

# The future of Electrochemical Conversions

— Hydrogen and Beyond —

**Tuesday May 21, 2024**

Welcome to the 1<sup>st</sup> National Symposium on Electrochemical Conversions, this year hosted by e-Refinery.

We invite you and the scientific community to share and explore the latest research and innovations.

Join us in fostering discussions, exchanging ideas, and creating synergies for future collaborations.

## What's in it for you?

Two plenary lectures by international experts

### Focus sessions on:

- (Bio) CO<sub>2</sub> electrolysis – components
- Water electrolysis
- Integrated green H<sub>2</sub> in thermal processes
- Integrated equipment and plant design
- (Bio) CO<sub>2</sub> electrolysis – electrolyzers
- Scaling, dynamic operation & grid connection
- Electrochemical production of NH<sub>3</sub>, C-N and specialty chemicals
- Design, strategy and governance – the systems challenge

### Poster session:

With awards of € 1,500 (in total) for the best posters

### National Symposium on Electrochemical Conversions

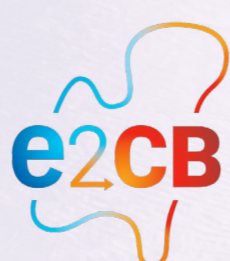

on **May 21, 2024**  
at Amare The Hague

Fee is € 50,- or € 75,- with dinner

Register by scanning the qr-code, or go to
