Test

Sources:

- Photograph: E-service

Every member of staff should change their photograph themselves in E-service using their personal NetID. For additional questions about how E-service works, contact the Service Desk or consult the manual on intranet.

- Name: PeopleSoft

Changes to name or titles go via a call to HR Services.

Sources:

- Icon website: Pure
If there is a website – for example a personal website – in Pure, a link will be shown. If this is not desired, it should be removed in Pure.
- Mail: MDS
Comes directly from the TU Delft email system, standard TU Delft email address is shown here.
- WhatsApp: E-service
If a 06 (mobile) number is shown in E-service, it will be shown using a WhatsApp icon. Any changes should be made by the member of staff personally via E-service.

Sources:

- Profile: Pure or otherwise E-service.

In principle the profile information is extracted from Pure. If this is empty (for example administrative and support staff), the information is extracted from E-service.

So changes or additions for academic staff should be made in Pure, in consultation with the faculty information coordinator if necessary, and administrative and support staff can do this themselves via E-service (if required). Administrative and support staff can also choose to leave it empty.

Expertise

Energy Earth & Environmental Sciences

City Earth & Environmental Sciences

Office buildings Engineering & Materials Science

Office Earth & Environmental Sciences

Energy Social Sciences

Building Social Sciences

Energy efficiency Earth & Environmental Sciences

Thermal comfort Engineering & Materials Science

Sources:

- Fingerprints: Pure

These are generated automatically in Pure. If the researcher objects to the fingerprint functionality being shown, they should disable this functionality themselves in Pure. The faculty information coordinator can help with this if necessary. If the fingerprint is empty (as for administrative and support staff) this block will not be shown.

Academische achtergrond

Paul Suijker has a MSc degree in Physical Geography from Utrecht University (1984). His area of specialisation is (glacial) geomorphology. After that he studied computer science, especially the management of mainframe computers and servers. From 1985 until 1987 he was employed by the Wereldmuseum Rotterdam, working on the ICT infrastructure of the museum and on collection management. In August 1987 he started working for TU Delft Library. Within the TU Delft Library he has held several positions: system operator, system administrator, scientific information specialist (field of study: geosciences), administrator special collections and product researcher in the department of Library Innovation. Since September 2013 he is employed as a project manager for the department of Research Support of the Library.

Sources:

- Research interests: Pure
- Academic background: Pure

Both parts are free input fields in PURE; if they contain information they will be shown. If they are empty, they will not be shown. For ease of findability of the researcher, it is recommended these fields be filled.

Publicaties

- 2019 **Particle image velocimetry measurements of a thermally convective supercritical fluid**
Valentina Valori / Gerrit E. Elsinga / Martin Rohde / Jerry Westervael / Tim H.J.J. van der Hagen
- 2017-7-1 **An experimental parametric study on natural circulation BWRs stability**
Christian P. Marcel / M. Rohde / T. H.J.J. Van Der Hagen
- 2017 **Characteristics of turbulent heat transfer in an annulus at supercritical pressure**
Jurriaan Peeters / Rene Pecnik / Martin Rohde / Tim van der Hagen / Bendiks Jan Boersma
- 2017 **Experimental velocity study of non-Boussinesq Rayleigh-Bénard convection**
Valentina Valori / Gerrit Elsinga / Martin Rohde / Mark Tummers / Jerry Westervael / Tim van der Hagen
- 2016 **Investigation of rehomogenization in the framework of nodal cross section corrections**
M. Gamarino / D. Tomatis / A. Dall'Osso / D. Lathouwers / J. L. Kloosterman / T. H.J.J. Van Der Hagen
