designing with Boris

Needed materials:

- This book
- A stuffed dog
- Materials children can use to create their design, e.g.: blocks, tape, cardboard, paper

This is Boris the dog. He came to live with this family. With mummy, daddy and sister.

It's very cosy. But oh dear, what is daddy doing now?

AAAA

Too
Tsieeee

Daddy has to sneeze really hard.

Daddy keeps sneezing. He is allergic to Boris.

Boris has to live somewhere else, because living together in a house with daddy, that's not possible.

But outside it is very warm when the sun shines.

And when it rains, Boris gets all wet.

Whoosh!

The wind almost blows Boris away.

And it's actually quite boring outside, too.
There is only grass.

So Boris starts looking for stuff.

Oh look! Boris has found materials to build with.

Can you help Boris build a nice place to live?

Boris has to look outside for a new place to live. However, there are all kinds of things outside that Boris has to take into account. Can you help him build a new place?

This book introduces a design problem to preschoolers. Various circumstances are then presented that preschoolers can take into account in their design. This way they can choose what they find important and what they want to work on. This assignment is suitable for children who enjoy pretend play and/or construction play. They can use both defined and open materials.

Have fun designing!
