making (5 EC)
- SEN1721 Travel Behaviour Research (5 EC)
- SEN173a Analysis and design of freight and logistic systems (5 EC)
- SEN1741 Innovations in Transport and Logistics (5 EC)

5. Second year compulsory programme (2024-2025)

The second year consists of the following compulsory courses and projects:

- SEN232a Master Thesis Research Design (5 EC)
- SEN2331 CoSEM Master Thesis (30 EC)

6. Second year free electives

Students choose 15 EC of free electives, check the [studentportal](#) for the requirements. The free electives need to be approved by the Board of Examiners. Students select the free electives via My Study Planning. The application will automatically be sent to the Board of Examiners for approval.

7. Second year track-electives

A list of automatically approved track electives is available on the [Graduation portal](#). Other track related courses may be submitted to the Board of Examiners for approval.

Master Programme EPA

Composition EPA

1. The master's programme EPA, 120 EC, consists of the following components:
 - a. compulsory courses and projects, 95 EC as laid down under Specifications EPA, Sections 2 and 3.
 - b. a (free) specialisation, 15 EC as laid down under Specifications EPA, Section 4a
Students can choose a specialisation ('model specialisation') from:
 - Advanced Modelling, Gaming and Design
 - AI Specialization
 - Cyber Security
 - Economics and Finance
 - Emerging technology-based innovation and entrepreneurship
 - ICT Design and Management
 - Supply Chain Management
 - Water and Delta Systems
 - c. Free electives (10 EC) as laid down under Specifications EPA, Section 4b
2. The student may be eligible for a special individual programme of 20 EC on top of the master's degree programme: Honours Programme Master, as laid down in Teaching and Examination Regulations, Article 10.

Specifications EPA

1. The first year master's programme EPA consists of compulsory courses and projects. The second year master's programme EPA consists of compulsory courses, specialisation courses and free elective courses.

2. **First year compulsory programme (2023-2024):**

see transition rules in Appendix 5

EPA111a	Policy Analysis for International Challenges (5 EC)
EPA112a	Programming for Data Science (5 EC)
EPA113a	Political Decision Making*** (5 EC)
EPA121a	Actor and Strategy Models* (5 EC)
EPA122a	Spatial Data Science (5 EC)
EPA123a	Introduction to TPM Modelling (<i>for students without a TB-Bachelors</i>) (5 EC)
EPA131a	Behaviour in Transitions (5 EC)
EPA132a	Advanced System Dynamics (5 EC)
EPA133a	Advanced Simulation (5 EC)
EPA141a	Model-based Decision-making (5 EC)
EPA142a	Ethics of Large System Interventions** (5 EC)
EPA143a	Macro Economics for Policy Analysis(5 EC)
XXXX	Technology (5 EC) elective for TB-Bachelors to be chosen from:
	<ul style="list-style-type: none"> • CS4015 - Behaviour Change Support Systems • CS4035 – Cyber Data Analytics • CS4195 – Modeling and Data Analysis in Complex Networks • CS4240 – Deep Learning • GEO1015 – Digital Terrain Modelling • GEO1016 – Photogrammetry and 3D Computer Vision • GEO5014 – Geomatics as support for energy applications • IN4334 - Analytics and Machine Learning for Software Engineering • SEN1211 - Agent Based Modelling • SEN1221 - Statistical Analysis of Choice Behaviour • SEN1522 - Electricity and Gas: Market Design and Policy Issues • SEN1622 - I&C Services Design • SEN1721 - Travel Behaviour Research • TPM034a – Machine Learning for Socio-Technical Systems

Three courses include one skills each

* EPA114a	Oral Presentation (skill)
**EPA144a	Interview techniques (skill)
***EPA223a	Academic Writing (skill)

3. **Second year compulsory programme (2024-2025):**

EPA222a	Master Thesis Preparation (5 EC)
EPA2942	Master Thesis EPA (30 EC)

4. **Second year specialisation programme and free electives**

- a. EPA students choose a specialisation of 15 EC and 10 EC of elective courses, check the [studentportal](#) for the requirements. You are able to select the EPA specialisation and electives via My Study Planning. Your application will automatically be sent to the Board of Examiners for approval. Students who intend to study abroad and students who start the programme in the second semester will have to compose a free specialisation.
- b. EPA221a Societal Challenge Project (10 EC) project for customer organisation offered to students studying in Delft/The Hague. Student can also change EPA221a into individual elective courses (10 EC).
- c. Elective courses may not be Bachelor courses or language courses and may not overlap significantly in terms of content with any other unit already included in the study programme of the student concerned. These elective courses have to be approved of by the Board of Examiners.

