Student Exchange Fact sheet
2023-2024
Why study at TU Delft?

TU Delft is the largest technical university in the Netherlands and covers practically the entire spectrum of engineering sciences. We are one of the top 20 universities in Europe, and one of the top 20 universities of technology worldwide (THE and QS ranking). At Delft University of Technology, we aim for a balance between pursuing world-class academic excellence, providing high quality education and developing expert solutions for societal and sustainable challenges. The biggest impact TU Delft has on society is through the pivotal role students play when educating the next generation of responsible top-level engineers. Our graduates make a difference by combining technical expertise with personal and professional attributes for effective leadership.

Also key at TU Delft is the integration of research education and innovation.

How to apply

Before a student from a partner university can apply for an exchange programme, they must be nominated by their home university. The nomination process has been recently introduced to assist students, as well as TU Delft faculties with course selection choices.

The faculty or department where you will be enrolled is responsible for advising, informing, selecting and accepting applications for international exchange students. Exchange students can apply online. Instructions are available on our website. Your application will be sent to the Faculty Exchange coordinator.

After the application deadline of either 1 October or 1 April students will receive an admission letter via email from the Education Service Centre. This will take an estimated 4 to 8 weeks. For some faculties this may take longer. Follow the instructions in the email to accept the offer. Once the offer is accepted, students will receive a financial letter. This will state if a student needs to pay any additional fees, such as housing, visa and/or living fee.

Erasmus+ exchange students must provide a Learning Agreement. Follow the instructions of the home university after the course package has been approved by both universities.

Exchange students are generally accepted by faculties for one or maximum two semesters. They can be enrolled for 1 semester (either from September until February or February until August) or a full academic year.

An exchange of 1 semester can be extended by an entire semester if your home university and the relevant TU Delft faculty gives permission for this. It is not permitted to come on exchange more than once or stay for longer than a year.

Some faculties may accept exchange students for a research-based project such as a thesis project. Students seeking to apply to undertake a research-based project at TU Delft are responsible for arranging their own suitable project and finding a TU Delft supervisor. A final thesis project conducted at TU Delft is the responsibility of your home university and must be organised well in advance.

Application deadlines

1st Semester (Autumn)
1 April (23:59 CET)
Application intake starts 1 March

2nd Semester (Spring)
1 October (23:59 CET)
Application intake starts 1 September
Applications that are incomplete or received after the deadline will not be considered.

Academic Calendar

1st semester:
4 September 2023 - 2 February 2024
1st period (4 September - 10 November)
2nd period (13 November - 2 February)

2nd semester:
12 February 2024 - 19 July 2024
3rd period (12 February - 19 April)
4th period (22 April - 19 July)

For information about the academic calendar and lecture hours, please see our timetable
Course selection and faculty specific restrictions

TU Delft Programmes are academically challenging and rigorous, therefore students are expected to be motivated and dedicated throughout their studies. We advise partner institutions to nominate students with a Cumulative Grade Point Average (CGPA) of at least 70%. This increases the students’ chances of meeting the credit requirements. TU Delft reserves the right to reject students with a lower CGPA. Should the results of an exchange student appear to be unsatisfactory, this will be discussed with the student and the home institution.

We expect students to carefully prepare a study plan according to our guidelines and discuss it with the home institution as soon as possible to make sure the choices are available in the semester desired. The study plan is a crucial factor whether students will be accepted or not. Major changes to study plans after approval of the course package are not allowed. Changes are only allowed if a course is cancelled or an overlap occurs. The study plan should be based on the list of TU Delft courses taught in English for incoming exchange students. A detailed description of these courses can be found with in the current course catalogue (the Study Guide), minor changes may occur as the course catalogue is updated in May. Students are advised to carefully check the period in which the courses take place. All faculties have their own course restrictions and requirements regarding the amount of courses that must be taken at their own faculty.

- Faculty of Industrial Design Engineering requires 100% of courses within IDE, only in exceptional cases can 10% of the courses be taken at other faculties.
- Faculty of Architecture and the Built Environment requires 100% of courses within AR.
- Faculty of Civil Engineering and Geosciences offers fixed course packages. In some cases, students can follow one or two additional courses at another faculty. Click here (Change this link) for more information.
- Faculty of Aerospace Engineering requires a minimum of 70% of courses within AE.
- Faculty of Electrical Engineering, Mathematics and Computer Science requires a minimum of 70% of courses within EEMCS.
- Faculty of Maritime, Mechanical and Materials Engineering requires a minimum of 70% of courses within 3ME.
- Faculty of Technology, Policy and Management requires a minimum of 51% of courses within TPM.
- Faculty of Applied Sciences requires a minimum of 51% of courses within AS.

If you want to take courses at a Faculty that has not joined the agreement, this is only possible with the permission of the relevant faculty exchange coordinator. Reasons for a course selection from another faculty not included in the agreement will need to be provided in your motivational letter. Exceptions are sometimes allowed if the student would like to attend courses that strongly correlate with their field of study. Keep in mind:
- TU faculties are reluctant to give permission for this, so your motivation is very important.
- Selecting courses from multiple faculties may increase the risk of conflicting schedules.

Required number of ECTS per semester, Grading System and Examinations

An advisable course package should comprise of between 24 and 30 EC (European Credits) per semester. Less than 24 EC is not acceptable, even if allowed by your home university. The number of EC should not exceed 35.

It is highly recommended to choose courses that evenly distribute the study load within one semester. The advisable study load is 12-15 EC per quarter. Each student is expected to attend classes, submit assessments and sit final exams for all courses in which he/she is enrolled at TU Delft. We expect students to earn a minimum of 20 EC credits per semester – meaning passing the exam, not just attending courses. Further instructions on how to select courses can be found on our course selection webpage.

