

Academic Year 2024-2025

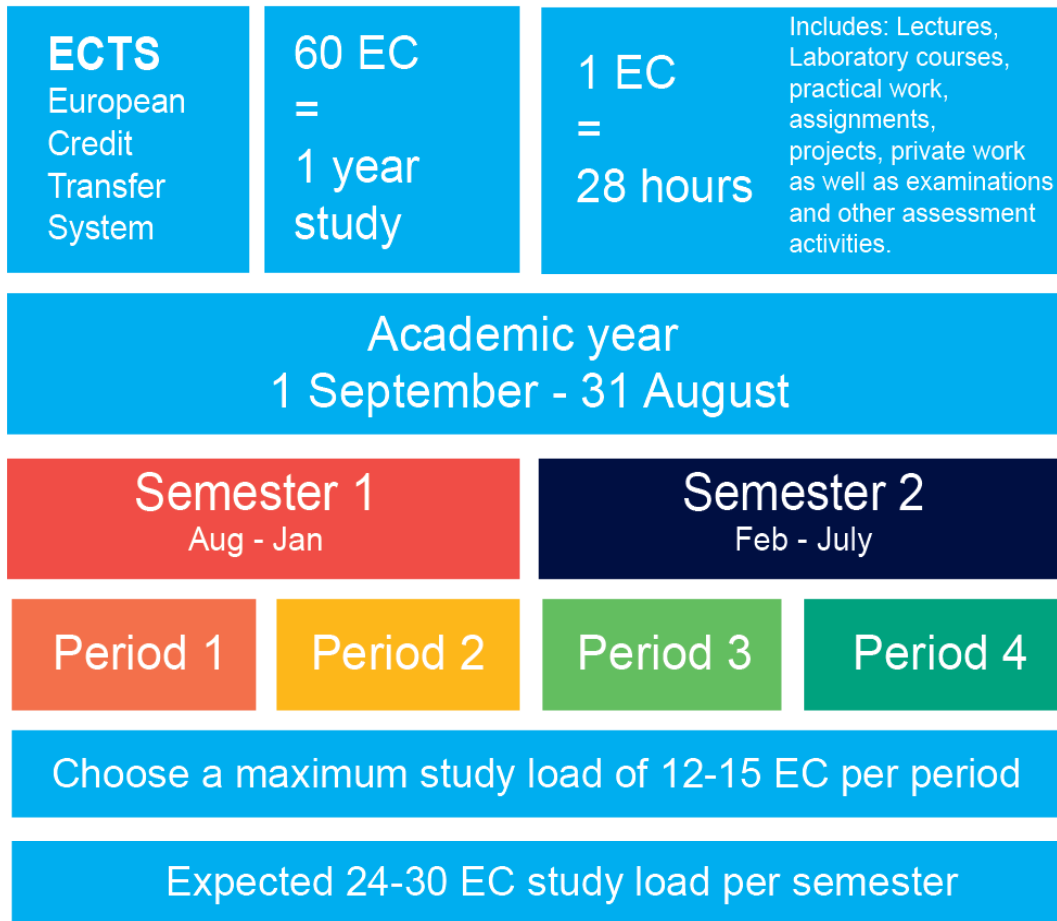

Mechanical Engineering

Exchange courses

Course selection guidelines

The table below shows how the academic year is divided and what is expected of you from each semester and/or period. With the details below of how many EC you are expected to obtain, you will be able to make a study plan that will need to be approved by your home university and TU Delft.

Things to consider when you choose your courses

1. Will you be staying for 1 or 2 semesters? This will affect the number of EC you need to choose.
2. You must take a course load equal to 24-30 EC per semester, 12-15 EC per period.
3. Changes to your course plan after your arrival still need to meet the above requirements.
4. Carefully consider your course workload (minimum 24 EC), and the manageability of it. Students are not permitted to re-sit exams after the end of the official exchange period. Alternative course/s will need to be taken at your home university when you return.
5. The majority of subjects (at least 70%) need to be chosen from the ME master programs.
6. Students can take up to 30% of the courses at other faculties mentioned in the [TU Delft courses in English list](#).
7. Faculty of Industrial Design Engineering; courses are not open for ME exchange students.
8. Faculty of Architect and the Built Environment; courses are not open for ME exchange students.
9. Faculty of Aerospace Engineering ; AE-courses have limited access for incoming ME exchange students. The courses available are mentioned in the [TU Delft courses in English](#). Students can select a *maximum of two non-restricted AE-courses*.

ME

Courses for 2024

English taught courses available for exchange students

At the faculty of Mechanical, Maritime and Materials Engineering (ME) we do **not** offer English taught BSc subjects for exchange students. Exchange students (also BSc) can follow any MSc courses from our faculty if you have the pre-required background knowledge.

Study plan

The majority of courses (at least 70%) must be chosen from the ME master programmes. Students can select subjects of any of the ME master programmes and tracks, as long as you have the pre-required knowledge, with the exception of Technical Medicine.

The specific course content can be found in the TU Delft [course browser \(Study guide\)](#).

In addition, exchange students may take up to 30% of their courses (1 or 2 courses) from other faculties listed in the TU Delft English course list:

Faculty Aerospace Engineering [Course list AE.pdf \(tudelft.nl\)](#)

Faculty Applied Sciences [Course list AS \(1\).pdf \(tudelft.nl\)](#)

Faculty Civil Engineering and Geosciences [Course list CEG 2024-2025.pdf \(tudelft.nl\)](#)

Faculty of Electrical Engineering, Mathematics & Computer Science [Microsoft Word - Course list EEMCS 2023 to update \(tudelft.nl\)](#)

Faculty of Technology, Policy and Management [Course list TPM 23-24 update.doc \(live.com\)](#)

Courses offered at these faculties are not open for ME exchange students:

Faculty of Industrial Design Engineering

Faculty of Architect and the Built Environment

Minor

Students nominated through faculty 3mE are not allowed to take a fixed minor at the faculty of ME or any other faculty at TU Delft.

General information

Please keep in mind that availability of courses may change at the last moment, so we ask students to be flexible in the subject choices. In addition, the schedule will be known just before the start of the semester so this might mean that subjects and or exams will be at the same time so you may need to change at the last moment. Exchange students can enrol in any MSc courses and are not limited within one master track.

Limited Project work

- Project work opportunities are limited and must be arranged directly with the [research department](#) by the students themselves.
- Project arrangements are primarily for students staying for the **full academic year**.
- The maximum workload for a project cannot exceed 25% of the total ECTS expected during an academic year, with a **maximum of 15 ECTS**.
- Be aware that project work will only be graded with a pass or fail.

- In case students only want to do a project or thesis research, they **cannot** be admitted as **exchange student**. They will be registered by the research department as an unpaid guest researcher (internship student).
- Students registered as an unpaid guest researcher cannot follow any subjects.

For further questions and help with finding the best subjects for your case, please email our international office: internationaloffice-ME@tudelft.nl