Master Programme MOT

Composition MOT

1. The master's programme MOT, 120 EC, consists of the following components:
 - a. compulsory courses and projects, 95 EC as laid down under Specifications MOT, Sections 2 and 3.
 - b. a (free) specialisation, 15 EC as laid down under Specifications, Section 4a.
Students can choose a specialisation ('model specialisation') from:
 - Advanced Modelling, Gaming and Design

- AI Specialization
- Cyber Security
- Economics and Finance
- Emerging technology-based innovation and entrepreneurship
- ICT Design and Management
- Supply Chain Management
- Water and Delta Systems

c. Free electives (10 EC) as laid down under Specifications MOT, section 4b.

- The student may be eligible for a special individual programme of 20 EC on top of the master's degree programme: Honours Programme Master, as laid down in Teaching and Examination Regulations, Article 10.

Specifications MOT

- The first year master's programme MOT consists of compulsory courses and projects. The second year master's programme MOT consists of compulsory courses, projects, specialisation courses and free electives.

- First year compulsory programme (2023-2024):**

see transition rules in Appendix 5

The first year consists of the following compulsory courses:

MOT111a	Financial Management (5 EC)
MOT112a	Economic Foundations (5 EC)
MOT113a	Technology Dynamics (5 EC)
MOT121a	Leadership & Technology Management (5 EC)
MOT122a	Digital Business Process Management (5 EC)
MOT123a	Inter- and intra-organisational decision making (5 EC)
MOT131a	Emerging and Breakthrough Technologies (5 EC)
MOT132a	Technology Strategy and Entrepreneurship (5 EC)
MOT133a	High Tech Marketing (5 EC)
MOT141a	Research Methods (5 EC)
MOT142a	Epistemology and Ethics of Business Analytics (5 EC)
MOT143a	Business Analytics (5 EC)

There is a CAP on a number of MOT-courses with limited space for students from EPA and CoSEM. For more information check study guide.

- Second year compulsory programme (2024-2025):**

The second year consists of the following compulsory courses and projects

MOT201a	Preparation for Master Thesis (5 EC)
MOT202a	Integration Moment (5 EC)
MOT2910	Master Thesis project (30 EC)

- Second year specialisation programme**

- MOT students choose a specialisation of 15 EC and 10 EC of elective courses, check the [studentportal](#) for the requirements. You are able to select the MOT specialisation and electives via My Study Planning. Your application will automatically be sent to the Board of Examiners for approval. Students who intend to study abroad and students who start the programme in the second semester will have to compose a free specialisation.
- Students choose 10 EC worth of elective courses. These should not be Bachelor courses or language courses and should not overlap significantly in terms of content with any other unit already included in the study programme of the student concerned. In case of doubt, the Board of Examiners decides

APPENDIX 4 - to Articles 7 and 16 of the TER (Remaining)

APP 4 - Article 1 - Master Thesis Project

- A student can start the Master Thesis Project when all other study units of the curriculum have been completed.
- If the requirement in subsection 1 has not been met, the student can be admitted to the graduation work only with the permission of the Board of Examiners. The student can only apply for this permission when the Master Thesis

Preparation course has been completed and less than or equal to 9 EC of the curriculum remain. The Board of Examiners requires a positive advice from the academic counsellor.

3. The formation of the student's assessment committee is described in the Rules and Guidelines of the Board of Examiners, Article 27 (TPM website -> Student portal -> Rules and Guidelines TPM).
4. Thesis duration arrangement starting from academic year 2018-2019 for all students: when a student does not pass the first green-light meeting within 17 working weeks after the kick-off meeting, the graduation committee may motivate to extend the graduation process of the student with a maximum time period of 3 months (13 weeks). The motivation for extension of the master thesis project has to be indicated on the green-light form. Students who do not pass their second green-light meeting have to start with a new graduation topic and a new graduation committee, with the same duration arrangement. In case of personal circumstances the Board of Examiners may deviate from the thesis duration arrangement in favour of the student.

