

BUILD YOUR **COURSE GRAPH** IN 4 STEPS!

Course code and name:

This booklet belongs to:

PRIMECH
→

DEFINITIONS

<u>Course Graph Editor</u>	The on-line environment where you can build the graph of your course content.
<u>Subjects</u>	The main concepts of your course.
<u>Domains</u>	Clusters of concepts/overreaching ideas.
<u>Relations</u>	The arrows represent the learning path students should follow to discover new concepts.
<u>Lecture view</u>	Standard view of your Course Graph, it shows how the main subjects of the lecture relates to previous and future subjects.

The example provided 'Mechanics of Material concept map' is taken from:
Egelhoff & Burns, (2011). **A heuristic to aid teaching, learning and problem-solving for Mechanics of Materials**. ASEE Annual Conference and Exposition, Conference Proceedings.

QUICK PREPARATION

Having the following materials at hand makes developing the **Course Graph** much easier :

- **The learning objectives of your course**
- **The weekly lesson plans of your course**
- **The learning material:** slides, course book, assignments...

GENERAL TIPS

- Less is more!
- We do not expect you to finish your Course Graph during this workshop, this is just a crash course for you to understand the process and each necessary step.

CONTACTS

Need help to finish your Course Graph? Ask...

- Your peers in the PRIMECH Team environment.
- Course Graph developers: Beryl van Gelderen and Marijn Roelvink.
- Blended Learning Advisors in 3mE: Eva Langius and Merel Piekaar.

1 BRAINSTORMING

20 minutes

Based on the learning objectives and other course materials, can you come up with the course **DOMAINS** and **SUBJECTS**?

WORKSHOP ACTIVITY 1

5 min From the course material, **brainstorm** and write down the main **keywords** and **concepts** of your course. Can you **group them** by main ideas? Every idea is called a domain!

Alone

5 min Show it to your peer, what are the **main domains of your course**? Have you come up with the **same keywords and domains**?

In pair

10 min Can you **define clear subjects** from your keywords and domains? Once you are satisfied, pick one or two domains and copy them and their subjects on post-its (use one color per domain).

Alone

ACTIVITY 1 OUTCOME

A sketch of provisional domains and subjects.

TIPS

- Try to keep the domain number lower than 10. Preferably between 3 and 6.
- Brainstorm keywords and concepts first, then group them by domain using colors or symbols.
- We found that starting from the intended learning objectives keeps the number of subjects manageable.

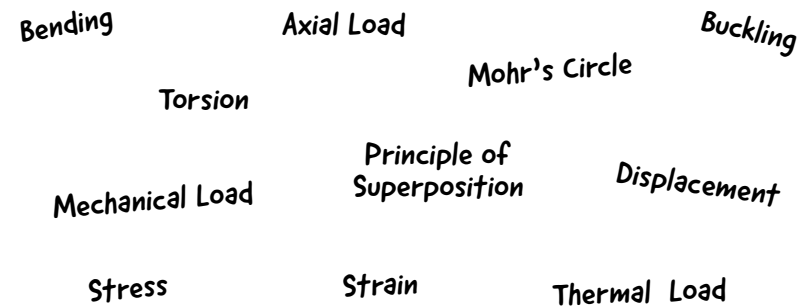

EXAMPLE ACTIVITY 1

Mechanics of Materials

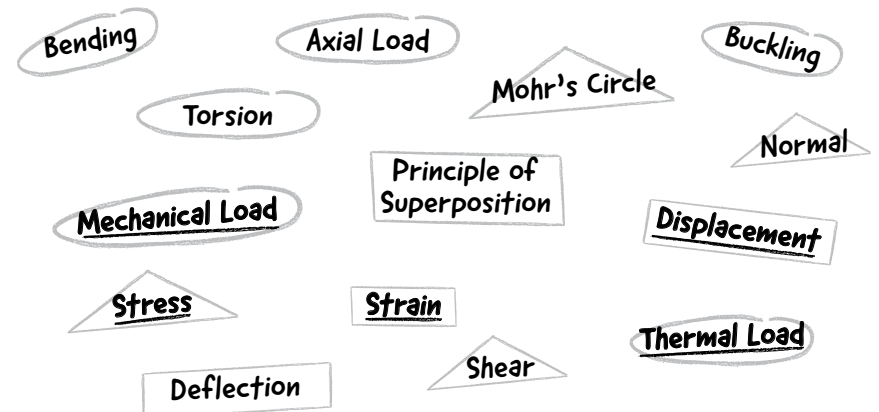

Learning objective:

- Use mechanics to solve basic problems dealing with the stress/strain/displacement of structures in static equilibrium under mechanical & thermal loads.

BRAINSTORM

GROUPING SUBJECTS AND DOMAINS

2 CONCEPT-MAPPING

20 minutes

What are the **RELATIONS**? Can you order the subjects following the students learning paths?

WORKSHOP ACTIVITY 2

5 min Pick 1 or 2 domains, what are the relations between the subjects? Can you order them following the students learning paths? **Connect the post-its** with arrows in the chosen order.

Alone

10 min Show it to your peer, have you come up with the same order? Would you like to change anything?

In pair

5 min Refine your path, and maybe your list of domains and subjects too.

Alone

ACTIVITY 2 OUTCOME

A graph of your subject and a graph or your domains.

