

Implementation Regulation for the BSc Programme Nanobiology 2018-2019

Part of the Course and Exam Regulation of the Bachelor Programme
As referred to in Section 2 of the Course and Exam Regulation.

Faculty of Medicine (Erasmus MC) of
the Erasmus University Rotterdam

and

Faculty of Applied Sciences of
Technical University Delft

Paragraph 1 General

Article 1. Division of the academic year

The academic year of the programme is divided in two semesters. Each semester consist of 2 periods (quarters). Each period consist of two octals.

Article 2. Admission to the programme

The requirements for admission to the BSc programme Nanobiology are described in Section 2, Article 3 of the Teaching and Examination Regulation Nanobiology (TER 2018-2019)

Article 3. Final attainments

Final attainments of the BSc programme are describe in Section 3, Article 5 of the Teaching and Examination Regulation Nanobiology (TER 2018-2019)

The Bachelor of Science graduate of the programme Nanobiology that has the aim to bridge the fields of mathematics, physics and biology. The student:

1. will have relevant, current and fundamental knowledge of mathematics, physics and biology, as well as the methods and techniques of scientific research.
2. will be able to identify related concepts in biology and physics and to apply knowledge from one field of science to another.
3. will be able to use the acquired knowledge to follow current scientific research in the fields of biology and biophysics intensively, in addition to understanding and interpreting this literature.
4. will have demonstrable experimental research skills in the fields of molecular biology and biophysics.
5. will have the required communication skills.
6. will be aware of the need for lifelong learning and of the utility of creativity to the achievement of scientific progress.

Article 4. Minor

The BSc programme Nanobiology is a three year BSc programme of 180credit. The first year-phase is 60credit, the second and third year phase consist of 120credit.

The programme has a major/minor structure. The major is the main component of the BSc (60 credits first year phase + 90 credits second and third year phase). The minor phase in the first semester of the third year is 30 credits, the Nanobiology minor is a deepening minor. Admission to this minor is for Nanobiology students only. Students are only admitted when they have finalized the first year phase + 30 credit from the second year BSc Nanobiology at the start of the minor period in September.

Minors other than the deepening minor Nanobiology may also be followed at the Erasmus University, TUDelft and Leiden Universitie. Minors at these universities do not need approval from the Board of Examiners Nanobiology. Minors at other universities or self-composed minors need to be approval by the board of examiners.

Article 5e. COMPOSITION OF THE STUDY PROGRAMME OF THE FIRST YEAR; 2016-2017

The study programme for the first year in academic year 2016-2017 is same as for academic year 2015-2016 except for:

The course Biomolecular Dynamics will be renamed to: Molecular Biology. The course code will stay the same. It has no effect on the content of the programme.

First year bachelor program Nanobiology academic year 2016-2017

Article 7d. COMPOSITION OF THE STUDY PROGRAMME OF THE THIRD YEAR; 2017-2018.

Changes to last years programme are:

- Removed from the list of courses: NB3019: Current topics in Nanobiology: Molecular Motors
- Added to the list of courses: NB3022: Current topics in Nanobiology: Epigenetics
- Added to the list of courses: NB3020: Current topics in Nanobiology: Genomics and Proteomics Technology in Breast Cancer Research (*Note: with reservation: dependent on the availability of the teacher*)

Article 7d. COMPOSITION OF THE STUDY PROGRAMME OF THE THIRD YEAR; 2017-2018.

Changes to last years programme are:

- Added to the list of courses: NB3019: Current topics in Nanobiology: Molecular Motors

Paragraph 5 Honours Program

Article 8a: Admission to the Honours program

Requirements : average grade ≥ 8.0 , first year completed (= 60 EC), strong motivation (proven capability and willingness to commit for two years) and study plan for extracurricular activities. All Nanobiology students who meet these requirements are welcome to apply for the Honours programme of Nanobiology. Students will be selected by the HP director and coordinator.

