

# Template for Systems Engineering Programme

## Project Description

Please submit your proposal via email: [m.sovago@tudelft.nl](mailto:m.sovago@tudelft.nl).

The deadline is **30 January** – recurring every year.

Your project proposal must be structured according to the format below. The language should be English and the exact titles of the paragraphs should be used. The proposal should have a length of maximum two A4 pages.

### 1. Title

The title is short, but clear; no elaborate description.

### 2. Applicant(s)

Name Applicant, Co-applicant(s), Company name, Address, Email(s) and Phone number(s).

### 3. Company information

Brief introduction to your company (maximum 100 words: mission, size, turnover, R&D activities, sales area). Please feel free to add your company logo.

### 4. Systems Engineering Case

Description of the systems engineering-related challenge that could be solved within the Systems Engineering Master Programme of TU Delft.

Please pay attention to the following aspects:

- the background to and the urgency of the challenge
- the system you would like to design with your student's team (~ 5 members)
- what contribution you expect from the Master's students during the 2.5 months project
- graphs, pictures, references
- possible solutions or directions toward solutions to your case
- boundary conditions (e.g. technical, organisational, or budgetary requirements)

**Please note:** The information of this proposal will be shared with the Master's students. The students will choose which project they would like to work on during the [Systems Engineering Programme](#).
