

## Campus Weather Measurements:

Where do YOU want to know the weather?

Grab a post-it and stick it on a place you're interested in!

For example where you have lunch, you like to walk around, or spend time...  
Or even where you're working.

Can we get insight into the small-scale campus climate?

We're also looking for people to 'adopt' a weather station!

This means checking it every so often, and giving the indoor module a place nearby.

Please send an email if you're interested, to Arjan Droste ([a.m.droste@tudelft.nl](mailto:a.m.droste@tudelft.nl)) (or talk to me directly!)