TIPS

- The subject relations should correspond to the order of the course.
- If you have an arrow pointing both ways, you may need another subject.
- Draw arrows to connect, don't be afraid to move the post-its around.
- Sometimes there is the need to refine the domain and subject list.

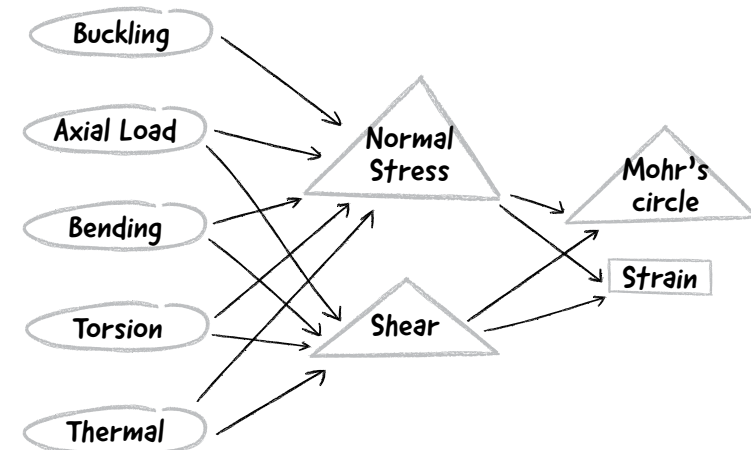

EXAMPLE ACTIVITY 2

Mechanics of Materials

DOMAINS CONCEPT MAPPING

SUBJECTS CONCEPT MAPPING

3 LET'S GET DIGITAL

20 minutes

It's time to fill in your course domains and subjects in the **GRAPH EDITOR!**

Open this link on your laptop:
<https://bit.ly/coursegraph>

It can also be found at:
<https://prime-applets.ewi.tudelft.nl/graph-editor>

WORKSHOP ACTIVITY 3

20 min Fill in the **domains, domain relations, subjects and subject relations** in the editor.

Alone You can try creating a couple of **lecture views** too. To do so, simply fill in the main subjects you are going to teach in at least 3 sequential lectures or weeks.

ACTIVITY 3 OUTCOME

The first steps in completing the graph of your course in the Course Graph editor!

TIPS

- Refining your concept map on paper makes this step much quicker.
- Less is more: the Course Graph is about creating an overview of your course, not about creating a perfect representation of each aspect of it.

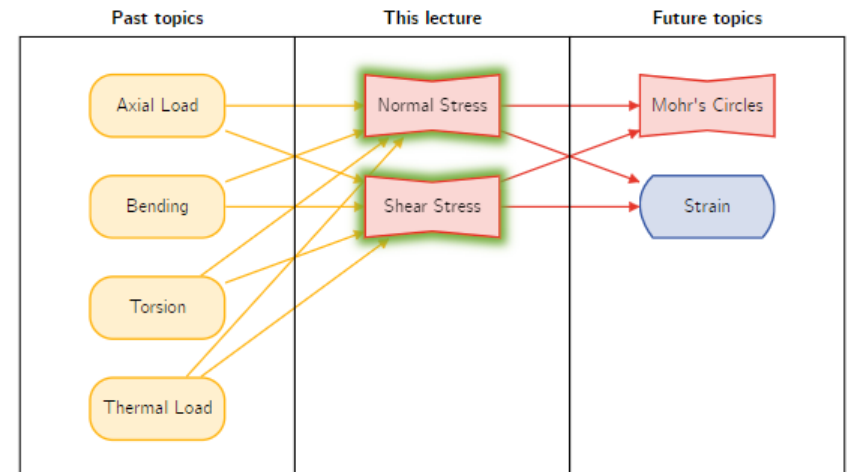

EXAMPLE ACTIVITY 3:

Domains Domain relations **Subjects** Subject Relations

Lectures **Edit layout**

Subjects

	≡↓ Name	≡↓ Domain	≡↓
1	Axial Load	Loading	↓ ■
2	Bending	Loading	↓ ■
3	Torsion	Loading	↓ ■
4	Thermal Load	Loading	↓ ■
5	Normal Stress	Stress	↓ ■
6	Shear Stress	Stress	↑ ■

4 HOW TO EMBED COURSE GRAPH IN BRIGHTSPACE

STEP 4.1 IN THE GRAPH EDITOR:

MR_SNBX Sandbox of Marijn Roelink

Here you can view the graphs associated to this course.

Graphs

Graph 2022

Links

Create a link and connect a graph to it. You can then use this link to share or embed your graph!

Name	Graph	Url
example	Graph 2022	https://prime-applets.ewi.tudelft.nl/graph/MR_

1. Create a link.

2. Click on the embed button.

MR_SNBX Sandbox of Marijn Roelink

Here you can view the graphs associated to this course.

Graphs

Graph 2022

Links

Create a link and connect a graph to it.

Embed "Graph 2022"

Show lecture: 1

Open view on: This lecture

Iframe height: 500 px

```
<iframe allow="fullscreen" style="width: 100%;height: 500px;" src="https://prime-applets.ewi.tudelft.nl/graph/MR_SNBX/example?lecture=1&view=lecture" allowfullscreen></iframe>
```

3. Click on copy.

STEP 4.2 IN BRIGHTSPACE:

Workshop example

Add dates and restrictions...

4. Click on "Add a description".
