

# WAVE Resource for Electrical Production (**WAVREP**)

Dr. George Lavidas  
Marie Skłodowska-Curie Research Fellow

Ocean Energy Platform Annual Meeting  
*January 2019*

# Wave as an energy resource

## Unique characteristics

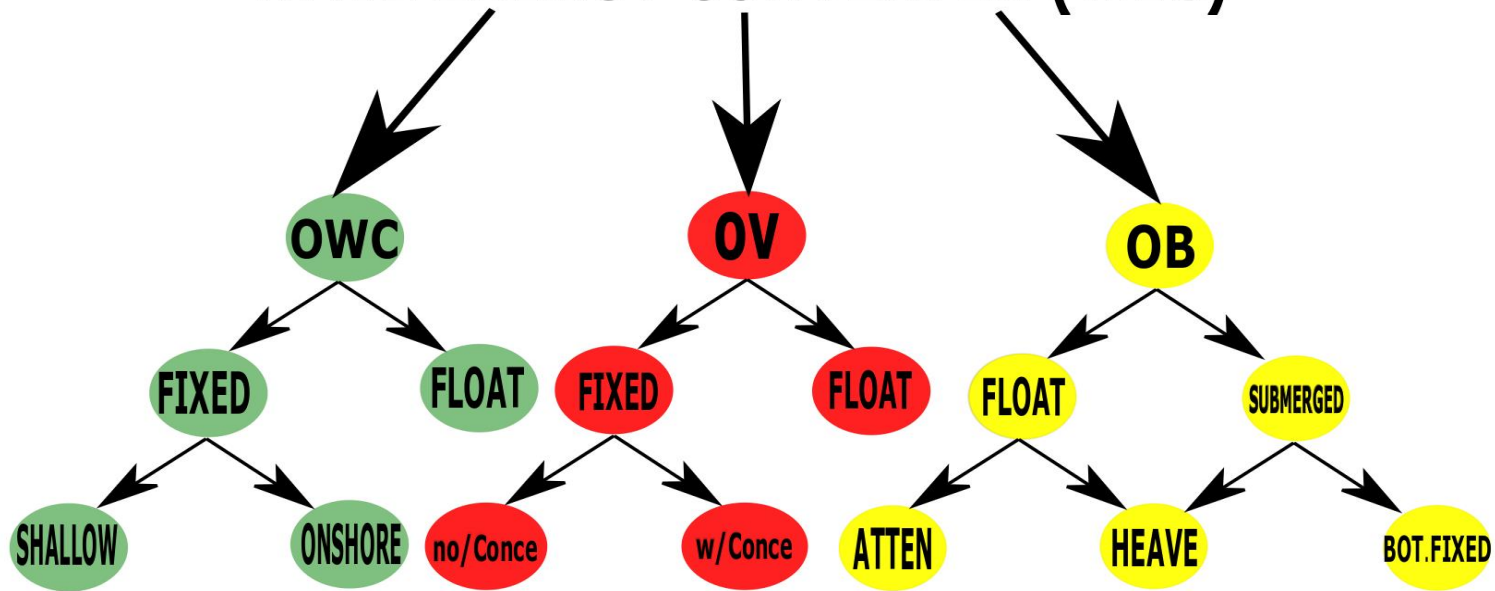

- ✓ Highest energy density
- ✓ Highly predictable
- ✓ Persistence of resource
- ✓ Access to the resource
- ✓ Cross-Correlations
- ✓ Variability reduction
- ✓ Offshore hybrid systems
- ✓ And many more.....

## So what is the problem???

- Depth
  - Significant Wave Height ( $H_{m0}$ )
  - Wave period(s) ( $T_{m02}; m01; m10; peak$ )
  - Wave Direction (Dir, PkDir)
  - Orientation
- .....Always device dependent*