APP 4 - Article 2 - Confidentiality of thesis and internship

Regarding possible confidentiality of a student's thesis and all external projects, the following rules apply:

1. Graduation presentations are public.
2. Theses and external project reports are public, unless companies/institutions, in writing and with motivation, request confidentiality because of sensitive information. A thesis/report can be put under embargo for a maximum of one year. If a company requests a longer period, company and student should agree on a separate public version of the thesis/report.
3. Lecturers, as reviewers of the thesis/report, always have access to all information necessary for an adequate evaluation of the thesis/report.
4. In case of sensitive information, lecturers should sign a declaration of confidentiality, for which a time limit can be set, in accordance with the terms of subsection 2.
5. Thesis reports (including confidential parts) should be accessible to members of the exam (graduation) committee and an accreditation committee, possibly after signing a declaration of confidentiality.

APP 4 - Article 3 - External Project

Students who are interested in doing an external project can only do so outside the regular study programme, and not by replacing the mandatory course courses. For an external project the track electives (CoSEM) or the elective space (EPA and MOT) of 10 EC can be used, course code TPM593a (internship – 10 EC).

Students who started in 2015 or earlier: students who are interested in doing an external project can do so by using the elective space of 9 EC. For an external project the course code TPM593a is used (internship – 10 EC), of a total of 10 EC elective space.

Students doing an external project will have to meet the following requirements (see also the study guide for the requirements of course TPM593a):

- Students are required to apply for approval to the Board of Examiners in advance
- One of the TPM instructors is involved in the project from start to finish
- An external supervisor will be appointed
- The external project will be finalized with a written report
- The external project will be assessed by the TPM examiner by filling out the required assessment form
- Students are required to remain registered as Master student at TU Delft during the entire project.

APPENDIX 5 - to Article 30 Transitions rules

Expired courses	2023-2024	2024-2025
MSc CoSEM		
SEN2321 Master Thesis Preparations	SEN2321 is replaced by SEN232a Master Thesis Research Design. Same course, other course code and course name.	
MSc EPA		
EPA1102 Understanding International Grand Challenges	If you completed the 4 group assignments AND attended the game session: <ul style="list-style-type: none"> - 2 x possibility for individual take home exam. These exams will be scheduled in Q1 and Q2. Contact the module manager. If the above does not apply: EPA1102 is replaced by EPA111A: Policy Analysis for International Challenges (Q1). Contact the module manager.	Follow EPA111A Policy Analysis for International Challenges (Q1).
EPA1124 Policy Analysis of Multi-actor Systems	If the group project is fulfilled (besides the analysis): <ul style="list-style-type: none"> - 1x possibility individual analysis. This possibility will take place in Q1. Contact the module manager If the above does not apply: EPA1124 is replaced by EPA111A: Policy Analysis of International Challenges (Q1). Contact the module manager.	Follow EPA111A Policy Analysis for International Challenges (Q1).
EPA1102 (Q1) AND EPA1124 (Q1)	In case you have to do EPA1102 AND EPA1124 Replaced by EPA111A: Policy Analysis for International Challenges (Q1) and XXXX (another 5 ECTS course). Contact the program director.	In case you have to do EPA1102 AND EPA1124 → Replaced by EPA111A Policy Analysis for International Challenges (Q1) and XXXX (another 5 ECTS course). Contact the program director.
EPA1133 Ethics and Impacts of Global Interventions	EPA1133 is replaced by EPA142A Ethics of Large System Interventions. Same course, other course code. No transitional rule needed.	EPA1133 is replaced by EPA142A Ethics of Large System Interventions. Same course, other course code.
EPA1144 Actor and Strategy Models	EPA1144 is replaced by EPA121A. Same course, other course code. No transitional rule needed.	EPA1144 is replaced by EPA121A. Same course, other course code.
EPA1223 Macro Economics for Policy Analysis	EPA1223 is replaced by EPA143A. Same course, other course code. No transitional rule needed.	EPA1223 is replaced by EPA143A. Same course, other course code.
EPA1316 Introduction to Data Science	If you completed the group project: <ul style="list-style-type: none"> - 1 possibility for the three individual assignments. This possibility will take place in Q2! Contact the module manager If you have done all the individual assignments (3): <ul style="list-style-type: none"> - 1 possibility for the group project. 	EPA1316 is replaced by EPA122a Spatial Data Science (Q2).

