

Industrial Design intern wanted!

THE CHALLENGE

Your challenge is to design and develop a user-friendly energy-saving product for non-technical consumers. Lead your project from sketches to prototypes, validation to detailed design, focusing on user-friendliness and functionality. Collaborate with our team to turn complex ideas into award-winning products! Whether you're creative, focused on user experience, skilled in production, or a prototyping expert, we'll find a project that fits your goals and skills.

supersola

Supersola is a fast growing startup that makes solar energy easy for everyone with our Plug & Play solar panels. With a highly successful 2023, we are poised to make 2024 even bigger! Our panels are easy to install, bringing simple solar energy to thousands of homes. Join us as we expand our product range and create the next simple sustainable energy solution!

YOUR PROFILE

- Studying in the direction of Product Design.
- Interested in transforming complex technical products into user-friendly consumer solutions.
- **Hands-on approach with skills in:**
 - 3D CAD drawing (e.g., SolidWorks)
 - Experienced in prototyping
 - Basic electronics knowledge
 - Production methods and materials
 - Effective project planning
 - Fluent in Dutch or English
 - Curious and proactive

OUR OFFER

- A great international team, where we work hard and enjoy lunches and drinks together.
- Experience the vibe of a startup and have impact!
- A monthly internship fee.
- Connect with experts to boost your network and knowledge.
- A choice of various innovative projects: from creative development to prototyping and production.

PERIOD: 4 TO 6 MONTHS