# Wave as an energy resource

## WAVE ENERGY CONVERTER (WEC)

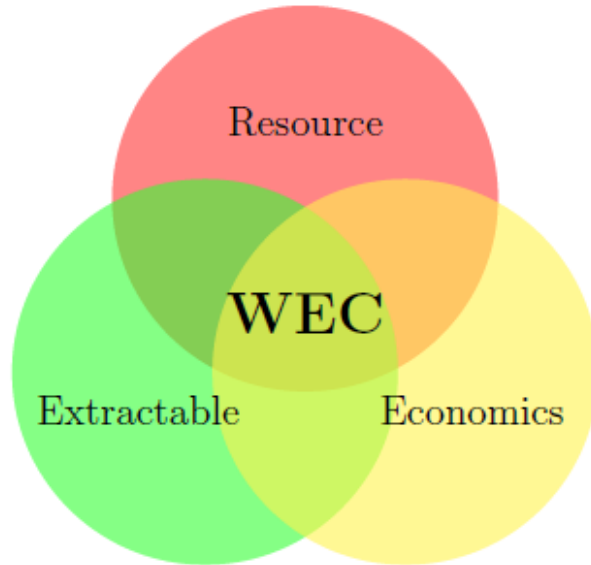

# WAVREP

## Problems (amongst others):

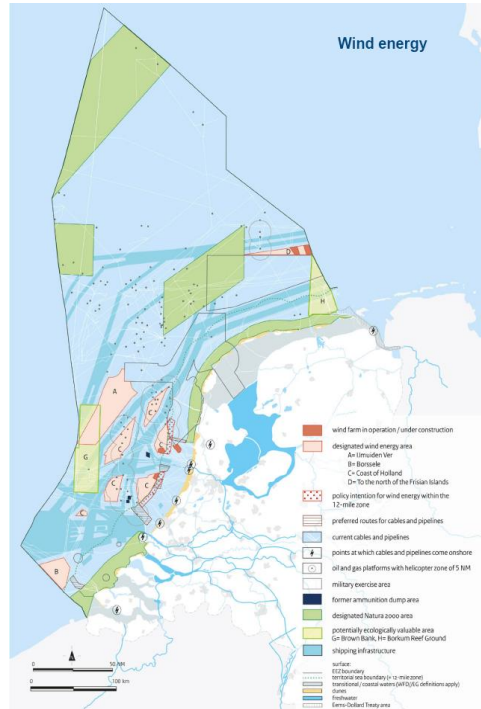

- ❖ WECs mismatch
- ❖ Oversized
- ❖ Increased CapEx
- ❖ Availability reduced
- ❖ Accessibility reduced

# WAVREP

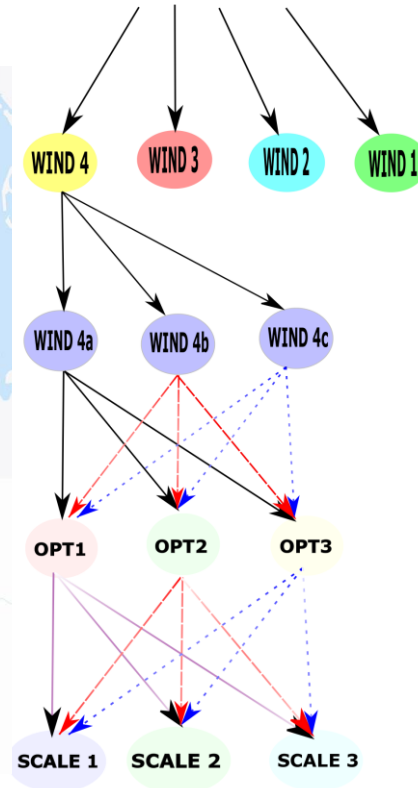

- ✓ Enhance availability.
- ✓ Energy production.
- ✓ Enhance accessibility.
- ✓ Enhance survivability.
- ✓ Reduce CapEx, OpEx.
- ✓ Reduce LCoE.
- ✓ Increase WEC outreach.
- ✓ Improve global applicability.
- ✓ Open up new market pathways.
- ✓ more synergies...

# Progress so far...

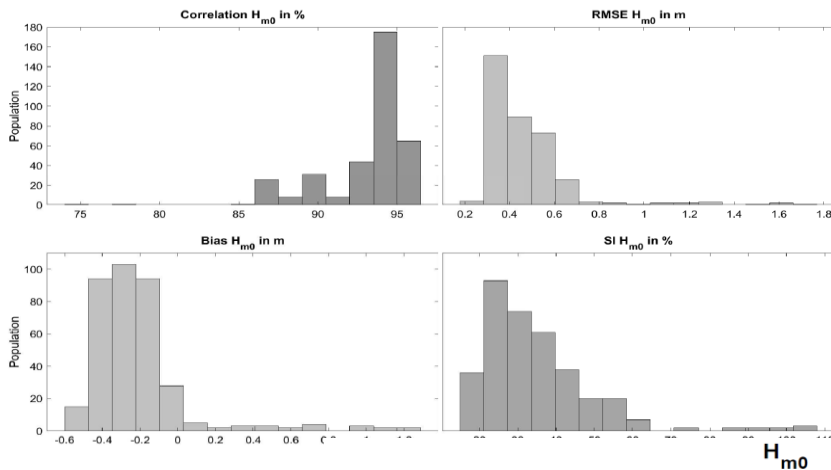

## CALIBRATION

- Spectral modelling with re-configuration of
- i. Wind generation.
  - ii. Dissipation mechanism.
  - iii. “Auto-correction” by mean square slope.
  - iv. Swell dissipation

# Progress so far...

# WAVREP will provide....

- ❑ Assessment of metocean &  $P_{\text{wave}}$ , availability, accessibility.
- ❑ Extreme return waves and impacts.
- ❑ Optimal siting & arrays configuration.
- ❑ Coastal impacts & wave run-up effects.
- ❑ WECs optimisation.
- ❑ LCoE, CapEx reductions.
- ❑ Offshore Energies Deployment (OED) methodology.

## ***Additionally:***

- *Maintenance, failure rates.*
- *Climate effects on offshore energies (incl. wind).*
- *Optimisation of revenue for offshore energies.*
- *Power quality.*
- *Environmental impacts & coastal erosion.*
- *etc...*

# Thank you for your attention

*This project received funding from the European Union's, Horizon 2020, research and innovation programme under the Marie Skłodowska-Curie Individual Fellowship (GA: No 787344).*