	<p>This possibility will take place in Q2! Contact the module manager</p> <p>If the above does not apply: EPA1316 (Q1) is replaced by EPA122A: Spatial Data Science (Q2!). Contact the module manager.</p>	
EPA1324 Introduction to TPM modelling	<p>Epa1324 (q2) is replaced by EPA123A (q2). Same course, other course code. Different method of examination, as we'll merge the three exams.</p> <p>Students who participated in the Epa1324, can opt to do a partial exam (in Q2 and Q3), with only the Theory, Discrete, and/or Continuous questions. These categories will be indicated on the exam sheet. The final partial grade will be calculated by weighing the correct questions against the total obtainable in each category.</p>	EPA1324 is replaced by EPA123A. Same course, other course code.
EPA1333 Computer Engineering for Scientific Computing	<p>If the Assignment is fulfilled (besides the written exam):</p> <ul style="list-style-type: none"> - 2 possibilities for the written exam. These exams will be scheduled in Q1 and Q2. Contact the module manager <p>If the above does not apply: EPA1333 is replaced by EPA112A: Programming for Data Science. (Q1). Contact the module manager.</p>	EPA1333 is replaced by EPA112A Programming for Data Science. (Q1).
EPA1341 Advanced System Dynamics	<p>EPA1341 is replaced by EPA132A. Same course, other course code. No transitional rule needed.</p>	EPA1341 is replaced by EPA132A. Same course, other course code.
EPA1352 Advanced Simulation	<p>EPA1352 is replaced by EPA133A. Same course, other course code.</p> <p>If a student – who participated in EPA1352 - did not pass the assignment or the exam, only that part needs to be repeated. Take that part in EPA133a.</p>	EPA1352 is replaced by EPA133A. Same course, other course code.
EPA1361 Model-based Decision-making	<p>EPA1361 is replaced by EPA141A. Same course, other course code. No transitional rule needed.</p>	EPA1361 is replaced by EPA141A. Same course, other course code.
EPA1424 Political Decision Making	<ul style="list-style-type: none"> - 1x possibility individual essay. This possibility will take place in Q3! Contact the module manager <p>If the above does not apply: EPA1424 (Q3) is replaced by EPA113A: Political Decision Making (Q1!). Contact the module manager.</p>	EPA1424 is replaced by EPA113A Political Decision Making (Q1).
EPA1434 Intercultural Relations and Project Management	<ul style="list-style-type: none"> - 1 possibility literature review - 1 possibility reflection report <p>These possibilities will take place in Q2! Contact the module manager.</p> <p>If the above does not apply: EPA1434 (Q2) is replaced by EPA131A: Behaviour in Transitions (Q3!). Contact the module manager</p>	EPA1434 is replaced by EPA131A Behaviour in Transitions (Q3).
EPA7010 Oral Presentation	<p>EPA7010 is replaced by EPA114A. Course will be offered within EPA121A Actor and Strategy Models (Q2).</p>	EPA7010 Oral Presentations (Q1) is replaced by EPA114a (Q2). Course will be

	<p>EPA7010 Oral Presentations (Q1) is replaced by EPA114a (Q2). The course will be offered within EPA121a Actor and Strategy Models in Q2. Same course, other course code, <u>other period</u>.</p> <p>Students who have participated in the old EPA7010-course, but failed the final presentation-exam, have the possibility to do the final presentation-exam as planned for EPA114a (2 exam opportunities in Q2). Contact the module manager of EPA114a about the dates of the final presentation session.</p> <p>Students who participated in the EPA7010, but failed the final presentation exam and cannot join EPA114A, can participate in the final presentation session scheduled for WM0203TU-Eng in Q3 or Q4 as an alternative. You will be assessed on the criteria of EPA7010. If you succeed, you pass the course EPA7010. Contact the module manager of WM0203TU-Eng.</p> <p>Students who have to (re-)take the whole course EPA7010, can do the course WM0203TU-Eng of 2 EC (Q1,Q2,Q3,Q4) as an alternative. If you pass WM0203TU-Eng (2 ECTS), you are exempted from EPA7010 (0 ECTS).</p> <p>Attention: Request to the student after passing WM0203TU-Eng: You have to inform the Board of Examiners about this exemption for processing this in your Individual Study Programme: Please, send an email to Examencommissie-TBM@tudelft.nl with your name, study number, MSc EPA. The message: you passed WM0203TU-Eng. This course is an exemption for EPA7021</p>	<p>offered within EPA121a Actor and Strategy Models in Q2.</p>
EPA7021 Academic Writing	<p>EPA7021 is replaced by EPA223A. Course will be offered within EPA113a Political Decision Making (Q1).</p> <p>EPA7021 Academic Writing (literature review) - Q2 - is replaced by EPA223a (essay). The course will be offered within EPA113a Political Decision Making in Q1. <u>Other period.</u></p> <p>The course content will remain mostly the same, but you will write a different genre (essay instead of literature review). Note: students who have taken the course EPA7021 but failed it, can retake by handing in all assignments of EPA223a in Q1. If you pass the assignments, you will pass the course EPA223a.</p> <p>Students who still want to retake EPA7021 with a literature review, can</p>	<p>EPA7021 Academic Writing (literature review) (Q2) is replaced by EPA223a (essay). Course will be offered within EPA113a Political Decision Making in Q1.</p>

