DOING RESEARCH | MAKING PROTOTYPES | AND MORE...

WANTED: INTERN INDUSTRIAL PRODUCT DESIGN

MINIMUM DURATION
OF 5 MONTHS

MANGO
PRODUCT DESIGN

INTERNSHIP ALLOWANCE
€400 PER MONTH

ManGo Product Design has internships available for industrial design students. Would you like to contribute to the development of **meaningful products**? And are you brimming with creativity and innovative ideas? Maybe you are the designer we are looking for!

As an industrial design intern, you will work on a **wide range of projects**, ranging from consumer products and sustainability solutions to medical devices and other innovations. You will be **involved in various tasks** in the design process: brainstorming, concept development, visualisation, research, prototyping... You have good and communicative sketching skills and think critically about all aspects of a concept. You are a pro with Solidworks and familiar with Adobe (Photoshop, Illustrator, Indesign) and Keyshot.

You will have a permanent internship supervisor, and work with **different project teams** within projects. There is an open atmosphere in our beautiful studio. During breaks, we have lunch outside in good weather or we play table football.

We offer an internship allowance of **€400 per month**.

Would you like to apply for the internship? Send us your portfolio showing your skills! Make sure you show as much of the **design process** as possible and explain what your contribution was in each project.