TU Delft uses the European Credit Transfer System (ECTS) shared by all universities in the European Union. One academic year consists of 60 EC. One EC is equivalent to a study load of 28 hours (including lectures, laboratory courses, practical work, assignments, projects, private work, examinations or other assessment activities).

Here you can find information about the Dutch grading system. Students coming to TU Delft with Erasmus+ can send their Learning Agreement to the faculty exchange coordinators via email or upload it during the application phase in our online system.

It is only possible to take examinations during the period of enrollment as an exchange student at TU Delft, after that, students cannot take examinations (including distance examinations). This means that re-sit exams taking place in the next semester are not available. No extensions to a student’s stay will be granted for this purpose. Exchange students are not eligible for a TU Delft diploma.

Language of instruction and language requirements

The language of instruction for most bachelor programmes is Dutch. The Bachelor’s programmes Aerospace Engineering, Applied Earth Sciences, Computer Sciences and Engineering and Nanobiology are fully taught in English. There are over 250 available courses taught in English in other TU bachelor programmes. All Master courses are taught in English.

TU Delft Language skills policy for Erasmus+ partner universities

We trust our partner universities to nominate students with language level C1 or higher in English. Students do not need to provide test results; the statement included in the Nomination Letter from the home university is sufficient.

TU Delft language requirements for non-Erasmus+ partner universities

an original TOEFL test with an overall band score of at least 90; or an IELTS (academic version) with an overall band score of at least 6.5; or proof that you have passed the University of Cambridge ‘Certificate of Proficiency in English (CPE)’ or University of Cambridge ‘Certificate in Advanced English (CAE)’

The following students are exempted from taking the English language test:

- Nationals from the USA, U.K., Ireland, Australia, New Zealand, Canada, Switzerland and Singapore
- BSc and MSc graduates who obtained their qualification in one of the abovementioned countries
- Students currently enrolled in a Bsc/Msc programme in one of the abovementioned countries where the degree is fully taught in English and the home university can provide a statement confirming this.
Practical Matters

Tuition fees and finances
Exchange students must remain enrolled and pay tuition fees to their home university and are therefore exempt from paying tuition fees at TU Delft. Besides incidental and set-up costs, the costs of living and study, is estimated to be between 950 and 1,200 Euro per month.

Visa/residence permit requirements
At TU Delft we offer assistance to non-EU students in arranging visa and residence permits. Non-EU students (including UK Students and Non-EU students studying in EU countries) coming to the Netherlands are required to meet specific visa or residence permit requirements. They must provide proof of sufficient financial means to support themselves for the period of stay. Students will receive more information regarding this in the financial letter after they have been admitted and accepted their place.

Introduction period and registration
Closer to the start of the programme, exchange students will find more information on our website about the introduction period and the registration at TU Delft.

Accommodation
TU Delft has partnered with various housing agencies in the greater-Delft region to offer accommodation to students coming from abroad. TU Delft cannot guarantee accommodation to all incoming exchange students as the number of available options is limited while demand is increasing. Finding a room in Delft can be difficult and time-consuming. As most university cities in the Netherlands, Delft has a shortage of affordable student accommodations, a list of private providers is available here.

Health and liability insurance
All the information relevant on this topic is available on our insurance page.

Students and jobs
Students may be permitted to engage in part-time employment either paid or unpaid, only prior receiving approval of the faculty exchange coordinator. Further conditions may apply, please consult the Immigration and Naturalisation Service website.

After your exchange
- Visit the faculty exchange coordinator if you have (Erasmus+) documents that have to be signed at least 2 weeks before your departure.
- Request a transcript of records following your faculty’s procedure. Transcripts are provided within 5 weeks from the end of the exam period.
- Students TU Delft email account and Net ID will be cancelled after 90 days.
- Deregister at the municipality.
- Cancel your Dutch health insurance if applicable (claims filed before departure).

TU Delft Academic culture & Code of Conduct
TU Delft is a highly valued and rated institution recognized worldwide for the quality of its academic environment. Our exchange students enrich our academic culture and offer an invaluable contribution to learning. We aim to assist exchange students in understanding local regulations and customs and our policies. Information concerning students’ rights and responsibilities can be found on our website.

ESN Delft and InterDelft
Erasmus Students Network Delft and InterDelft aim to provide an excellent experience for all international students who have chosen TU Delft by enhancing cultural awareness among all students.

The Netherlands and Delft
Coming to the Netherlands you will find yourself in the world’s fourth happiest nation, and Dutch youngsters seem to be the happiest in the world, according to recent surveys. The country scores in the top five for most European quality of life indicators, including life expectancy, median income, water quality, personal freedom and education. Dutch people tend to be open and easy to approach, and they can be very outspoken. Most people speak Dutch as their first, and English as their second language. That makes life easy in the Netherlands. Delft is an interesting and historic town located between the larger cities of The Hague and Rotterdam. The city is known for the painter Johannes Vermeer and the Delft blue pottery. You will find a great many things that will help you to enjoy student life, including numerous cafes and pubs, cinema and theatre. There are also many reasonably-priced restaurants with national and international cuisine. Most students cycle from home to campus and back, day and night, all year long, come rain or sunshine.

The TU Delft Campus
Naturally, you will spend a lot of time on our TU Delft campus. It is a little town within a town, only a ten minute walk from Delft city centre, with enough study places, project facilities, Wi-Fi, green spaces, a super market, restaurants, coffee bars and other amenities you may need to make it your home away from home. Our library with the green roof is the main meeting point for those in search for information, study places and relaxation.