	<p>take the course WM-ITAV-4010 Scientific Writing (Q1/Q2). If you pass WM-ITAV-4010 (2 ECTS), you are exempted from EPA7021 (0 ECTS).</p> <p>Attention: Request to the student after passing WM-ITAV-4010: You have to inform the Board of Examiners about this exemption for processing this in your Individual Study Programme: Please, send an email to Examencommissie-TBM@tudelft.nl with your name, study number, MSc EPA. The message: you passed WM-ITAV-4010. This course is an exemption for EPA7021</p>	
EPA7030 Interviewing Techniques	EPA7030 is replaced by EPA144A. Same course, other course code. Skill is moved from Q3 to Q4.	EPA7030 is replaced by EPA144A. Same course, other course code.
EPA2112 Societal Challenge Project	EPA2112 is replaced by EPA221A. New course code as from 2024-2025	EPA2112 is replaced by EPA221A. Same course, other course code. No transitional rule needed in case of a change to 5 EC, because it is an elective.
EPA2934 Master Thesis preparation	EPA2934 is replaced by EPA222A New course code as from 2024-2025	EPA2934 is replaced by EPA222A. Same course, other course code. No transitional rule needed.
MSc MOT		
MOT1003 Integration Moment	<p>Course will move from Year 1 Q4 to Year 2 Q2.</p> <p>1 resit opportunity for students who followed the course in 2022/23 or earlier is offered in Q4. Students can contact the module manager.</p> <p>MOT1003 is replaced by MOT202A. The course itself remains the same.</p>	MOT1003 is replaced by MOT202A (Y2 Q2). The course itself remains the same.
MOT1412 Technology Dynamics	<p>Course will move from Year 1 Q1 to Year 1 Q4.</p> <p>Students from cohort 22/23 who have completed the trial exams, will be offered a resit opportunity in Q1. All other students can follow the course in the new quarter: Q4.</p> <p>MOT1412 is replaced by MOT113A. The course itself remains the same.</p>	MOT1412 is replaced by MOT113A (Q4). The course itself remains the same.
MOT1421 Economic Foundations	MOT1421 is replaced by MOT112A. Same course, other course code.	MOT1421 is replaced by MOT112A. Same course, other course code.
MOT1442 Social and Scientific Values	MOT1442 is replaced by MOT142A. Students from cohort of 2022/23 who have successfully completed the Social Values group essay will be offered resit opportunities for the Scientific values exam and the Social values exam in Q2. Contact the module manager.	MOT1442 is replaced by MOT142A.
MOT1435 Technology, Strategy and Entrepreneurship	MOT1435 is replaced by MOT132A. Same course, other course code.	MOT1435 is replaced by MOT132A. Same course, other course code.
MOT1452 Inter- and Intra-organizational decision making	MOT1452 is replaced by MOT123A. Same course, other course code.	MOT1452 is replaced by MOT123A. Same course, other course code.
MOT1461 Financial Management	MOT1461 is replaced by MOT111A. Same course, other course code.	MOT1461 is replaced by MOT111A. Same course, other course code.
MOT1524 Leadership and Technology Management	MOT1524 is replaced by MOT121A. Same course, other course code.	MOT1524 is replaced by MOT121A. Same course, other course code.