Article 8b: HONOURS PROGRAM 2015-2016

Nanobiology Honours program; Academic year 2015-2016		
Course	Code	credit
Honours programme Seminars	NB2901HPB	2
Honours programme Journal Club	NB2902HPB	4
Honours programme Project	NB2903HPB	7
Honours programme Project – In depth research overview	NB2903HPB-RO	
Honours programme Project – Research proposal	NB2903HPB-RQ	
Honours programme Project – Business plan	NB2903HPB-BP	
Honours programme Broaden-your-experience-project	NB2904HPB	2

Article 8c: HONOURS TRACK 2016-2017

There are no changes in the Honours Programme compared to year 2015-2016

Article 8d: HONOURS TRACK 2017-2018

There are no changes in the Honours Programme compared to year 2016-2017

Article 8e: HONOURS TRACK 2018-2019

There are no changes in the Honours Programme compared to year 2017-2018

Paragraph 6: Exams

Article 9: Form of the exam and the assessment strategy

1. The form of the exam and the assessment strategy is described for each course in the digital studyguide: <http://www.studiegids.tudelft.nl/>
2. Attendance requirement is specified for each course in the digital studyguide or on Brightspace at the start of the course.
3. Rules on the composition of the final course grade can be found in the "TER" and the "Rules and Regulations of the Exam Committee"

Article 10: Minor

Deepen knowledge and skills in current methods, techniques, and instruments used in Nanobiology research

- 3 Modules of ~6 weeks (10 ec each)
- Students will work in (small) groups
- Entry requirement: **60EC from the first year + 30 ec from the second year**
- Application: 1-31 May via application form

Each module will be assessed by the responsible faculty/instructors of the module.

Each module needs to be graded sufficient (5.8 or higher) for the student to pass the minor.

In the case one individual module is graded with < 5.8, the module responsible with the minor coordinator will decide on the re-take. The final grade is the weight average of 3 grades received.

Article 11: Bachelor thesis project

Admission requirements for a student to register for the Bachelor thesis project: **60 EC from the first year plus 60EC from 2nd and 3rd year.**

Preferably all second year courses are finalized. In the case that some second year courses are not finalized before the start of the BSc end project and these courses are relevant for the subject in the BSc end project, the student cannot start with this end project.

Information on the Bachelor end project and a list of participating faculty members and projects can be found on Brightspace: Brightspace "Eindprojecten Administratie TNW / Thesis Office Applied Sciences"

Article 12: Order of the Exams

This Article describes the order of the exams and the prerequisites to participate in practical work.

1. Attendance requirement is specified in the digital studyguide or on Brightspace at the start of the course.
2. The laboratory practices in the first year are mandatory. This includes the introductory lectures and the laboratory work.
3. The practice in Electronic Instrumentation in the second year is mandatory and can only be followed when the safety training test on the first practice day is successfully passed.
4. Requirement to take part in the deepening minor Nanobiology is finalizing Labcourse 1 and 2 (NB1062 and NB1066) from the first year

Article 13: Schedule for Resits academic year 2018-2019

1st Year

In the first year bachelor phase the resits will be planned as follows.

7-11 January	Friday 1st March	May 27-29	12-16 August
Genetics NB1022	Chemistry 2 NB1110	Biomol. Dynamics-1 NB1012	Molecular Biology NB1016
Intro to Nanobiology NB1031		Physics 1a NB1140	Biophysics NB1132
Analysis 1 WI1415NB		Journal Club NB1052	Phys. Biol. of the Cell NB1072
Chemistry 1 NB1102		Analysis 2 WI1423NB	Labcourse-2 NB1066
		Labcourse-1 NB1062	Linear Algebra WI1142NB
		Physics 1b NB1143	Analysis 3 WI1416NB

2nd Year

In the 2nd year the resits for octal 1-6 courses will be scheduled during the day but only when there is no overlap with year 1 and 2 regular exams. Otherwise the resit will be scheduled in the evening hours from 18.00-21.00 hours. In most cases the resit will take place in the 10th week after the regular exam (holiday not included) For courses from octal 3 and 4 the resit can take place in the 15th week after the regular exam. sResits for courses in octal 7 and 8 will be in the August retake period (week 5.6)

3rd Year

In the 3rd year the resits for octal 1-6 courses will be scheduled 10 weeks after the regular exam (holiday not included). Resits for courses in octal 7 and 8 will be in the August retake period (week 5.6)

Paragraph 7 Degree Audit

Article 14a: Transition regulation academic year 2014-2015

NB2022: Philosophy and Ethics is a merger of NB2021 and NB2051 from the academic year 2013-2014. Students that missed one of these two (NB2021-NB2051) will have two retake possibilities in the academic year 2014-2015. Students that need to retake both can follow the course NB2022.

NB2211: Due to structural reorganization of this course, the course content will be different from last academic year.

Students that passed the practicals in academic year 2013-2014 only need to retake the exam for the course TN2211.

NB1141 from academic year 2012-2013 is replaced by NB1142 and NB1143 starting in academic year 2013-2014. Students from cohort 2012 will have to pass both courses NB1142 (3EC) and NB1143 (3EC) to have the equivalent of NB1041 (6EC)

WI2240TN will become NB2061 differential equations