MOT1531 Digital Business Process Management	MOT1531 is replaced by MOT122A. Same course, other course code.	MOT1531 is replaced by MOT122A. Same course, other course code.
MOT1534 High-Tech Marketing	Course will move from Year 1 Q3 to Year 1 Q4. Resit opportunity in Q4, the new quarter. Please contact the module manager. MOT1534 is replaced by MOT133A (Q4). The course itself remains the same.	MOT1534 is replaced by MOT133A (Q4). Same course, other course code.
MOT2313 Research Methods	MOT2313 is replaced by MOT141A. Same course, other course code.	MOT2313 is replaced by MOT141A. Same course, other course code.
MOT2421 Emerging and Breakthrough Technologies	Course will move from Year 1 Q4 to Year 1 Q1. Students from cohort 22/23 or earlier can take the resit in Q1 . Please contact the module manager. Students (from 22/23 or earlier) that are studying abroad in 23/24 can contact the module manager. MOT2421 is replaced by MOT131A. The course itself remains the same.	MOT2421 is replaced by MOT131A (Q1). The course itself remains the same.
MOT2004 Preparation for Master Thesis	MOT2004 is replaced by MOT201A. For students from cohort 22/23 or earlier who already took the course, and submitted the assignment and failed -> 1 resit opportunity will be offered in Q2 and Q4 to complete MOT2004. Please contact the modulemanager. If the above does not apply: MOT2004 is replaced by MOT201A.	MOT2003 is replaced by MOT201A.

MSc Electives		
SEN9120 Advanced Agent Based Modelling	SEN9120 is expired. As far as is known, everyone passed the course, otherwise contact the modulemanager.	
TPM001a Sociotechnology of Future Energy Systems	TPM001a (4 EC) is replaced by TPM001b (5 EC). Students that need to resit TPM001a from 2022/2023 and before, are offered 2 resit possibilities in Q1 and Q2 in 2023/2024. These resit possibilities are scheduled at the same day and time as the scheduled exam of TPM001b Sociotechnology of Future Energy Systems in 2023/2024. Please note that students that need to resit the exam of TPM001a, can also choose to follow the course TPM001b and take it's corresponding exam in 2023/2024.	
TPM005a Wetenschappelijk schrijven voor Technische Wiskunde	TPM005a is replaced by WI4800. Same course, other course code.	
TPM012a Milieu-Ethiek	TPM012a is replaced by TPM012b Environmental Ethics (3 EC). Students can apply any completed parts of previous course (TPM012a) towards the new course.	
TPM013a Milieu-Ethiek	TPM013a is replaced by TPM013b Environmental Ethics (5 EC). Students can apply any completed parts of previous course (TPM013a) towards the new course.	

TPM020a Economics of Cyber Security	TPM020a is replaced by TPM020b. For students in the old situation, we can accommodate individual assignments. If no group assignment has been completed, the student needs to retake the whole course. Contact the modulemanager.	
TPM023a Cost-Benefit Analysis: Theory and Application	TPM023a is replaced by TPM023b As far as is known, everyone passed the course, otherwise contact the modulemanager.	
TPM035a Game Theory and Strategic Decision Making	TPM035a is replaced by TPM035b. Same course, other course code.	
TPM415a Idea to Startup - Global Food	TPM415a is replaced by TPM415b Idea to Start-up – Climate Action. Same course, other course code and course name.	
TPM421b Technology Scout	The course can still be completed in the old setting, please contact the module manager	
TPM422b Technology Venture Development	The course can still be completed in the old setting, please contact the module manager	
TPM424b The Climate Leadership Journey	The course can still be completed in the old setting, please contact the module manager	
TPM425a Experience Entrepreneurship	TPM425a is replaced by TPM425b Start-Up Challenge. Same course, other course code and course name	
TPM426a Extended Experience Entrepreneurship	TPM426a is replaced by TPM426b Start-Up Challenge – Advanced. Same course, other course code and course name.	
WM0202TU Debattechniek	WM0202TU is vervangen door TBM046a Overtuigend Debatteren/ Persuasion and Debate. Hetzelfde vak, andere vakcode, andere vaknaam.	
WM0637SET Economic Policy for Sustainable Energy	WM0637SET is replaced by TPM0637SET. Same course, other course code.	
WM0931SET Sustainable Energy Innovations and Transitions	WM0931SET is replaced by TPM0931SET. Same course, other course code.
